Providing a novel approach to business policy and strategic management, this book focuses on the implementation of a firm's competitive strategy throughout all levels of the organization.

Afrikakorps 1941-43 Gordon Williamson,2012-06-20 The campaign in North Africa between September 1940 and May 1943 holds not only an enduring fascination for postwar generations; but also a perhaps unique degree of nostalgia for some surviving participants. The campaign was no less costly in terms of human lives and material than many others; but regret at the cost is accompanied by positive memories in the minds of many veterans. This is not to suggest that the dead have been forgotten; but an almost mystical bond nevertheless exists, even between former enemies, amongst veterans of the desert campaign. Gordon Williamson examines the history, organisation and uniforms of Rommel's Afrikakorps.

Materials and Process Selection for Engineering Design, Third Edition Mahmoud M. Farag,2013-11-19

Introducing a new engineering product or changing an existing model involves making designs, reaching economic decisions, selecting materials, choosing manufacturing processes, and assessing its environmental impact. These activities are interdependent and should not be performed in isolation from each other. This is because the materials and processes used in making the product can have a large influence on its design, cost, and performance in service. Since the publication of the second edition of this book, changes have occurred in the fields of materials and manufacturing. Industries now place more emphasis on manufacturing products and goods locally, rather than outsourcing. Nanostructured and smart materials appear more frequently in products, composites are used in designing essential parts of civilian airliners, and biodegradable materials are increasingly used instead of traditional plastics. More emphasis is now placed on how products affect the environment, and society is willing to accept more expensive but eco-friendly goods. In addition, there has been a change in the emphasis and the way the subjects of materials and manufacturing are taught within a variety of curricula and courses in higher education. This third edition of the bestselling Materials and Process Selection for Engineering Design has been comprehensively revised and reorganized to reflect these changes. In addition, the presentation has been enhanced and the book includes more real-world case studies.

The Power Source Lauren Roxburgh,2019-05-14 Celebrity trainer and goop expert Lauren Roxburgh's program that uses pelvic floor strength to release stress, fortify the body, and treat the physical and mental origins of tension. Chances are your body feels some form of stress every day, whether it's inflammation, bloating, tension, discomfort, anxiety, or pain during sex. We're constantly distracted by ailments we can't quite seem to fix. Body alignment expert Lauren Roxburgh believes that all of these problems can be solved by first unlocking the foundation of your mental and physical health: the pelvic floor. Located at the root of our pelvis, it determines how firm our core is, how we handle stress, and how much energy reaches the rest of our body. Without addressing the health of our pelvic floor, we are all missing out on a powerful key

component of our overall physical, emotional, and spiritual health. Roxburgh presents an entirely new approach to building well-being--one based on a strong pelvic floor, open energy channels, and a clear mind. The Power Source offers a deep understanding of how to cultivate this strength by following a holistic, multisensory program. Starting with the pelvic floor, Roxburgh focuses on the five power centers that can be harnessed throughout the body: The pelvic floor The deep core The upper core The heart and shoulders The head, neck, and jaw With targeted exercises to encourage healing movement, nourishing recipes--from a Confidence-Boosting Tonic to Root-Rejuvenating Bone Broth--and holistic therapies that include visualizations, aromatherapy, and more, Roxburgh gives a full toolbox to realign your body and your life.

Tanks of Hitler's Eastern Allies 1941-45 Steven J. Zaloga,2013-04-20 The titanic armor battles of the Russian Front are widely known, but the role of Germany's eastern allies is not as well known. Two of these countries, Romania and Hungary, manufactured their own tanks as well as purchasing tanks from Germany. These ranged from older, obsolete types such as the PzKpfw 35(t) all the way up to the latest and best German vehicles including the Tiger I and Hetzer. These tanks played a frequent role in the battles in southern Russia and Ukraine and were especially prominent in the disaster at Stalingrad where the Red Army specifically chose the weaker Romanian and Hungarian salients for their critical envelopment operation. This New Vanguard will provide a broad survey of the various and colorful tanks used. Besides covering the largest of these Axis tank forces, this book will cover the many smaller and lesser known forces including the Italian contingent in Russia, the Finnish armored force, and the small but interesting armored forces of the Russian Vlasov (RONA), Croatian, Bulgarian and Slovakian armies. This subject is seeing increasing interest in the modeling world; for example Tamiya recently announced a PzKpfw 35 (t) (suitable for Romanian, Slovak armies) a Finnish StuG III, and a Finnish BT-42.
