*COVID-19, Technology and Marketing* Vanessa Ratten,Park Thaichon,2021-07-10 This book addresses how Covid-19 has damaged businesses and how businesses can adapt to the new normal. In doing so, the book contributes to theories associated with the marketing management, by assessing opportunities and challenges associated with the implementation of technology and marketing management during and post Covid-19. Although there is increasing research in consumer or business management acceptance of new technologies and digital marketing, the impact of these on marketing management during the Covid-19 are not adequately investigated, leading to overstated hypothetical predictions of its future potential. Chapters in the book therefore focus on new economic models such as sharing economy and business structures such as omnichannel, where advancements have enabled firms to build a one-on-one relationship with customers by collecting, storing, aggregating and analysing customer information across various touchpoints. Contributions in the book also focus on new technologies such as blockchain, automation solution, information technology management, and customer relationship management (CRM) in highlighting connections between these new technologies and marketing management. The book will be useful for anyone aiming to gain a better understanding of the current and future technologies that may play a role or have a robust impact on marketing management during Covid-19.

Anticipating Criminal Behaviour Peter A. M. G. Kock, Peter de Kock, 2014 In the first decade of this century, the focus of law-enforcement agencies has shifted from prosecuting crime to anticipating crime. This approach emphasizes the discovery of narratives in crime-related data. However, while narratives are at the mainstay of entertainment, law, and politics, a scientific method by which narratives can be created - and subsequently be used to anticipate criminal behavior - still has to be established. In the creative industry, a narrative is generated by a scenario. A scenario describes the interactions between the characters and includes information - about behavior, goals, motivations, *modi operandi*, and resistances - that have to be overcome. Furthermore, a creative scenario is composed by a limited number of scenario components. In this book, a new and innovative scenario model is designed by which narratives in data can be detected. It introduces the ESC12 - the twelve Elementary Scenario Components - by which every conceivable narrative can be created. Moreover, the book introduces the ESC12 scenario model, a model that may support law enforcement agencies to effectively anticipate criminal behavior. The book's author, Peter A.M.G. de Kock, graduated as a filmmaker from the Film Academy of the Amsterdam School of the Arts in 1994, and has traveled all over the world as a professional photographer, cameraman, and film-director. In 2009, after receiving a Master degree in Criminal Investigation, he introduced creative scenarios to anticipate (terrorist) attacks. The operational results of his team were thought provoking, and he was invited to demonstrate his method of operation to prominent members of Dutch Parliament and the Ministry of Security and Justice. He was then offered the opportunity to pursue the use of scenarios to anticipate crime, as an external Ph.D. student at Tilburg University. This book is the result of his study. China's Belt and Road Vision S. Mahmud Ali, 2020-01-23 This book examines the evolution and major elements of China's Belt-and-Road Initiative (BRI), a trillion-dollar project for the revival and refinement of ancient terrestrial and maritime trade routes. The author analyses the foreign policy and economic strategy behind the initiative as well as the geoeconomic and geopolitical impact on the region. Furthermore, he assesses whether the BRI has to be considered as a challenge to the US-led order, leading to a Sinocentric order in the 21st century. Offering two case studies on the China-Pakistan Economic Corridor (CPEC) and the 21st Century Maritime Silk Road (MSR), the book reveals the drivers motivating China and its partners in executing BRI projects, such as security of commodity-shipments, energy supplies, and explores trade volumes as well as the anxiety these trigger among critics. The book juxtaposes these to non-Chinese, specifically multilateral institutional and Western corporate, inputs into Beijing's developmental planning-processes. It also identifies the role of combined Chinese-foreign stimuli in generating the policy priorities precipitating the BRI vision, and the geoeconomic essence of BRI's implementation.

**Cat Sense** John Bradshaw, 2013-09-10 Cats have been popular household pets for thousands of years, and their numbers only continue to rise. Today there are three cats for every dog on the planet, and yet cats remain more mysterious, even to their most adoring owners. Unlike dogs, cats evolved as solitary hunters, and, while many have learned to live alongside humans and even feel affection for us, they still don't quite "get us" the way dogs do, and perhaps they never will. But cats have rich emotional lives that we need to respect and understand if they are to thrive in our company. In *Cat Sense*, renowned anthrozoologist John Bradshaw takes us further into the mind of the domestic cat than ever before, using cutting-edge scientific research to dispel the myths and explain the true nature of our feline friends. Tracing the cat's evolution from lone predator to domesticated companion, Bradshaw shows that although cats and humans have been living together for at least eight thousand years, cats remain independent, predatory, and wary of contact with their own kind, qualities that often clash with our modern lifestyles. Cats still have three out of four paws firmly planted in the wild, and within only a few generations can easily revert back to the independent way of life that was the exclusive preserve of their predecessors some 10,000 years ago. Cats are astonishingly flexible, and given the right environment they can adapt to a life of domesticity with their owners—but to continue to do so, they will increasingly need our help. If we're to live in harmony with our cats, Bradshaw explains, we first need to understand their inherited quirks: understanding their body language, keeping their environments—however small—sufficiently interesting, and becoming more proactive in managing both their natural hunting

instincts and their relationships with other cats. A must-read for any cat lover, *Cat Sense* offers humane, penetrating insights about the domestic cat that challenge our most basic assumptions and promise to dramatically improve our pets' lives—and ours.

Histories of the Devil Jeremy Tambling, 2017-02-07 This book is about representations of the devil in English and European literature. Tracing the fascination in literature, philosophy, and theology with the irreducible presence of what may be called evil, or comedy, or the carnivalesque, this book surveys the parts played by the devil in the texts derived from the Faustus legend, looks at Marlowe and Shakespeare, Rabelais, Milton, Blake, Hoffmann, Baudelaire, Goethe, Dostoevsky, Bulgakov, and Mann, historically, speculatively, and from the standpoint of critical theory. It asks: Is there a single meaning to be assigned to the idea of the diabolical? What value lies in thinking diabolically? Is it still the definition of a good poet to be of the devil's party, as Blake argued?
