Handbook on the Economics of Women in Sports Michael Leeds, Eva Marikova Leeds, 2013-01-01 'In the Handbook on the Economics of Women in Sports, Leeds and Leeds put together an impressive list of heavy hitters in the sociology and economics literature on sports to produce a tour de force volume. The entire spectrum of international perspectives is covered, from US, Korean, and Australian sports to world competition at the highest level of the Olympics and international championships. Whether your interest is attendance at women's events, performance and rewards in women's pro sports, gender issues in US college sports, or international performance and how women compete, this handbook is a must read for any serious fan, and for all serious scholars interested in the impacts of being female on sports performance and competitiveness.' Rodney Fort, University of Michigan, US 'Leeds and Leeds have filled a gaping hole in sports economics with this revealing collection of essays. The economics of women in sports has been too long neglected. By covering everything from women as sports spectators, to women as participants in individual and team sports at the collegiate and professional levels, to women's sports internationally, Title IX, and women's differential response to incentives, this volume not only demonstrates that there is much fertile ground to be studied, but also that the subject matter is both interesting and

important.' Andrew Zimbalist, Smith College, US Women's sports have received much less attention from economists than from other social scientists. This Handbook fills that gap with a comprehensive economic analysis of women's sports. It also analyzes how the behavior and treatment of female athletes reflect broad economic forces. Contributors to this volume use current theoretical models and econometric tools to examine the legal, social, and economic forces that affect the experiences of female athletes. They address such traditional topics as discrimination against female athletes and coaches and the effect of athletic events on the economies of host countries. They also apply theory and estimation to new settings, such as how women respond to tournaments in skiing and figure skating or how the growing dominance of Korean women on the LPGA tour is a form of immigration. This groundbreaking book is a valuable resource for professors, students, and researchers in sports economics, sports management, and women's studies.

Principles of Gender-specific Medicine Marianne J. Legato, John P. Bilezikian, 2004 Principles of Gender-Specific Medicine examines how normal human biology differs between men and women and how the diagnosis and treatment of disease differs as a function of gender. This revealing research covers various conditions that predominantly occur in men, and as well conditions that predominantly occur in women. Among the subjects covered are cardiovascular disease, mood disorders, the immune system, lung cancer as a consequence of smoking, osteoporosis, diabetes, obesity, and infectious diseases. * Gathers important information in the field of gender-based biology and clinical medicine, proving that a patient's sex is increasingly important in preventing illness, making an accurate diagnosis, and choosing safe and effective treatment of disease * Addresses gender-specific areas ranging from organ transplantation, gall bladder and biliary diseases, to the epidemiology of osteoporosis and fractures in men and women * Many chapters present questions about future directions of investigations

In Pursuit of an African Green Revolution Keijiro Otsuka,Donald F. Larson,2015-11-24 This book explores recent experiences in the effort to bring about a Green Revolution in Sub-Saharan Africa (SSA). The chapters focus on rice and maize, which are promising and strategic smallholder crops. Significantly, we find that an African Rice Revolution has already begun in many irrigated areas, using Asian-type modern varieties, chemical fertilizer, and improved management practices. Further, we find that the same technological package significantly increases the productivity and profitability of rice farming in rainfed areas as well. We also find evidence that that management training, when done well, can boost productivity on smallholder farms. This suggests that African governments can accelerate the pace of Africa's Rice Revolution by strengthening extension capacity. The story for maize is wholly different, where most farmers use local varieties, apply little chemical fertilizer, and obtain very low yields. However, in the highly populated highlands of Kenya, a number of farmers have adopted high-yielding hybrid maize varieties and chemical fertilizer, as was the case in the Asian Green Revolution, apply manure produced by stall-fed cows, as was the case during the British Agricultural Revolution, and keep improved cows or cross-breeds from European cows and local stock, as was the case of the Indian White Revolution. We conclude that while rice in Africa has benefited from an Asian Green Revolution strategy that emphasizes modern seeds, inputs, and focused knowledge transfers, the success of Africa's Maize Revolution will require a different system approach based on hybrid maize, chemical and organic fertilizers, and stall-fed cross-bred cows.

Oxenbridge,2013-04-15 Based on the primary analysis of the 2004 Workplace Employment Relations Survey (WERS 2004), this is the fifth book in the series which began in 1980, and which is considered to be one of the most authoritative sources of information on employment relations in Great Britain. Interviews were conducted with managers and employee representatives in over 3,000 workplaces, and over 20,000 employees returned a self-completion questionnaire. This survey links the views from these three parties, providing a truly integrated picture of employment relations. This book provides a descriptive mapping of employment relations, examining the principal features of the structures, practices and outcomes of workplace employment relations. The reader can explore differences according to the characteristics of the workplace and organization, including workplace size, industrial sector and ownership. Current debates are examined in detail, including an assessment of the impact of the Labour Government's programme of employment relations reform. A key reference from a respected and important institution, this book is a valuable 'sourcebook' for students, academics and practitioners in the fields of employee relations, human resource management, organizational behaviour and sociology. Real Heat Carol A. Chetkovich,1997 In the struggle over affirmative action, no employment setting has seen more friction than urban fire departments. Thirty years of legal and political efforts have opened the doors of this historically white male preserve, but men of color have yet to consolidate their gains, and women's progress has been even more tenuous. In this unique and compelling account of affirmative action at the street level, Carol Chetkovich explores the ways in which this program has succeeded and failed. Chetkovich follows the men and women of the Oakland Fire Department Class 1-91 through their academy training and eighteen-month probation. In vivid and sometimes surprising narratives, newcomers tell of their first battle with a full-fledged fire, their reactions to hazing rituals, and their relationships with veterans and fellow trainees. *Real Heat* explores how the process of becoming a firefighter interacts with the dimensions of race and gender to support some and discourage others. The book examines the implications of these interactions for public policy and social justice.

Porth's Pathophysiology Sheila Grossman,2013-08-13 Featuring brilliant art, engaging new case studies, and dynamic new teaching and learning resources, this 9th edition of Porth's Pathophysiology: Concepts of Altered Health States is captivating, accessible, and student-friendly while retaining the comprehensive, nursing-focused coverage that has made it a

market leader. The book's unique emphasis on "concepts of altered health states, as opposed to factual descriptions of diseases and disorders, helps students grasp both the physical and psychological aspects of altered health. Drawing on the expertise of new co-author Sheila Grossman, the Ninth Edition maintains its comprehensive depth, while paring down content where appropriate and replacing descriptive content with striking art. (Approximately 600 illustrations are new or have been re-rendered in a consistent modern style.) Also new to this edition are advanced 3D narrated animations that address the most clinically relevant and difficult to understand disorders, engaging unit-opening case studies that reinforce critical thinking and set the tone for the content to come, and a wide range of built-in study tools. Now, for the first time, Porth's Pathophysiology is supported by PrepU, an adaptive learning system that help students learn more, while giving instructors the data they need to monitor each student's progress, strengths, and weaknesses.

Working With The Under Threes: Training And Professional Development Abbott, Lesley, Moylett, Helen, 1997-12-01 In order to do justice to the range of issues surrounding the care and education of the under threes and to meet the many and varied needs of the adults who work with them two books have been written under the title Early Interactions. The books incorporate the views of a wide range of people with a wealth of experience in the early years field as both practitioners and trainers. They are intended as an accessible, informative and challenging resource for all those involved in the care and education of children under three. Multiprofessional and interdisciplinary team work is essential in working with young children and their families and as the Rumbold Report (1990) emphasises - no one person will possess all the knowledge and skills required for this important responsibility. The books provide a range of perspectives and will appeal equally to professionals, parents and anyone who cares about young children. They are particularly valuable as a resource for use in training at all levels. The training and support needs of Early Years workers is a key issue and provides a focus for debate in the present educational climate. Working with under threes carries a particular responsibility. The contributors to this book represent a wide range of experience and involvement as practitioners and trainers which they share in interesting and accessible chapters. The book is intended for all those responsible for, or training to work with, children under three on a variety of courses. Topics covered include - New approaches to training, continuing professional development, equal opportunities, working with parents and carers, men working with under threes, special educational needs, child protection, and the inspection process. Key issues are identified for consideration by all those working with young children.
