**Productive failure** Alpesh Kantilal Patel, 2017-07-21 This title sets out to write new transnational South Asian art histories - to make visible histories of artworks that remain marginalised within the discipline of art history. However, this is done through a deliberate 'productive failure' - specifically, by not upholding the strictly genealogical approach that is regularly assumed for South Asian art histories. For instance, one chapter explores the abstract work of Cy Twombly and Natvar Bhavsar. The author examines 'whiteness', the invisible ground upon which racialized art histories often pivot, as a fraught yet productive site for writing art history. This book also provides original commentary on how queer theory can deconstruct and provide new approaches for writing art history. Overall, this title provides methods for generating art history that acknowledge the complex web of factors within which art history is produced and the different forms of knowledge-production we might count as art history.

**TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019)** U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

*Dark Matters* Simone Browne, 2015-09-17 In *Dark Matters* Simone Browne locates the conditions of blackness as a key site through which surveillance is practiced, narrated, and resisted. She shows how contemporary surveillance technologies and practices are informed by the long history of racial formation and by the methods of policing black life under slavery, such as branding, runaway slave notices, and lantern laws. Placing surveillance studies into conversation with the archive of transatlantic slavery and its afterlife, Browne draws from black feminist theory, sociology, and cultural studies to analyze texts as diverse as the methods of surveilling blackness she discusses: from the design of the eighteenth-century slave ship *Brooks*, Jeremy Bentham's Panopticon, and *The Book of Negroes*, to contemporary art, literature, biometrics, and post-9/11 airport security practices. Surveillance, Browne asserts, is both a discursive and material practice that reifies boundaries, borders, and bodies around racial lines, so much so that the surveillance of blackness has long been, and continues to be, a social and political norm.

Using R for Introductory Statistics John Verzani,2018-10-03 The second edition of a bestselling textbook, *Using R for Introductory Statistics* guides students through the basics of R, helping them overcome the sometimes steep learning curve. The author does this by breaking the material down into small, task-oriented steps. The second edition maintains the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version. See *What's New in the Second Edition*: Increased emphasis on more idiomatic R provides a grounding in the functionality of base R. Discussions of the use of RStudio helps new R users avoid as many pitfalls as possible. Use of knitr package makes code easier to read and therefore easier to reason about. Additional information on computer-intensive approaches motivates the traditional approach. Updated examples and data make the information current and topical. The book has an accompanying package, *UsingR*, available from CRAN, R's repository of user-contributed packages. The package contains the data sets mentioned in the text (`data(package=UsingR)`), answers to selected problems (`answers()`), a few demonstrations (`demo()`), the errata (`errata()`), and sample code from the text. The topics of this text line up closely with traditional teaching progression; however, the book also highlights computer-intensive approaches to motivate the more traditional approach. The authors emphasize realistic data and examples and rely on visualization techniques to gather insight. They introduce statistics and R seamlessly, giving students the tools they need to use R and the information they need to navigate the sometimes complex world of statistical computing.

Faces at the Bottom of the Well Derrick Bell,2018-10-30 The groundbreaking, eerily prophetic, almost haunting work on American racism and the struggle for racial justice (Michelle Alexander, author of *The New Jim Crow*). In *Faces at the Bottom of the Well*, civil rights activist and legal scholar Derrick Bell uses allegory and historical example—including the classic story *The Space Traders*—to argue that racism is an integral and permanent part of American society. African American struggles for equality are doomed to fail, he writes, so long as the majority of whites do not see their own well-being threatened by the status quo. Bell calls on African Americans to face up to this unhappy truth and abandon a misplaced faith in inevitable progress. Only then will blacks, and those whites who join with them, be in a position to create viable strategies to alleviate the burdens of racism. Now with a new foreword by Michelle Alexander, author of *The New Jim Crow*, this classic book was a pioneering contribution to critical race theory scholarship, and it remains urgent and essential reading on the problem of racism in America.
