**Society and the Internet** Mark Graham,William H. Dutton,2019-07-18 How is society being reshaped by the continued diffusion and increasing centrality of the Internet in everyday life and work? Society and the Internet provides key readings for students, scholars, and those interested in understanding the interactions of the Internet and society. This multidisciplinary collection of theoretically and empirically anchored chapters addresses the big questions about one of the most significant technological transformations of this century, through a diversity of data, methods, theories, and approaches. Drawing from a range of disciplinary perspectives, Internet research can address core questions about equality, voice, knowledge, participation, and power. By learning from the past and continuing to look toward the future, it can provide a better understanding of what the ever-changing configurations of technology and society mean, both for the everyday life of individuals and for the continued development of society at large. This second edition presents new and original contributions examining the escalating concerns around social media, disinformation, big data, and privacy. Following a foreword by Manuel Castells, the editors introduce some of the key issues in Internet Studies. The chapters then offer the latest research in five focused sections: The Internet in Everyday Life; Digital Rights and Human Rights; Networked Ideas, Politics, and Governance; Networked Businesses, Industries, and Economics; and Technological and Regulatory Histories and Futures. This book will be a valuable resource not only for students and researchers, but for anyone seeking a critical examination of the economic, social, and political factors shaping the Internet and its impact on society.

**Principles of Gender-specific Medicine** Marianne J. Legato, John P. Bilezikian, 2004 Principles of Gender-Specific Medicine examines how normal human biology differs between men and women and how the diagnosis and treatment of disease differs as a function of gender. This revealing research covers various conditions that predominantly occur in men, and as well conditions that predominantly occur in women. Among the subjects covered are cardiovascular disease, mood disorders, the immune system, lung cancer as a consequence of smoking, osteoporosis, diabetes, obesity, and infectious diseases. \* Gathers important information in the field of gender-based biology and clinical medicine, proving that a patient's sex is increasingly important in preventing illness, making an accurate diagnosis, and choosing safe and effective treatment of disease \* Addresses gender-specific areas ranging from organ transplantation, gall bladder and biliary diseases, to the epidemiology of osteoporosis and fractures in men and women \* Many chapters present questions about future directions of investigations

**Hobohemia and the Crucifixion Machine** Todd McCallum, 2014-12-28 In the early years of the Great Depression, thousands of unemployed homeless transients settled into Vancouver's "hobo jungle." The jungle operated as a distinct community, in which goods were exchanged and shared directly, without benefit of currency. The organization of life was immediate and consensual, conducted in the absence of capital accumulation. But as the transients moved from the jungles to the city, they made innumerable demands on Vancouver's Relief Department, consuming financial resources at a rate that

threatened the city with bankruptcy. In response, the municipality instituted a card-control system—no longer offering relief recipients currency to do with as they chose. It also implemented new investigative and assessment procedures, including office spies, to weed out organizational inefficiencies. McCallum argues that, threatened by this “ungovernable society,” Vancouver’s Relief Department employed Fordist management methods that ultimately stripped the transients of their individuality. Vancouver’s municipal government entered into contractual relationships with dozens of private businesses, tendering bids for meals in much the same fashion as for printing jobs and construction projects. As a result, entrepreneurs clamoured to get their share of the state spending. With the emergence of work relief camps, the provincial government harnessed the only currency that homeless men possessed: their muscle. This new form of unfree labour aided the province in developing its tourist driven “image” economy, as well as facilitating the transportation of natural resources and manufactured goods. It also led eventually to the most significant protest movement of 1930s’ Canada, the On-to-Ottawa Trek. Hobohemia and the Crucifixion Machine explores the connections between the history of transiency and that of Fordism, offering a new interpretation of the economic and political crises that wracked Canada in the early years of the Great Depression.

**Revolution of the Modern Sports Fan** Kenon A. Brown, Andrew C. Billings, Melvin Lewis, 2021-08-18 From the advent of social media to the rise of fantasy sport to the increased media platforms in which to consume sport, the sports fan has never had more options for consumption—and for the rendering of one’s opinions. As such, Revolution of the Modern Sports Fan offers an opportunity to advance what we now know about American sports fandom.

**Humans Are Underrated** Geoff Colvin, 2016-10-11 It's easy to imagine a nightmare scenario in which computers simply take over most of the tasks that people now get paid to do. The unavoidable question—will millions of people lose out, unable

to best the machine?—is increasingly dominating business, education, economics, and policy. The bestselling author of *Talent Is Overrated* explains how the skills and economy values are changing in historic ways and offers a guide to what's next for all workers. Mastering technical skills that have historically been in demand no longer differentiates us as it used to. Instead, our greatest advantage lies in our deepest, most essentially human abilities—empathy, creativity, social sensitivity, storytelling, humor, relationship building, and expressing ourselves with greater power than logic can ever achieve. These high-value skills create tremendous competitive advantage—more devoted customers, stronger cultures, breakthrough ideas, and more effective teams. And while many of us regard these abilities as innate traits, it turns out they can all be developed. As Colvin shows, they're already being developed in a range of farsighted organizations, including the Cleveland Clinic, the U.S. Army, and Stanford Business School.

*Folens GCSE P.E.* Julie Walmsley, 2003 Bright and lively textbook written specifically for the AQA GCSE P.E. Specification 'A' course, with the aim of helping lower achieving students (Grade C/D and below) obtain a better grasp of each P.E. topic and improve their examination performance.

**Cumulated Index Medicus**, 2000

*The Terror of the Machine* Devon G. Peña, 1997-04-15 Born of thirteen years of field research, this interdisciplinary work explores the complex intersections of technology, class, gender, and ecology in the transnational milieu of Mexico's maquiladoras, foreign-owned assembly plants located along the U.S. border. Devon Peña examines workplace and community struggles from the perspective of the women who work in the maquiladoras. He describes the workers' struggles for workplace democracy, social justice, and sustainable development. He also observes the circulation of struggle from the factory to the community, highlighting the efforts to establish worker-owned cooperatives in the border region during the 1970s and 1980s. Female maquila workers are typically portrayed as passive, apolitical, and easily exploited. This book, however, presents an opposing view, investigating the subaltern life of the shop floor—the workers' informal methods of resistance to hazardous conditions, sexual harassment, and managerial tyranny. Using survey research, oral history, discourse analysis, and site ethnography, the author develops a cogent critique of labor-process theory, a critique grounded on his extensive study of actual workplace politics in the maquiladoras. *The Terror of the Machine* is a trenchant analysis of the political, cultural, and environmental effects of maquila industrialization and an eloquent and persuasive call for alternatives in the direction of ecologically sustainable and culturally appropriate modes of development.

**Occupational Physiology** Allan Toomingas, Svend Erik Mathiassen, Ewa Wigaeus Tornqvist, 2011-12-20 In a clear and accessible presentation, *Occupational Physiology* focuses on important issues in the modern working world. Exploring major public health problems—such as musculoskeletal disorders and stress—this book explains connections between work, well-being, and health based on up-to-date research in the field. It provides useful methods for risk assessment and guidelines on

arranging a good working life from the perspective of the working individual, the company, and society as a whole. The book focuses on common, stressful situations in different professions. Reviewing bodily demands and reactions in eight selected common, but contrasting job types, the book explains relevant physiology in a novel way. Rather than being structured according to organs in the body, the book accepts the complex physiology of typical jobs and uses this as an entry. In addition to physiological facts, the book discusses risk factors for disorders and gives ideas on how to organize and design work and tasks so as to optimize health, work ability, and productivity. Although many books cover physiology, they are based on a traditional anatomical structure (e.g., addressing the physiology of the cardiovascular system, the gastrointestinal system, and so forth) and require readers to synthesize this knowledge into real-life complex applications. Occupational Physiology is, instead, structured around a number of typical jobs and explains their physiologies, as complex as they may be. This approach, while still presenting the physiology needed to understand occupational life, demonstrates how to use this information in situations encountered in practice.
