Art of the Handbag Clare Anthony, 2013-11-06 I find that it is vital to have at least one handbag for each of the ten types of social occasions. Miss Piggy /div Most women would agree with Miss Piggy and even those who didn't would think one bag for all occasions isn't really enough. Ever since the reticule came into style after the French Revolution, women have been attached to their handbags. And whether you're a woman of leisure who wants a tiny bag to carry a lipstick, comb, and mirror or a working woman who needs a satchel to hold your cell phone, e-reader, laptop, water bottle, makeup, lunch, and whatever else you need in the course of a long day, you're sure to be enchanted by the variety of bags featured in this lavishly illustrated book. A wonderful range of bags is presented--from Judith Leiber's sculpted, crystal-studded metal "minaudière" to James Piatt's "Peacekeeper" handbag with its knuckleduster handle, from Lulu Guinness's red snakeskin "Lips" clutch to Hester van Eeghen's elegant "Monocle" bag, from Kathleen Dustin's exquisite "Rose Bud" wrist purse to Ina's Figaredo's retro "Telephone" shoulder bag. It's a showcase gallery of 25 contemporary handbag designers, and it features over 100 artful creations. The crazy beautiful bags in this book provide perfect accents for every wardrobe./div

The Chinese Aspectual System Hongzhi Xu, 2021-07-22 This book presents a theoretical study on aspect in Chinese, including both situation and viewpoint aspects. Unlike previous studies, which have largely classified linguistic units into different situation types, this study defines a set of ontological event types that are conceptually universal and on the basis of

which different languages employ various linguistic devices to describe such events. To do so, it focuses on a particular component of events, namely the viewpoint aspect. It includes and discusses a wealth of examples to show how such ontological events are realized in Chinese. In addition, the study discusses how Chinese modal verbs and adverbs affect the distribution of viewpoint aspects associated with certain situation types. In turn, the book demonstrates how the proposed linguistic theory can be used in a computational context. Simply identifying events in terms of the verbs and their arguments is insufficient for real situations such as understanding the factivity and the logical/temporal relations between events. The proposed framework offers the possibility of analyzing events in Chinese text, yielding deep semantic information.

Marine Anthropogenic Litter Melanie Bergmann, Lars Gutow, Michael Klages, 2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.
