Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Transformable Race Katy L. Chiles, 2014-02 Focusing on writers such as Phillis Wheatley, Benjamin Franklin, Samson Occum, Charles Brockden Brown, and others, *Transformable Race* tells the story of how early Americans imagined, contributed to, and challenged the ways that one's racial identity could be formed in the time of the nation's founding.

Icelanders in the Viking Age William R. Short, 2010-03-01 The Sagas of Icelanders are enduring stories from Viking-age Iceland filled with love and romance, battles and feuds, tragedy and comedy. Yet these tales are little read today, even by lovers of literature. The culture and history of the people depicted in the Sagas are often unfamiliar to the modern reader, though the audience for whom the tales were intended would have had an intimate understanding of the material. This text introduces the modern reader to the daily lives and material culture of the Vikings. Topics covered include religion, housing, social customs, the settlement of disputes, and the early history of Iceland. Issues of dispute among scholars, such as the nature of settlement and the division of land, are addressed in the text.

Islam and Blackness Jonathan A.C. Brown, 2022-11-03 It is commonly claimed that Islam is antiblack, even inherently bent on enslaving Black Africans. Western and African critics alike have contended that antiblack racism is in the faith's very scriptural foundations and its traditions of law, spirituality, and theology. But what is the basis for this accusation? Bestselling scholar Jonathan A.C. Brown examines Islamic scripture, law, Sufism, and history to comprehensively interrogate this claim and determine how and why it emerged. Locating its origins in conservative politics, modern Afrocentrism, and the old trope of Barbary enslavement, he explains how antiblackness arose in the Islamic world and became entangled with normative tradition. From the imagery of 'blackened faces' in the Quran to Shariah assessments of Black women as 'undesirable' and the assertion that Islam and Muslims are foreign to Africa, this work provides an in-depth study of the controversial knot that is Islam and Blackness, and identifies authoritative voices in Islam's past that are crucial for combatting antiblack racism today.

Unnatural Selection Katrina van Grouw, 2018-07-31 A lavishly illustrated look at how evolution plays out in selective breeding Unnatural Selection is a stunningly illustrated book about selective breeding--the ongoing transformation of animals at the hand of man. More important, it's a book about selective breeding on a far, far grander scale—a scale that encompasses all life on Earth. We'd call it evolution. A unique fusion of art, science, and history, this book celebrates the 150th anniversary of Charles Darwin's monumental work *The Variation of Animals and Plants under Domestication*, and is intended as a tribute to what Darwin might have achieved had he possessed that elusive missing piece to the evolutionary puzzle—the knowledge of how individual traits are passed from one generation to the next. With the benefit of a century and a half of hindsight, Katrina van Grouw explains evolution by building on the analogy that Darwin himself used—comparing the selective breeding process with natural selection in the wild, and, like Darwin, featuring a multitude of fascinating examples. This is more than just a book about pets and livestock, however. The revelation of Unnatural Selection is that identical traits can occur in all animals, wild and domesticated, and both are governed by the same evolutionary principles. As van Grouw shows, animals are plastic things, constantly changing. In wild animals the changes are usually too slow to see—species appear to stay the same. When it comes to domesticated animals, however, change happens fast, making them the perfect model of evolution in action. Suitable for the lay reader and student, as well as the more seasoned biologist, and

featuring more than four hundred breathtaking illustrations of living animals, skeletons, and historical specimens, *Unnatural Selection* will be enjoyed by anyone with an interest in natural history and the history of evolutionary thinking.

How to Avoid a Climate Disaster Bill Gates,2021-02-16 #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays

out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

A Sourcebook of Nasca Ceramic Iconography Donald A. Proulx,2009-08 For almost eight hundred years (100 BC–AD 650) Nasca artists modeled and painted the plants, animals, birds, and fish of their homeland on Peru's south coast as well as numerous abstract anthropomorphic creatures whose form and meaning are sometimes incomprehensible today. In this first book-length treatment of Nasca ceramic iconography to appear in English, drawing upon an archive of more than eight thousand Nasca vessels from over 150 public and private collections, Donald Proulx systematically describes the major artistic motifs of this stunning polychrome pottery, interprets the major themes displayed on this pottery, and then uses these descriptions and his stimulating interpretations to analyze Nasca society. After beginning with an overview of Nasca culture and an explanation of the style and chronology of Nasca pottery, Proulx moves to the heart of his book: a detailed classification and description of the entire range of supernatural and secular themes in Nasca iconography along with a fresh and distinctive interpretation of these themes. Linking the pots and their iconography to the archaeologically known Nasca society, he ends with a thorough and accessible examination of this ancient culture viewed through the lens of ceramic iconography. Although these static images can never be fully understood, by animating their themes and meanings Proulx reconstructs the lifeways of this complex society.
