**The Places Where Community Is Practiced** Anna Steigemann, 2019-02-25 In this open access publication, the social cohesion of urban neighborhoods and their residents is examined, which is often viewed as vulnerable since increased mobility, individualization, wider socio-economic and demographic changes have fundamentally altered the basis for everyday social interaction in urban neighborhoods. Anna Steigemann gives scholarly attention to the concrete places where neighborly interactions still take place and to how these interactions affect local community building. She illuminates and explores the ordinary everyday interactions and social practices in and around shops and gastronomic facilities on a shopping street in Berlin-Neukölln, revealing how these businesses are important places where community is practiced, but also why they are increasingly threatened by commercial and residential gentrification.

**Western Diseases** Norman J. Temple, Denis P. Burkitt, 2012-12-06 Sir Richard Doll, FRS, FRCP ICRF Cancer Research Studies Unit Radcliffe Infirmary, Oxford, UK The twentieth century has seen few changes more remarkable than the improvement in health that has occurred nearly everywhere, most spectacularly in the economically developed countries. In these countries improved nutrition, better housing, the control of infection, smaller family sizes, and higher standards of education have brought about a situation in which more than 97% of all liveborn children can expect to survive the first half of the three score years and ten that formerly was regarded as the allotted span of life. From then on, however, the position is less satisfactory. Some improvement has occurred; but the proportion of survivors who die prematurely, that is under 70 years of age, varies from 25% to over 50% in men and from 13% to 28% in women, the extremes in both sexes being recorded, respectively, in Japan and Hungary. Most of these deaths under 70 years of age must now be called premature, even in Japan. For most of them are not the result of any inevitable aging process, but instead are the consequences of diseases (or types of trauma) that have lower-often much lower-age-specific incidence rates in many of the least developed countries.

RAF Wings over Florida Will Largent, 2020-08-01 From 1941 through 1945, British cadets in the Royal Air Force trained in the United States through the Lend-Lease Act, President Roosevelt's ingenious plan to help beleaguered Great Britain while maintaining the semblance of neutrality. This book tells the saga of two Florida training fields during this turbulent time. In their own words, British pilots tell of their Florida experiences. Many of them still in their late teens, away from

home for the first time, pale and thin from years of rationing, these young men encountered immense challenges and overwhelming generosity during their training in Florida. Now retired, these former pilots still smell the scent of orange blossoms when they glance through the log books they kept while flying their Stearmans and Harvards over Florida citrus groves. They fondly remember the times when they buzzed over the homes of their Florida “families” to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress.

**Technological Slavery (Large Print 16pt)** Theodore J. Kaczynski, David Skrbina, 2011-02 Theodore Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious "Unabomber Manifesto," Kaczynski's critique of anarcho-primitivism, and essays regarding "the Coming Revolution."

The empirical base of linguistics Carson T. Schütze, 2015-12-24 Throughout much of the history of linguistics, grammaticality judgments - intuitions about the well-formedness of sentences - have constituted most of the empirical base against which theoretical hypotheses have been tested. Although such judgments often rest on subtle intuitions, there is no systematic methodology for eliciting them, and their apparent instability and unreliability have led many to conclude that they should be abandoned as a source of data. Carson T. Schütze presents here a detailed critical overview of the vast literature on the nature and utility of grammaticality judgments and other linguistic intuitions, and the ways they have been used in linguistic research. He shows how variation in the judgment process can arise from factors such as biological, cognitive, and social differences among subjects, the particular elicitation method used, and extraneous features of the materials being judged. He then assesses the status of judgments as reliable indicators of a speaker's grammar. Integrating substantive and methodological findings, Schütze proposes a model in which grammaticality judgments result from interaction of linguistic competence with general cognitive processes. He argues that this model provides the underpinning for empirical arguments to show that once extragrammatical variance is factored out, universal grammar succumbs to a simpler, more elegant analysis than judgment data initially lead us to expect. Finally, Schütze offers numerous practical suggestions on how to collect better and more useful data. The result is a work of vital importance that will be required reading for linguists, cognitive psychologists, and philosophers of language alike.

**Shaping Sustainable Fashion** Alison Gwilt, Timo Rissanen, 2012-06-25 The production, use and eventual disposal of

most clothing is environmentally damaging, and many fashion and textile designers are becoming keen to employ more sustainable strategies in their work. This book provides a practical guide to the ways in which designers are creating fashion with less waste and greater durability. Based on the results of extensive research into lifecycle approaches to sustainable fashion, the book is divided into four sections: source: explores the motivations for the selection of materials for fashion garments and suggests that garments can be made from materials that also assist in the management of textile waste make: discusses the differing approaches to the design and manufacture of sustainable fashion garments that can also provide the opportunity for waste control and minimization use: explores schemes that encourage the consumer to engage in slow fashion consumption last: examines alternative solutions to the predictable fate of most garments – landfill. Illustrated throughout with case studies of best practice from international designers and fashion labels and written in a practical, accessible style, this is a must-have guide for fashion and textile designers and students in their areas.

*Transforming the Character of Public Organizations* A. Carol Rusaw, 1998-01-26 From her own experience in various agencies and organizations, Dr. Rusaw knows that to inspire change in any organization and particularly in the public sector, change agents must understand that change is primarily collective, nonrational, and nonlinear. People who seek to create change cannot stand apart from the problems, issues, and concerns raised by their constituents, but must merge themselves into the data-making, analysis, and diagnosis phases of consulting. The agent must, in other words, participate actively in creating change—and how the agent must do this, why, and the effects the agent can expect are the subjects of Dr. Rusaw's book. Few books discuss public sector change in the way Dr. Rusaw does here, and none incorporate the phenomenological perspective that she uses. Her book will appeal to practicing public administrators who seek real-life examples presented in conversational language. It will also be important for teachers and students in public administration, specifically in courses in organizational behavior, leadership, organization theory, human relations, and public personnel management. Not only can

change agents help public employees serve the purposes set out for them more effectively and efficiently, but by service and other efforts they can also help reverse the downward trend that has characterized the public sector in recent years. Dr. Rusaw maintains that such change is made possible by personal transformation, certainly, but also by interpersonal transformations. By focusing on individual and group needs as keys to organizational change, change agents can facilitate what is most needed: not just localized alterations but widespread, holistic transformations. Her book looks at the role of healing—particularly, the inherent skills of listening, empathizing, and encouraging—and at the ways in which people can confront and solve problems in negotiated environments. She also sees that central to re-education and re-socialization is the quality of the change agent's inner person: how well the agent is able to understand the role of self in the change process. Her book provides ways in which agents can inspire others to change too. In other words, Dr. Rusaw sees organizational change as a process moving from the inside to the outside, and it is on this foundation that her unusual, thoughtful, and ultimately practical book is based.

*Temperament (PLE: Emotion)* Arnold H. Buss, Robert Plomin, 2014-11-20 Originally published in 1984, this title looks at the development of temperament in early life. At the time of publication there were three major perspectives on temperament: paediatrics, individual differences in infants, and inherited personality traits that appear in early life. Whatever the diversity of these perspectives, they converge on personality traits that develop early in life, hence the title of this book. The authors start by looking at the main research in this field, then go on to discuss their own approach to temperament, building on their original theory from 1975.

*The Establishment of National Republics in Soviet Central Asia* A. Haugen, 2003-10-16 After almost four centuries of expansion the Russian Empire at the beginning of the 20th century covered vast territories on the Eurasian continent and included an immensely diverse population. How was the new Russian regime to deal with the complexity of its population? This book examines the role of nation and nationality in the Soviet Union and analyzes the establishment of national republics in Soviet Central Asia. It argues that the originally nationally minded Soviet communists with their anti-nationalist attitudes came to view nation and national identity as valuable tools in state building.

*The Memorial Book for the Jewish Community of Yurburg, Lithuania* Joel Alpert, 2003 This is the English translation of the Memorial or Yizkor Book of the Jewish Community of Yurburg, Lithuania, originally published in 1991 in Hebrew and Yiddish. It also has an additional new 150-page appendix containing new material collected since the publication of the original book. Contains many new photographs to enhance the original book.

Rethinking Educational Practice Through Reflexive Inquiry Nicole Mockler, Judyth Sachs, 2011-04-13 Susan Groundwater-Smith is one of the most influential voices in the world of educational practitioner inquiry. The convener in Australia of the

Coalition of Knowledge Building Schools, she is a staunch advocate of innovative methods of practitioner inquiry with a particular emphasis upon student voice and the use of images in capturing young people's perspectives on their learning experience. So it is more than fitting that this unique text on practitioner inquiry and teacher professional learning is dedicated to her. *Rethinking Education Practice Through Reflexive Inquiry* is a compilation of essays that explore contemporary issues in practitioner inquiry and action research from the perspective of both university-based and school-based authors. The essays discuss the practical, political and theoretical dimensions of practitioner inquiry, advancing the argument that the adoption of an inquiring approach to practice is both an integral dimension of teachers' work in the modern school as well as critical to effective and authentic professional learning. And the essays draw on the work of Groundwater-Smith to demonstrate the benefits brought to bear on schools, teachers and learners when the complex nature of the relationship between inquiry and practice is understood and acted upon in pursuit of democratic knowledge interests.

**Fluency in Reading** Zvia Breznitz, 2006-08-15 This is the first book to examine in-depth the crucial role of the speed of information processing in the brain in determining reading fluency in both normal and dyslexic readers. Part I explains fluency in reading from both traditional and modern perspectives. Fluency has historically been viewed as the outcome of other reading-related factors and has often been seen as a convenient measure of reading skills. This book, however, argues that fluency has a strong impact on other aspects of reading and plays a central role in the entire reading process. Part II deals with the determinants of reading fluency. Chief among these is the speed of information processing in the brain. Using both behavioral and electrophysiological evidence, the book systematically examines the features of processing speed in the various brain systems involved in reading: visual-orthographic, auditory-phonological, and semantic and shows how speed of processing affects fluency in reading. Part III deals with the complex issues of cross-modal integration and specifically with the need for effective synchronization of the brain processes involved in reading. It puts forward the Synchronization Hypothesis and discusses the role of the Asynchrony Phenomenon as a major factor in dyslexia. Finally, it summarizes research on manipulating reading rate by means of the Acceleration method, providing evidence for a possible intervention aimed at reducing Asynchrony. Key features of this outstanding new book include: \*Expanded View of Fluency. Reading fluency is seen as both a dependent and an independent Variable. Currently available books focus on reading rate solely as the outcome of other factors whereas this volume stresses that it is both an outcome and a cause. \*Information Processing Focus. Fluency itself is determined to a large extent by a more general factor, namely, speed of processing in the brain. The book presents wide-ranging evidence for individual differences in speed of processing across many subpopulations. \*Brain Synchronization Focus. The book posits a new theory arguing that effective reading requires synchronization of the different brain systems: visual orthographic, auditory-phonological, and semantic. \*Research-Based Interventions. Interventions to enhance fluency and, thereby, reading skills in general are presented in detail. \*Author Expertise. Zvia Breznitz is Head of

the Department of Learning Disabilities and Director of the Laboratory for Neurocognitive Research at Haifa University in Israel, where she has been researching this topic for over a decade. This book is appropriate for researchers and advanced students in reading, dyslexia, learning disabilities, cognitive psychology, and neuropsychology.

*The International Astronomical Union* Johannes Andersen, David Baneke, Claus Madsen, 2019-02-20 The International Astronomical Union (IAU) was founded in 1919, in the wake of the First World War, together with its sister Unions in related natural sciences. It will thus turn 100 years in 2019. Written by a mixed team of insiders and outsiders, this book presents the IAU in the changing context of the historical, scientific and technological development of astronomy during the past 100 years. While much important scientific progress took place already before 1945, the book naturally focuses on the accelerating evolution during the second half of the century. In the past few decades, the previously narrow IAU focus on organising professional astronomy has broadened to include societally relevant activities such as addressing the hazard of asteroid impacts, the planetary status of Pluto in the Solar System, and the hugely successful International Year of Astronomy. Most recently, it is spearheading a combination of science literacy and public outreach. The book will be of interest to professional astronomers as well as an astronomically interested general audience. The book features live personal interviews with as many of the key actors as still possible.

**Aspects of Metaphor** Jaakko Hintikka, 2013-03-09 Metaphor is one of the most frequently evoked but at the same time most poorly understood concepts in philosophy and literary theory. In recent years, several interesting approaches to metaphor have been presented or outlined. In this volume, authors of some of the most important new approaches re-present their views or illustrate them by means of applications, thus allowing the reader to survey some of the prominent ongoing developments in this field. These authors include Robert Fogelin, Susan Haack, Jaakko Hintikka (with Gabriel Sandu), Bipin Indurkha and Eva Kittay (with Eric Steinhardt). Their stance is in the main constructive rather than critical; but frequent comparisons of different views further facilitate the reader's overview. In the other contributions, metaphor is related to the problems of visual representation (Noël Carroll), to the open class test (Avishai Margalit and Naomi Goldblum) as well as to Wittgenstein's idea of 'a way of life' (E.M. Zemach).

**Saving Face in Business** Rebecca S. Merkin, 2017-09-14 This book explains the subtle maneuvers of what researchers call "facework" and demonstrates the vital role it plays in the success or failure of cross-cultural interactions. Building on Geert Hofstede's seminal research on cultural dimensions, Merkin synthesizes more recent research in business, communication, cross-cultural psychology and sociology to offer a model for better understanding facework. Additionally, Merkin's model shows how particular communication strategies can facilitate more successful cross-cultural interactions.

The first book of its kind to focus on the practical aspects of employing face-saving, it is a needed text for academics, students, and business professionals negotiating with organizations from different cultures.
