EMPOWERED Marty Cagan, 2020-12-03 Great teams are comprised of ordinary people that are empowered and inspired. They are empowered to solve hard problems in ways their customers love yet work for their business. They are inspired with ideas and techniques for quickly evaluating those ideas to discover solutions that work: they are valuable, usable, feasible and viable. This book is about the idea and reality of achieving extraordinary results from ordinary people. Empowered is the companion to Inspired. It addresses the other half of the problem of building tech products?how to get the absolute best work from your product teams. However, the book's message applies much more broadly than just to product teams. Inspired was aimed at product managers. Empowered is aimed at all levels of technology-powered organizations: founders and CEO's, leaders of product, technology and design, and the countless product managers, product designers and engineers that comprise the teams. This book will not just inspire companies to empower their employees but will teach them how. This book will help readers achieve the benefits of truly empowered teams--

Testing of Grouped Product for the Weibull Distribution Using Neutrosophic Statistics Muhammad Aslam, Osama H. Arif, In this paper, we will design an original neutrosophic fuzzy sudden death testing plan for the inspection/testing of the electronic product or parts manufacturing. We will assume that the lifetime of the product follows the neutrosophic fuzzy Weibull distribution. The neutrosophic fuzzy operating function will be given and used to determine the neutrosophic fuzzy plan parameters through a neutrosophic fuzzy optimization problem. The results of the proposed neutrosophic fuzzy death testing plan will be implemented with the aid of an example.

Grouped Paul Adams, 2011-11-22 The web is undergoing a fundamental change. It is moving away from its current structure of documents and pages linked together, and towards a new structure that is built around people. This is a profound change that will affect how we create business strategy, design, marketing, and advertising. The reason for this shift is simple. For tens of thousands of years we've been social animals. The web, which is only 20 years old, is simply catching up with offline life. From travel to news to commerce, smart businesses are reorienting their efforts around people - around the social behavior of their customers and potential customers. In order to be successful, businesses will need to understand how people are connected, how their social network influences them, how the people closest to them influence them the most, and how it's more important for marketers to focus on small, connected groups of friends rather than looking

for overly influential individuals. This book pulls together the latest research from leading universities and technology companies to describe how people are connected, and how ideas and brand messages spread through social networks. It shows readers how to rebuild their business around social behavior, and create products that people tell their friends about.

WHO Study Group on Tobacco Product Regulation. Report on the scientific basis of tobacco product regulation, 2021-05-04 This eighth report of the Study Group addresses electronic nicotine delivery system (ENDS), electronic non-nicotine delivery system (ENNDS) and heated tobacco product (HTPs); however, it does not cover all aspects of these products, because many of the papers were written to meet the request of COP8, which was to review understanding on novel and emerging tobacco products (FCTC/COP8). Continued research is necessary on these products; the Study Group will cover other products of interest (including traditional products, such as waterpipes, cigarettes and smokeless tobacco) in its next report, guided by countries' regulatory requirements and pertinent issues in tobacco product regulation. This will ensure continued, timely technical support to all countries and address all products, recognizing that their availability depends on the jurisdiction.

Testing of Grouped Product for the Weibull Distribution Using Neutrosophic Statistics Muhammad Aslam , Osama H. Arif, Parts manufacturers use sudden death testing to reduce the testing time of experiments. The sudden death testing plan in the literature can only be applied when all observations of failure time/parameters are crisp. In practice however, it is noted that not all measurements of continuous variables are precise. Therefore, the existing sudden death test plan can be applied if failure data/or parameters are imprecise, incomplete, and fuzzy.

Direct and Semi-Direct Product of Neutrosophic Extended Triplet Group Moges Mekonnen Shalla, Necati Olgun, The object of this article is mainly to discuss the notion of neutrosophic extended triplet direct product (NETDP) and neutrosophic extended triplet semi-direct product (NETS-DP) of NET group. The purpose is to give a clear introduction that allows a solid foundation for additional studies into the field. We introduce neutrosophic extended triplet internal direct product (NETIDP) and neutrosophic extended triplet external direct products (NETEDP) of NET group. Then, we define NET internal and external semi-direct products for NET group by utilizing the notion of NET set theory of Smarandache. Moreover, some results related to NETDP and NETS-DPs are obtained.

WHO Study Group on Tobacco Product Regulation World Health Organization, 2009 This report makes available the findings of an international group of experts that provide WHO with the latest scientific and technical advice in the area of product regulation. The third report presents the conclusions reached and recommendations made by the members of the WHO Study Group on Tobacco Product Regulation at its fifth meeting, during which it reviewed two background papers specially commissioned for the meeting and which dealt, respectively, with the following two themes: devices designed for the purpose of nicotine delivery to the respiratory system in which tobacco is not necessary for their operation and setting

regulatory limits for carcinogens in smokeless tobacco. The Study Group's recommendations in relation to each theme are set out at the end of the section dealing with that theme. Its overall recommendations are summarized in section 4. The Study Group intends this new set of recommendations to be useful to WHO Member States and national policymakers and regulators in shaping tobacco control policy.

Reduction of the Direct Product of Representations of the Poincare' Group H. E. Moses, 1969 The factors of the direct product and the representations which appear in the expansion are expressed in terms of a particular momentum representation called 'the standard helicity representation' which enables one to use a uniform notation for all masses, whether real, zero, or imaginary. The earlier portions of the present paper summarizes the properties of these representations.

Group Cohomology and Algebraic Cycles Burt Totaro, 2014-06-26 Group cohomology reveals a deep relationship between algebra and topology, and its recent applications have provided important insights into the Hodge conjecture and algebraic geometry more broadly. This book presents a coherent suite of computational tools for the study of group cohomology and algebraic cycles. Early chapters synthesize background material from topology, algebraic geometry, and commutative algebra so readers do not have to form connections between the literatures on their own. Later chapters demonstrate Peter Symonds's influential proof of David Benson's regularity conjecture, offering several new variants and improvements. Complete with concrete examples and computations throughout, and a list of open problems for further study, this book will be valuable to graduate students and researchers in algebraic geometry and related fields.

Access 2007 Matthew MacDonald, 2007-02-13 A comprehensive guide to Access 2007 helps users become comfortable with the new user interface and tabbed toolbar, as well as learn how to design complete databases, maintain them, write queries, search for data, and build attractive forms for quick-and-

INSPIRED Marty Cagan, 2017-11-17 How do today's most successful tech companies—Amazon, Google, Facebook, Netflix, Tesla—design, develop, and deploy the products that have earned the love of literally billions of people around the world? Perhaps surprisingly, they do it very differently than the vast majority of tech companies. In INSPIRED, technology product management thought leader Marty Cagan provides readers with a master class in how to structure and staff a

vibrant and successful product organization, and how to discover and deliver technology products that your customers will love—and that will work for your business. With sections on assembling the right people and skillsets, discovering the right product, embracing an effective yet lightweight process, and creating a strong product culture, readers can take the information they learn and immediately leverage it within their own organizations—dramatically improving their own product efforts. Whether you're an early stage startup working to get to product/market fit, or a growth-stage company working to scale your product organization, or a large, long-established company trying to regain your ability to consistently deliver new value for your customers, INSPIRED will take you and your product organization to a new level of customer engagement, consistent innovation, and business success. Filled with the author's own personal stories—and profiles of some of today's most-successful product managers and technology-powered product companies, including Adobe, Apple, BBC, Google, Microsoft, and Netflix—INSPIRED will show you how to turn up the dial of your own product efforts, creating technology products your customers love. The first edition of INSPIRED, published ten years ago, established itself as the primary reference for technology product managers, and can be found on the shelves of nearly every successful technology product company worldwide. This thoroughly updated second edition shares the same objective of being the most valuable resource for technology product managers, yet it is completely new—sharing the latest practices and techniques of today's most-successful tech product companies, and the men and women behind every great product.

Ray Tracing and Beyond E. R. Tracy,A. J. Brizard,A. S. Richardson,A. N. Kaufman,2014-02-27 This complete introduction

to the use of modern ray tracing techniques in plasma physics describes the powerful mathematical methods generally applicable to vector wave equations in non-uniform media, and clearly demonstrates the application of these methods to simplify and solve important problems in plasma wave theory. Key analytical concepts are carefully introduced as needed, encouraging the development of a visual intuition for the underlying methodology, with more advanced mathematical concepts succinctly explained in the appendices, and supporting Matlab and Raycon code available online. Covering variational principles, covariant formulations, caustics, tunnelling, mode conversion, weak dissipation, wave emission from coherent sources, incoherent wave fields, and collective wave absorption and emission, all within an accessible framework using standard plasma physics notation, this is an invaluable resource for graduate students and researchers in plasma physics.

Loved Martina Lauchengco, 2022-04-12 Most tech companies get marketing wrong because they don't know how to do product marketing right. The next in the bestselling SVPG series, LOVED shows what leaders like Apple, Netflix, Microsoft, and Salesforce do well and how to apply it to transform product marketing at your company. The best products can still lose in the marketplace. Why? They are beaten by products with stronger product marketing. Good product marketing is the difference between “also-ran” products versus products that lead. And yet, product marketing is widely misunderstood. Although it includes segmenting customers, positioning your product, creating product collateral, and supporting sales teams, great product marketing achieves much more. It directs the best way to bring your product to market. It shapes what the world thinks about your product and category. It inspires others to tell your product's story. Part of the bestselling series including INSPIRED and EMPOWERED, LOVED explains the fundamentals of best-in-class product marketing for product teams, marketers, founders and any leader with a product and a vision. Sharing her personal stories as a former product and marketing leader at Microsoft and Netscape, and as an advisor to Silicon Valley startups, venture capitalist, and UC Berkeley engineering graduate school lecturer, Martina Lauchengco distills decades of lessons gleaned from working with hundreds of companies to make LOVED the definitive guide to modern product marketing. With dozens of stories from the trenches of market leaders as well as newer startups with products just beginning their journey, the book shows you: the centrality of product marketing to any product's success the key skills and actions required to do it well the four fundamentals of product marketing and how to apply them how to hire, lead, and organize product marketing how product marketers optimize crucial collaboration with other functions one-sheet frameworks, tools and agile marketing practices that help simplify and elevate product marketing LOVED is an invitation to rethink tired notions of product marketing and practice a more dynamic, customer and market-centric version that creates raving fans and helps products achieve their full market potential.
