How Not To Start A Backpack Company Jason McCarthy, 2020-09-09 Business, war, love and a world traveling chocolate lab named Java all converge on a 10,000 mile road trip taken by a former Green Beret trying to build something meaningful in America - but not yet knowing how to do it. Great businesses don't always have great starts. In the summer of 2010, Green Beret Jason McCarthy was going through a divorce, separating from the military, and struggling with money issues. He used his new company GORUCK as an excuse to drive to all lower 48 states with his dog Java, to meet people and get into adventures, while searching for how to rebuild in America. *How Not To Start A Backpack Company* is about losing your way, losing the love of your life, and finding your way back to both - the hard way. It's an intimate and raw look at the personal struggles that almost killed GORUCK long before it became a \$100 million company. And above all, it's a story of the importance of chasing your dreams with everything you got, no matter the cost. Direct from Jason: In between years at Georgetown's McDonough School of Business, I decided not to pursue a traditional internship path. Instead, I drove around the country to all 48 contiguous states with my dog Java to pursue what was little more than a hobby at the time: GORUCK. I lost a bunch of money, didn't sell any backpacks, and everyone else who came with me left, but I had a great front row seat to watch my life burn down before my very eyes. The silver lining was that this trip became instrumental in turning things around because I was motivated to not live in flames. This is not a traditional business or entrepreneurship book. There are a lot of pictures of the early days, a few pages from the original business plan (that I threw away), a journal I kept along the road that I never published, email exchanges with my then almost ex-wife, and some cautionary tales ... hell, it's almost one enormous cautionary tale. But above all I hope my story inspires others to NOT wait for the perfect time to follow their dreams, but just to get going and figure it out on the move. -JJM

From Rucksack to Backpack Juliane Heyman, 2004-05-07 *From Rucksack to Backpack* is composed of recollections of Juliane Heyman's travels, adventures and life from the 1940s to 1960s. She describes her experiences as a Western woman in newly independent India. In 1952 she drove with two young Swiss men through Afghanistan, Iran, Turkey and the former

Yugoslavia to Italy. Her stories from Vietnam in 1957 deal with her job as library advisor to the country. Later Heyman worked in Pakistan and El Salvador and visited Peace Corps volunteers in Nepal. The emphasis is on a woman's perspective, but historical, political and social conditions at the time are intertwined in the memoir.

Everyone to Skis! William D. Frank, 2013-10-31 Nowhere in the world was the sport of biathlon, a combination of cross-country skiing and rifle marksmanship, taken more seriously than in the Soviet Union, and no other nation garnered greater success at international venues. From the introduction of modern biathlon in 1958 to the USSR's demise in 1991, athletes representing the Soviet Union won almost half of all possible medals awarded in world championship and Olympic competition. Yet more than sheer technical skill created Soviet superiority in biathlon. The sport embodied the Soviet Union's culture, educational system and historical experience and provided the perfect ideological platform to promote the state's socialist viewpoint and military might, imbuing the sport with a Cold War sensibility that transcended the government's primary quest for post-war success at the Olympics. William D. Frank's book is the first comprehensive analysis of how the Soviet government interpreted the sport of skiing as a cultural, ideological, political and social tool throughout the course of seven decades. In the beginning, the Soviet Union owned biathlon, and so the stories of both the state and the event are inseparable. Through the author's unique perspective on biathlon as a former nationally-ranked competitor and current professor of Soviet history, *Everyone to Skis!* will appeal to students and scholars of Russian and Soviet history as well as to general readers with an interest in skiing and the development of twentieth-century sport.

A Guide to Small-Scale Energy Harvesting Techniques Reccab Manyala, 2020-01-22 The use of energy it is argued started about two million years ago when humans started cooking their food using firewood. As humans developed new skills with increased activities, energy interaction and usage emerged. Energy was used not only for domestic functions but also for space applications. With industrialization, humans realized that energy was needed to move machines and do other things as well. In this quest, and without understanding the consequences of using fossil fuels extensively, many problems arose. Researchers in energy embarked on a journey to study different forms of energy. To understand different needs, researchers have tried to come up with ways in which small-scale energy harvesting can be adapted to different needs that do not require heavy-duty energy production. This book attempts to present a number of ideas regarding a few selected small-scale energy

harvesting methods and techniques as well as theories and products that may be helpful in improving the quality of life. Some of the new products are still in the prototype stage, while others are already being utilized. Many researchers in small-scale energy harvesting and those aspiring to follow this path of research will find this book not only motivating but also a useful guide in their endeavors.
