Developing Library and Information Center Collections G. Edward Evans, Margaret R. Zarnosky, Margaret Zarnosky Saponaro, 2000 This new work addresses the challenges of electronic publishing and puts issues of collection development into perspective, providing a broad understanding of the collection development process. The book covers all phases of collection development-from needs assessment, policies, and the selection process (theory and practice) to publishers, serials, protection, legal issues, and censorship and intellectual freedom. This work addresses the challenges of electronic publishing and puts issues of collection development into perspective, providing students and practitioners of library and information science with a broad understanding of the collection development process. The book covers all phases of collection development-from needs assessment, policies, and the selection process (theory and practice) to publishers, serials, protection, legal issues, and censorship and intellectual freedom. Each chapter has been expanded and updated with new material and reading lists. In addition, a chapter that is new to this edition deals with e-serials; and two appendixes contain samples of policies related to electronic concerns. It is an excellent survey of the state of the art of collection development and a comprehensive text.

Book Arts Collections Edward Ripley-Duggan, 1988 In response to the present day revival of interest in fine printing and binding, this unique volume highlights several of North America's special collections focusing on various aspects of the history and art of the book. Experts describe the scope, value, and utility of diverse collections in Canada, New York, California, Washington, New Jersey, and more, that reflect the collecting interests of librarians and private donors. Bibliophiles will be fascinated by the historical overviews of the collections on calligraphy, papermaking, bookbinding, printing, and illustration and the insight into the future direction of library acquisitions. The addition of a list of readings

provides a basic framework and helpful suggestions for further reading on the topics covered in this definitive book.

Sustainable Audiovisual Collections Through Collaboration Rachael Stoeltje, Vicki Shively, George Boston, Lars Gaustad, 2017-08-01 The art and science of audiovisual preservation and access has evolved at breakneck speed in the digital age. The Joint Technical Symposium (JTS) is organized by the Coordinating Council of Audiovisual Archives Associations and brings experts from around the world to learn of technologies and developments in the technical issues affecting the long-term survival and accessibility of audiovisual collections. This collection of essays is derived from presentations made at the 2016 JTS held in Singapore and presents an overview of the latest audiovisual preservation methods and techniques, archival best practices in media storage, as well as analog-to-digital conversion challenges and their solutions.

Interpreting Objects and Collections Susan M. Pearce, 1994 Bringing together the most significant papers on the interpretation of objects and collections, this volume examines how people relate to material culture and why they collect things. This volume brings together for the first time the most significant papers on the interpretation of objects and collections and examines how people relate to material culture and why they collect things. The first section of the book discusses the interpretation of objects, setting the philosophical and historical context of object interpretation. Papers are included which discuss objects variously as historical documents, functioning material, and as semiotic texts, as well as those which examine the politics of objects and the methodology of object study. The second section, on the interpretation of collections, looks at the study of collections in their historical and conceptual context. Many topics are covered such as the study of collecting to structure individual identity, its affect on time and space and the construction of gender. There are also

papers discussing collection and ideology, collection and social action and the methodology of collection study. This unique anthology of articles and extracts will be of inestimable value to all students and professionals involved in the interpretation of objects and collections.

A Guide to Collections on Paraguay in the United States Jerry W Cooney, Thomas Whigham, 1995-06-30 This volume provides the researcher with an excellent tool for investigating the history, politics, and culture of Paraguay. Although various libraries, museums, and archives in the U.S. contain documentary collections of interest to Paraguayanists, they are little known and thus underutilized. Whigham and Cooney help correct this problem. Not only do they describe the most famous collections in such libraries as the University of Texas at Austin, the Library of Congress, and the Oliveira Lima Library at Catholic University, they have also uncovered some obscure materials. From the Museum of Russian Culture in San Francisco to the Mennonite Archives at Bethel College in Kansas, they have run the gamut of available resources. This guide discusses diplomatic correspondence, genealogical materials, missionary records, political reports, and unpublished personal reminiscences. The authors also offer hints and advice on working in the various repositories and suggest research themes that might be developed using particular collections. An attractive format and a thorough subject index make this volume easy to use as well as informative.
