Understanding Alice McDermott Margaret Hallissy,2020-01-27 Alice McDermott—winner of the National Book Award, American Book Award, and Whiting Award, and three-time finalist for the Pulitzer Prize—recently published her eighth novel, *The Ninth Hour*, to great critical and popular acclaim. Her previous books, including *Charming Billy*, *At Weddings and Wakes*, and *That Night*, have been lauded as crowning achievements of Irish American fiction. An Irish American Catholic born and raised in New York, McDermott uses multiple identities and a distinctive, nonchronological narrative style to create an unmistakable trademark. She currently serves as the Richard A. Macksey Professor of the Humanities at Johns Hopkins University. *Understanding Alice McDermott* begins with a brief biography and transitions into a linear inquiry of McDermott's published works. In addition to interrogating her recurring motifs of memory and heritage, Margaret Hallissy tracks various themes that appear throughout the novels—religion, generational trauma, geography, family, motherhood, and displacement—topics that intertwine and inform the mentality of McDermott's characters. This volume deftly leads the reader through each of McDermott's novels, seeking connections and facilitating conversations among her earliest and most recent works. Hallissy demonstrates a deep critical understanding of intersections in McDermott's canon. Her characters in some ways are beleaguered by society's perception of them—uneducated, lower-middle-class immigrants or children of

immigrants—but are also positively defined by their collective dream of a lost homeland and the shared hardship of motherhood. By tracing the shifting themes and motifs through eight novels, uncollected short stories, and essays published during McDermott's fruitful career, *Understanding Alice McDermott* provides a window into the decades-long development of a contemporary master.

Surfing Uncertainty Andy Clark, 2016 This title brings together work on embodiment, action, and the predictive mind. At the core is the vision of human minds as prediction machines - devices that constantly try to stay one step ahead of the breaking waves of sensory stimulation, by actively predicting the incoming flow. In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage. The book shows in detail how this strange but potent strategy of self-anticipation ushers perception, understanding, and imagination simultaneously onto the cognitive stage.
