Greville G. Corbett

The Expression of Gender Greville G. Corbett, 2013-12-12 Gender is a fascinating category, which has grown steadily in importance across the humanities and social sciences. The book centres on the core of the category within language. Each of the seven contributions provides an independent account of a key part of the topic, ranging from gender and sex, gender and culture, to typology, dialect variation and psycholinguistics. The authors pay attention to a broad range of languages, including English, Chukchi, Konso and Mohawk.

Gender Shifts in the History of English Anne Curzan, 2003-04-24 How and why did grammatical gender, found in Old English and in other Germanic languages, gradually disappear from English and get replaced by a system where the gender of nouns and the use of personal pronouns depend on the natural gender of the referent? How is this shift related to 'irregular agreement' (such as she for ships) and 'sexist' language use (such as generic he) in Modern English, and how is the language continuing to evolve in these respects? Anne Curzan's accessibly written and carefully researched study is based on extensive corpus data, and will make a major contribution by providing a historical perspective on these often controversial questions. It will be of interest to researchers and students in history of English, historical linguistics, corpus linguistics, language and gender, and medieval studies.

Gender, Sexuality, and Meaning Sally McConnell-Ginet, 2011-02-15 This volume offers a representative selection of Sally McConnell-Ginet's publications on language, gender and sexuality, which circle around the following themes: language users are actively engaged in making meanings, both as speakers and listeners; languages and socio-political institutions constrain, but do not determine, communicative possibilities; attention to language deepens understanding of gender and sexuality, including connections to ethnicity, class, race, and other dimensions of social identity and inequality.

Gender Greville G. Corbett, 1991-04-26 Surveys gender across a range of languages. For class use and as a reference resource for students and researchers in linguistics.

Queerly Phrased Anna Livia, Kira Hall, 1997 A pioneering collection of articles on lesbian, gay, bisexual, and transsexual language.

Ethnolinguistics Madeleine Mathiot, 2019-07-08 CONTRIBUTIONS TO THE SOCIOLOGY OF LANGUAGE brings to students, researchers and practitioners in all of the social and language-related sciences carefully selected book-length

publications dealing with sociolinguistic theory, methods, findings and applications. It approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Towards a Standard English Dieter Stein, Ingrid Tieken-Boon van Ostade, 2012-10-25 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses, and above all fresh approaches that contribute to the overall aim of the series, which is to further outstanding research in English linguistics.

Sexing the Body Anne Fausto-Sterling, 2020-06-30 Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

Language in Mind Dedre Gentner, Susan Goldin-Meadow, 2003-03-14 The idea that the language we speak influences the way we think has evoked perennial fascination and intense controversy. According to the strong version of this hypothesis, called the Sapir-Whorf hypothesis after the American linguists who propounded it, languages vary in their semantic partitioning of the world, and the structure of one's language influences how one understands the world. Thus speakers of different languages perceive the world differently. Although the last two decades have been marked by extreme skepticism concerning the possible effects of language on thought, recent theoretical and methodological advances in cognitive science have given the question new life. Research in linguistics and linguistic anthropology has revealed striking differences in cross-linguistic semantic patterns, and cognitive psychology has developed subtle techniques for studying how people represent and remember experience. It is now possible to test predictions about how a given language influences the thinking of its speakers. *Language in Mind* includes contributions from both skeptics and believers and from a range of fields. It contains work in cognitive psychology, cognitive development, linguistics, anthropology, and animal cognition. The topics discussed include space, number, motion, gender, theory of mind, thematic roles, and the ontological distinction between

objects and substances. Contributors Melissa Bowerman, Eve Clark, Jill de Villiers, Peter de Villiers, Giyoo Hatano, Stan Kuczaj, Barbara Landau, Stephen Levinson, John Lucy, Barbara Malt, Dan Slobin, Steven Sloman, Elizabeth Spelke, and Michael Tomasello

Language and Sexuality Deborah Cameron, Don Kulick, 2003-03-06 This lively and accessible textbook provides a clear introduction to the relationship between language and sexuality.

Pronoun Envy Anna Livia, 2001 Controversy over gendered pronouns, for example using the generic he, has been a staple of feminist arguments about patriarchal language over the last 30 years, and is certainly the most contested political issue in Western feminist linguistics. Most accounts do not extend beyond policy issues like the official institution of non-sexist language. In this volume, Anna Livia reveals continuities both before and after the sexist language reform movement and shows how the creative practices of pronoun use on the part of feminist writers had both aesthetic and political ends. Livia uses the term pronoun envy ironically to show that rather being a case of misguided envy, battles over gendered language are central to feminist concerns. Livia examines a broad corpus of written texts in English and French, concentrating on those texts which problematize the traditional functioning of the linguistic gender system. They range from novels and prose poems to film scripts and personal testimonies, and in time from the 19th century to the present. Some withhold any indication of gender; others have non-gendered characters. Livia's goal is two-fold; to help bridge the divide between linguistic and literary analysis, and to show how careful study of the manipulation of linguistic gender in these texts informs larger concerns. This fresh and highly interdisciplinary work lies at the intersection of several vital areas, including language and gender, sociolinguistics, and feminist literary analysis.

Cognition and Categorization Eleanor Rosch, Barbara B Lloyd, 2023-12 Originally published in 1978, the papers in this book derive from a 1976 meeting sponsored by the Social Science Research Council to discuss the nature and principles of category formation. It is organized in three sections: real-world categories, the cognitive processes underlying categorization, and the nature of representation. Part I examines different structural aspects of real-world categories: folk biological taxonomies, within and between category structures for material objects, and some categories in a language that codes the world in a visual-gestural mode. All three chapters in Part I assume category processors who are able to perform at least three cognitive functions: They can judge similarity between stimuli; they can perceive and process the attributes of a stimulus; and they can learn. Part II presents analyses of these three cognitive functions. All discussion of psychological structures and processes lead eventually to the issue of representation, and Part III examines representational assumptions underlying the earlier discussions. Today it can be read and enjoyed in its historical context.

The Awful German Language Mark Twain, 1880-05-15 "The Awful German Language" is a humorous examination of the German language and the frustrations a native English speaker may have when learning it. The essay was published as

Appendix D of “A Tramp Abroad” by Mark Twain in 1880.
