The Ladies' Berry Bubble Shorts Sewing Pattern and Tutorial Rebecca Page,2018-11-25 The Berry Bubble Shorts Sewing Pattern book is a complete pattern and tutorial for a pair of fully-lined heirloom-quality shorts for women in sizes XXS to 5XL. Suitable for only woven fabrics, this is a most excellent pattern for intermediate-beginners and more advanced sewistas alike! This beautifully-finished pattern offers a pair of fully-lined shorts with two different hem options (straight leg or bubble), cuff or binding options, and three different leg lengths: short, mid-thigh, and knee length, and the option to use regular or buttonhole elastic. Full fabric requirements are included inside this book. Depending on size, length, and waistband options you will need between 1 and 2 yards (92 cm and 183 cm) of fabric for the shorts and the same for the lining, and between 20 inches (51 cm) and 33 inches (84 cm) of elastic. You will also need 4 small poppers or buttons (plus an extra 2 buttons if you are using buttonhole elastic for the waist) iron-on interfacing for the buttonholes and thread to match. Full-sized pattern pieces are also included in this book; photocopy the pages or simply cut them out of the book, then tile as per the instructions to assemble the complete pattern. Complete beginner-friendly instructions are included, along with a one page quick-glance cheat sheet guide for more advanced sewistas.

Social Mobility in the 20th Century Florian R. Hertel,2016-08-09 Based on a novel class scheme and a unique compilation of German and American data, this book reveals that intergenerational class mobility increased over most of the past century. While country differences in intergenerational mobility are surprisingly small, gender, regional, racial and ethnic differences were initially large but declined over time. At the end of the 20th century, however, mobility prospects turned to the worse in both countries. In light of these findings, the book develops a narrative account of historical socio-political developments that are likely to have driven the basic resemblances across countries but also account for the initial decline and the more recent increase in intergenerational inequality.

**Dietary Patterns and Whole Plant Foods in Aging and Disease** Mark L. Dreher,2018-02-13 This text provides a

comprehensive review of the latest research on the effects of dietary patterns and whole plant foods on general health, aging, and cardiometabolic disease risk from major prospective cohort studies and randomized controlled trials (RCTs) and their meta-analyses. The book extensively assesses, the effects of lifestyle, dietary patterns, and specific whole plant foods on the quality of aging; the impact of fiber-rich foods on colonic microbiota and weight regulation, the effects of which influence the quality of aging; the effects of fiber-rich diets on the aging gastrointestinal tract; and the role of dietary patterns and specific whole plant foods on coronary heart disease, hypertension, chronic kidney disease, stroke and type 2 diabetes. Figures are extensively used to highlight findings and tables summarizing food composition dietary patterns and whole plant foods. Tables summarizing meta-analyses and representative cohort studies and RCTs provide state-of-the-art coverage of the important effect of dietary patterns and whole plant foods on aging and cardiometabolic diseases. Dietary Patterns and Whole Plant Foods in Aging and Disease will serve as a very useful, state -of -the-art resource for dietitians, physicians, nurses, food industry scientists, researchers, naturopathic doctors, educators and their students interested in the role of dietary patterns and specific whole plant foods on aging and disease. The probability of healthy aging and disease prevention is significantly improved by 70% when individuals and populations follow a healthy lifestyle. Healthy lifestyle choices include adhering to a healthy dietary pattern, increasing physical activity most days of the week, achieving and maintaining lean body weight and waist size, and the cessation of smoking. It is estimated that 90% or more of those in westernized populations are on track for unhealthy aging and increased cardiometabolic disease risk, especially with the obesity pandemic associated with relatively poor diet quality and sedentary lifestyles. Healthy dietary patterns significantly lower risk of all-cause mortality and chronic disease incidence compared to Western dietary patterns. Since healthy whole and minimally processed plant foods vary widely in their nutrient and phytochemical compositions, their overall benefit in aging and disease may vary depending on the specific whole plant foods consumed.

*Hormones and Reproduction of Vertebrates, Volume 5* David Norris, Kristin Lopez, 2011-05-04 This series of volumes represents a comprehensive and integrated treatment of reproduction in vertebrates from fishes of all sorts through mammals. It is designed to provide a readable, coordinated description of reproductive basics in each group of vertebrates as well as an introduction to the latest trends in reproductive research and our understanding of reproductive events. Whereas each chapter and each volume is intended to stand alone as a review of that topic or vertebrate group, respectively, the volumes are prepared so as to provide a thorough topical treatment across the vertebrates. Terminology has been standardized across the volumes to reduce confusion where multiple names exist in the literature, and a comprehensive glossary of these terms and their alternative names is provided. A complete, essential and up to date reference for research scientists working on vertebrate hormones and reproduction - and on animals as models in human reproductive research Covers the endocrinology, neuroendocrinology, physiology, behaviour and anatomy of vertebrate reproduction Structured

filmmakers, and curators. Finley offers provocative new insights into the works of Amiri Baraka, Romare Bearden, Betye Saar, and many others. She demonstrates how the icon was transformed into poetry, literature, visual art, sculpture, performance, and film—and became a medium through which diasporic Africans have reasserted their common identity and memorialized their ancestors. Beautifully illustrated, *Committed to Memory* features works from around the world, taking readers from the United States and England to West Africa and the Caribbean. It shows how contemporary Black artists and their allies have used this iconic eighteenth-century engraving to reflect on the trauma of slavery and come to terms with its legacy.

*Women and Work in South Asia* Deipica Bagchi, Saraswati Raju, 2013-10-16 Women's work is central to the social and economic aspirations of the countries of South Asia. Their contribution to agriculture, industry and services is critical. However, planners and policy makers frequently ignore women's economic roles, drawing simplistic conclusions from inadequate data. *Women and Work in South Asia* provides a cross-cultural perspective on research on women's work in South Asia. Integrating macro and micro analysis, Asian and Western contributors analyse the inadequacies of official statistics and explore, through case studies, the cultural and socio-economic position of women at work in the region.
