From Goodwill to Grunge Jennifer Le Zotte,2017-02-02 In this surprising new look at how clothing, style, and commerce came together to change American culture, Jennifer Le Zotte examines how secondhand goods sold at thrift stores, flea markets, and garage sales came to be both profitable and culturally influential. Initially, selling used goods in the United States was seen as a questionable enterprise focused largely on the poor. But as the twentieth century progressed, multimillion-dollar businesses like Goodwill Industries developed, catering not only to the needy but increasingly to well-off customers looking to make a statement. Le Zotte traces the origins and meanings of secondhand style and explores how buying pre-owned goods went from a signifier of poverty to a declaration of rebellion. Considering buyers and sellers from across the political and economic spectrum, Le Zotte shows how conservative and progressive social activists--from religious and business leaders to anti-Vietnam protesters and drag queens--shrewdly used the exchange of secondhand goods for economic and political ends. At the same time, artists and performers, from Marcel Duchamp and Fanny Brice to Janis Joplin and Kurt Cobain, all helped make secondhand style a visual marker for youth in revolt.

Consumer psychology is a discipline at the interface of marketing, advertising and psychology. The research in this area focuses on fundamental psychological processes as well as on issues associated with the use of theoretical principles in applied contexts. The Handbook presents state-of-the-art research as well as providing a place for authors to put forward suggestions for future research and practice. The Handbook is most appropriate for graduate level courses in marketing, psychology, communications, consumer behavior and advertising.

The I. I. I. Insurance Fact Book 2008 ,2008

Young People, Social Media and Health (Open Access) Victoria Goodyear,Kathleen Armour,2018-11-02 The pervasiveness of social media in young people's lives is widely acknowledged, yet there is little evidence-based understanding of the impacts of social media on young people's health and wellbeing. *Young People, Social Media and Health* draws on novel research to understand, explain, and illustrate young people's experiences of engagement with health-related social media; as well as the impacts they report on their health, wellbeing, and physical activity. Using empirical case studies, digital representations, and evidence from multi-sector and interdisciplinary stakeholders and academics, this volume identifies the opportunities and risk-related impacts of social media. Offering new theoretical insights and practical guidelines for educators, practitioners, parents/guardians, and policy makers; *Young People, Social Media and Health* will also appeal to students and researchers interested in fields such as Sociology of Sport, Youth Sports Development, Secondary Physical Education, and Media Effects.

Poultry Inspection National Research Council,Division on Earth and Life Studies,Commission on Life Sciences,Food and Nutrition Board,Committee on Public Health Risk Assessment of Poultry Inspection Programs,1987-01-01 According to surveys, the public believes the chickens it is buying are wholesome. *Poultry Inspection: The Basis for a Risk-Assessment Approach* looks at current inspection procedures to determine how effective the Food Safety Inspection Service is in finding dangerous levels of contaminants and disease-producing microorganisms. The book first describes the history behind the current system, noting that the amount of poultry inspected has increased dramatically while techniques and regulations have remained constant since 1968. The steps involved in an inspection are then described, followed by a discussion of alternative and innovative inspection procedures. It then provides a risk-assessment model for poultry, including submodels for each stage of processing. Risk assessment is used to protect health, establish priorities, identify problems, and set acceptable levels of risk. The model is applied both to microbiological hazards and to chemical contaminants.

A Concise Introduction to Logic Patrick J. Hurley,2008

Minds Without Meanings Jerry A. Fodor,Zenon W. Pylyshyn,2015 Two prominent thinkers argue for the possibility of a theory of concepts that takes reference to be concepts' sole semantic property. In cognitive science, conceptual content is frequently understood as the "meaning" of a mental representation. This position raises largely empirical questions about what concepts are, what form they take in mental processes, and how they connect to the world they are about. In *Minds without Meaning*, Jerry Fodor and Zenon Pylyshyn review some of the proposals put forward to answer these questions and find that none of them is remotely defensible. Fodor and Pylyshyn determine that all of these proposals share a commitment to a two-factor theory of conceptual content, which holds that the content of a concept consists of its sense together with its

reference. Fodor and Pylyshyn argue instead that there is no conclusive case against the possibility of a theory of concepts that takes reference as their sole semantic property. Such a theory, if correct, would provide for the naturalistic account of content that cognitive science lacks—and badly needs. Fodor and Pylyshyn offer a sketch of how this theory might be developed into an account of perceptual reference that is broadly compatible with empirical findings and with the view that the mental processes effecting perceptual reference are largely preconceptual, modular, and encapsulated.

Understanding Institutional Diversity Elinor Ostrom, 2009-11-13 The analysis of how institutions are formed, how they operate and change, and how they influence behavior in society has become a major subject of inquiry in politics, sociology, and economics. A leader in applying game theory to the understanding of institutional analysis, Elinor Ostrom provides in this book a coherent method for undertaking the analysis of diverse economic, political, and social institutions. *Understanding Institutional Diversity* explains the Institutional Analysis and Development (IAD) framework, which enables a scholar to choose the most relevant level of interaction for a particular question. This framework examines the arena within which interactions occur, the rules employed by participants to order relationships, the attributes of a biophysical world that structures and is structured by interactions, and the attributes of a community in which a particular arena is placed. The book explains and illustrates how to use the IAD in the context of both field and experimental studies. Concentrating primarily on the rules aspect of the IAD framework, it provides empirical evidence about the diversity of rules, the calculation process used by participants in changing rules, and the design principles that characterize robust, self-organized resource governance institutions.

Aviation Psychology and Human Factors Monica Martinussen, David R. Hunter, 2017-07-12 This book covers the application of psychological principles and techniques to situations and problems of aviation. It covers concepts of psychological research and data analysis and shows how these tools are used in the development of new psychological knowledge. The new edition offers material on physiological effects on pilot performance, a new chapter on aviation physiology, more material on fatigue, safety culture, mental health and safety, as well as practical examples and exercises after each chapter.

Dalhuisen on Transnational Comparative, Commercial, Financial and Trade Law Volume 2 Jan H Dalhuisen, 2019-06-13 This is the seventh edition of the leading work on transnational and comparative commercial, financial, and trade law, covering a wide range of complex topics in the modern law of international commerce, finance and trade. As a guide for students and practitioners it has proven to be unrivalled. The work is divided into three volumes, each of which can be used independently or as part of the complete work. Volume 2 deals with the transnationalisation of contract; movable and intangible property law; and the transformation of the models of contract and movable property in commercial and financial

transactions between professionals in the international flow of goods, services, money, information, and technology. In this transnational legal order, the emphasis in the new law merchant or modern *lex mercatoria* of contract and movable property turns to risk management, asset liquidity, and transactional and payment finality. Common law and civil law concepts are compared and future directions indicated. The potential, effects, and challenges of the blockchain are noted, so far especially for the carriage of goods by sea. All three volumes may be purchased separately or as part of a single set.

War and the Law of Nations Stephen C. Neff, 2005-08-04 This 2005 volume is a history of war, from an international law perspective, from Roman times to the present.

Foundational Issues in Human Brain Mapping Stephen José Hanson, Martin Bunzl, 2010 The field of neuroimaging has reached a watershed and critiques and emerging trends are raising foundational issues of methodology, measurement, and theory. Here, scholars reexamine these issues and explore controversies that have arisen in cognitive science, cognitive neuroscience, computer science, and signal processing.

Visual Impairments National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Disability Determination for Individuals with Visual Impairments, 2002-08-17 When children and adults apply for disability benefits and claim that a visual impairment has limited their ability to function, the U.S. Social Security Administration (SSA) is required to determine their eligibility. To ensure that these determinations are made fairly and consistently, SSA has developed criteria for eligibility and a process for assessing each claimant against the criteria. *Visual Impairments: Determining Eligibility for Social Security Benefits* examines SSA's methods of determining disability for people with visual impairments, recommends changes that could be made now to improve the process and the outcomes, and identifies research needed to develop improved methods for the future. The report assesses tests of visual function, including visual acuity and visual fields whether visual impairments could be measured directly through visual task performance or other means of assessing disability. These other means include job analysis databases, which include information on the importance of vision to job tasks or skills, and measures of health-related quality of life, which take a person-centered approach to assessing visual function testing of infants and children, which differs in important ways from standard adult tests.

The Material Life of Human Beings Michael Brian Schiffer, 2002-01-22 In this ground-breaking work, the distinguished anthropological theorist, Michael Brian Schiffer, presents a profound challenge to the social sciences. Through a broad range of examples, he demonstrates how theories of behaviour and communication have too often ignored the fundamental importance of objects in human life. In *The Material Life of Human Beings*, the author builds upon the premise that the most important feature of human life is not language but the relationships which take place between people and objects. The author shows that artifacts are involved in all modes of human communication - be they visual, auditory or tactile. By creatively folding elements of postmodernist thought into a scientific framework, he creates new concepts and models for understanding and analysing communication and behavior. Challenging established theories within the social sciences, Michael Brian Schiffer offers a reassessment of the centrality of materiality to everyday life.

The French Revolution, 1789-1815 Shailer Mathews, 1923

The Psychology of Fake News Rainer Greifeneder, Mariela Jaffe, Eryn Newman, Norbert Schwarz, 2020-08-13 This volume examines the phenomenon of fake news by bringing together leading experts from different fields within psychology and related areas, and explores what has become a prominent feature of public discourse since the first Brexit referendum and the 2016 US election campaign. Dealing with misinformation is important in many areas of daily life, including politics, the marketplace, health communication, journalism, education, and science. In a general climate where facts and misinformation blur, and are intentionally blurred, this book asks what determines whether people accept and share (mis)information, and what can be done to counter misinformation? All three of these aspects need to be understood in the context of online social networks, which have fundamentally changed the way information is produced, consumed, and transmitted. The contributions within this volume summarize the most up-to-date empirical findings, theories, and applications and discuss cutting-edge ideas and future directions of interventions to counter fake news. Also providing guidance on how to handle misinformation in an age of “alternative facts”, this is a fascinating and vital reading for students and academics in psychology, communication, and political science and for professionals including policy makers and journalists.
