G Thomas

The Cat in Ancient Egypt Jaromír Málek, 2006 Cats in Egypt were probably domesticated by around 4000 BC from wild ancestors. Over the following centuries, they became popular household pets and are regularly shown in tomb paintings of family life. This volume draws on artistic and written sources to show how they became widely-esteemed and revered animals in Egypt.

The Two-Family House Lynda Cohen Loigman, 2016-03-08 A moving and evocative debut set in a two-family brownstone in 1950s Brooklyn, unraveling a multigenerational story woven around a deeply buried family secret.

Canine and Feline Gastroenterology - E-Book Robert J. Washabau, Michael J. Day, 2012-09-02 A comprehensive reference standard for the discipline, Canine and Feline Gastroenterology covers the biology, pathobiology, and diagnosis and treatment of diseases of the gastrointestinal, pancreatic, and hepatobiliary systems. An international team of experts, including 85 authors from 17 different countries, led by Robert Washabau and Michael Day, covers everything from minor problems such as adverse food reactions to debilitating inflammatory, infectious, metabolic, and neoplastic diseases of the digestive system. This authoritative text utilizes an evidence-based approach to reflect the latest science and research, complemented by principles of problem solving, algorithms to improve clinical diagnoses, and extensive full-color illustrations. For generalists and specialists alike, this gastroenterology reference should be part of every serious practitioner's professional library. A comprehensive, 928-page reference standard covers the discipline of canine and feline gastroenterology. An international focus is provided by 85 authors from 17 different countries, including renowned experts in veterinary gastroenterology, internal medicine, pathology, clinical pathology, radiology, and infectious disease. Coverage of the entire breadth and depth of gastroenterology ranges from biology to pathobiology, as well as diagnosis and treatment of diseases of the gastrointestinal, pancreatic, and hepatobiliary systems. Current information on GI microflora, immunology, cellular growth, and systems integration provides a foundation for treating clinical problems. Coverage of diseases in dogs and cats includes the oral cavity, esophagus, stomach, small intestine, large intestine, colon, anorectum, liver and biliary tract, exocrine pancreas, peritoneum, and associated vasculature. A focus on patient management examines the full range of procedures and techniques essential to diagnosis and treatment from clinical signs and diagnosis to nutritional support and pharmacologic management of disease. Clear explanations of current diagnostic modalities include laboratory tests,

molecular methods, diagnostic imaging, endoscopy, and histopathology, also showing how to interpret and utilize results. A strong clinical approach emphasizes need-to-know information for managing the common and not-so-common G.I. clinical problems of everyday practice. Full-color photographs and illustrations depict concepts, conditions, and procedures. An evidence-based medicine perspective reflects the latest research as well as the modern practice of veterinary medicine. Logical, coherent, and consistent internal organization makes this a reader-friendly edition. Problem-based algorithms help in diagnosing every G.I. clinical problem from A to Z. A stand-alone section on the pharmacologic approach to G.I. disease offers quick and easy drug reference.

The State of Open Data Davies, Tim, Walker, Stephen B., Rubinstein, Mor, 2019-05-22 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

The Municipal and Sanitary Engineer's Handbook Henry Percy Boulnois, 1898

Nordic Research on Text and Discourse Ann-Charlotte Lindeberg, 1992 Papers presented at the 1990 Symposium of the Nordic Research Group for Theoretical and Applied Text Linguistics include the following: Success Concepts (Enkvist); Reconciling the Psychological with the Linguistic in Accounts of Text Comprehension (Garrod); Particles as Fundaments of Discourse Structuring (Fernandez-Vest); Macrostructure in Conversation (Backlund); Lexis in Discourse (Nyyssonen); The Notion of Coercion in Courtroom Questioning (Bulow-Moller); Message Structure in LSP Texts: A Socially Determined Variation at Different Text Levels (Gunnarsson); Main Worlds and Supplements (Melanders); Identity Relations and Superthemes in Swedish LSP Texts (Naslund); Conflicts and Changes in Textual Norms (Berge); Sign, Language, and Ritual: Contrastive Discourse Analysis of East German and Soviet TV News (Pankow); News Discourse: The Paratextual Structure of News Texts (Frandsen); Polyphonic Structure (Flottum); Articulation of Relational Propositions: A Tool for Identifying an Aspect of Text Comprehension (Tirkkonen-Condit); Temporal Adverbials in Text Structuring: On Temporal Text Strategy (Virtanen); Diversifying Procedural Discourse (Wikberg); A Sense of Relief: Backgrounding in Argumentative Student Writing (Evensen); Text and Reference (Ventola); Reference in Academic Rhetoric: A Contrastive Study of Finnish and English

Writing (Mauranen); Some Aspects of the Pragmatic Organization of Academic Discourse (Suomela-Salmi); Composing on the Computer: A Study of Work Habits on the Job (Wikborg); and The Use of Idea Processors' for Studying Structural Aspects of Text Production (Eklundh). (JP)

Electronics Sensors for the Evil Genius: 54 Electrifying Projects Thomas Petruzzellis, 2006-01-20 54 super-entertaining projects offer insights into the sights, sounds, and smells of nature Nature meets the Evil Genius via 54 fun, safe, and inexpensive projects that allow you to explore the fascinating and often mysterious world of natural phenomena using your own home-built sensors. Each project includes a list of materials, sources for parts, schematics, and lots of clear, well-illustrated instructions. Projects include: rain detector, air pressure sensor, cloud chamber, lightning detector, electronic gas sniffer, seismograph, radiation detector, and more

Protein Power Michael R. Eades, Mary Dan Eades, 2009-10-21 Join the thousands who have experienced dramatic weight loss, lowered cholesterol, and improvement or reversal of the damages of heart disease, adult-onset diabetes, and other major diseases by following this medically proven program. Protein Power will teach you how to use food as a tool for • Dramatic and permanent weight loss • Resetting your metabolism and boosting your energy levels • Lowering your “bad” cholesterol levels while elevating the “good” • Protecting yourself from “The Deadly Diseases of Civilization” (including high blood pressure and heart disease) And best of all, Protein Power encourages you to • Eat the foods you love, including meats (even steaks, bacon, and burgers), cheeses, and eggs • Rethink the current wisdom on fat intake (science has shown that fat does not make you fat!) • Stop shocking your body with breads, pastas, and other fat-inducing carbohydrates So prepare yourself for the most dramatic life-enhancing diet program available!

Anticipating Criminal Behaviour Peter A. M. G. Kock, Peter de Kock, 2014 In the first decade of this century, the focus of law-enforcement agencies has shifted from prosecuting crime to anticipating crime. This approach emphasizes the discovery of narratives in crime-related data. However, while narratives are at the mainstay of entertainment, law, and politics, a scientific method by which narratives can be created - and subsequently be used to anticipate criminal behavior - still has to be established. In the creative industry, a narrative is generated by a scenario. A scenario describes the interactions between the characters and includes information - about behavior, goals, motivations, *modi operandi*, and resistances - that have to be overcome. Furthermore, a creative scenario is composed by a limited number of scenario components. In this book, a new and innovative scenario model is designed by which narratives in data can be detected. It introduces the ESC12 - the twelve Elementary Scenario Components - by which every conceivable narrative can be created. Moreover, the book introduces the ESC12 scenario model, a model that may support law enforcement agencies to effectively anticipate criminal behavior. The book's author, Peter A.M.G. de Kock, graduated as a filmmaker from the Film Academy of the Amsterdam School of the Arts in 1994, and has traveled all over the world as a professional photographer, cameraman, and film-director. In 2009, after

receiving a Master degree in Criminal Investigation, he introduced creative scenarios to anticipate (terrorist) attacks. The operational results of his team were thought provoking, and he was invited to demonstrate his method of operation to prominent members of Dutch Parliament and the Ministry of Security and Justice. He was then offered the opportunity to pursue the use of scenarios to anticipate crime, as an external Ph.D. student at Tilburg University. This book is the result of his study. [Subject: Criminology, Policing]

Health Technology Assessment and Health Policy Today: A Multifaceted View of their Unstable Crossroads Juan E. del Llano-Señarís, Carlos Campillo-Artero, 2015-01-08 This book disentangles the issues in connection with the advancement of Health Technology Assessment (HTA) and its interface with health policy. It highlights the factors that should shape its progress in the near future. Interdisciplinary and critical views from a number of professionals are put together in a prescient order to cast some light and make recommendations as to the next steps HTA should take to be fit for purpose. A wealth of documents dealing with HTA have been published over the last three decades. HTA allegedly is one of the bedrocks of regulation and medical decision making. However, counter vailing visions contend that geographical variations in the role that HTA is actually playing within countries pinpoints specific room for improvement. Given our social preferences, cherry-picking HTA's features and successes over the last decades moves it away from its possibility frontier. Some of the most noteworthy hindrances that HTA faces, in several countries, to making headway towards its consolidation as an efficient tool for regulation and decision making are as follows: insufficient resources, delays in assessment, inadequate priority setting, regulatory capture, public distrust, actual influence on regulatory decisions, the need for strengthening international cooperation and harmony, the lack of sound and consistent assessments of diagnostic tests, medical devices and surgical innovations and limited dissemination. Time has come for HTA to take a renewed stand. There is a pressing need to submit HTA to in-depth critical scrutiny.

Portraits of Edo and Early Modern Japan Gerald Groemer, 2019-05-28 This volume presents a series of five portraits of Edo, the central region of urban space today known as Tokyo, from the great fire of 1657 to the devastating earthquake of 1855. This book endeavors to allow Edo, or at least some of the voices that constituted Edo, to do most of the speaking. These voices become audible in the work of five Japanese eye-witness observers, who notated what they saw, heard, felt, tasted, experienced, and remembered. "An Eastern Stirrup," presents a vivid portrait of the great conflagration of 1657 that nearly wiped out the city. "Tales of Long Long Ago," details seventeenth-century warrior-class ways as depicted by a particularly conservative samurai. "The River of Time," describes the city and its flourishing cultural and economic development during the late eighteenth and early nineteenth centuries. "The Spider's Reel" looks back at both the attainments and calamities of Edo in the 1780s. Finally, "Disaster Days," offers a meticulous account of Edo life among the ruins of the catastrophic 1855 tremor. Read in sequence, these five pieces offer a unique "insider's perspective" on the city of Edo and early modern Japan.

Anticoagulant Rodenticides and Wildlife Nico W. van den Brink, John E. Elliott, Richard F. Shore, Barnett A.

Rattner, 2017-11-09 Commensal rodents pose health risks and cause substantial damage to property and food supplies. Rats have also invaded islands and pose a serious threat to native wildlife, particularly raptors and seabirds. Estimates of total damage from introduced rats range into the billions of dollars in developed countries. This book aims to provide a state-of-the-art overview of the scientific advancements in the assessment of exposure, effects and risks that currently used rodenticides may pose to non-target organisms in the environment, along with practical guidance for characterization of hazards. This will be discussed in relation to their efficacy, and the societal needs for rodent control, and discussion of risk mitigation and development of alternatives. The flow in the book is planned as: a. introduction and setting the scene b. problem description (risks and effects on non-targets and secondary poisoning, development of resistance) c. ; alternatives, regulation and risk mitigation d. conclusions and recommendations

Lives of the Prophets Mohamad Reza Ghiasian, 2018-08-13 In *Lives of the Prophets* Mohamad Reza Ghiasian analyses the images of the two extant illustrated copies of Hafiz-i Abru's *Majma' al-tawarikh*, which were produced for the Timurid ruler Shahrukh (r. 1405-1447).

Montreal Museum of Fine Arts, Collection of Mediterranean Antiquities, Vol. 3, The Metal Objects and the Gems Beaudoin Caron, John M. Fossey, 2018-11-26 This third out of eight projected volumes making available to the public the contents in the collection of Greek and Roman Antiquities in one of Canada's most prestigious museums. It presents metal objects both figurative and non-figurative, jewelry and gems.

Ideology and Status of Sanskrit, 2023-07-31 The present volume is the outcome of a seminar on the Ideology and Status of Sanskrit held in Leiden under the auspices of the International Institute for Asian Studies. The book contains studies of crucial periods and important areas in the history of the Sanskrit language, from the earliest, Vedic and pre-Vedic periods, through the period in which the (restricted) use of Sanskrit spread over practically all of South (including part of Central) and Southeast Asia (sometimes referred to as the period of Greater India), up to the recent history of Sanskrit in India. The contributions of this volume are divided into three sections: (1) Origins and Creation of the Eternal Language; (2) Transculturation, Vernacularization, Sanskritization; (3) The Sanskrit Tradition: Continuity from the past or Construction from the present?

Cyber-Humans Woodrow Barfield, 2015-12-17 It is predicted that robots will surpass human intelligence within the next fifty years. The ever increasing speed of advances in technology and neuroscience, coupled with the creation of super computers and enhanced body parts and artificial limbs, is paving the way for a merger of both human and machine. Devices which were once worn on the body are now being implanted into the body, and as a result, a class of true cyborgs, who are displaying a range of skills beyond those of normal humans-beings, are being created. There are cyborgs which can see

colour by hearing sound, others have the ability to detect magnetic fields, some are equipped with telephoto lenses to aid their vision or implanted computers to monitor their heart, and some use thought to communicate with a computer or to manipulate a robotic arm. This is not science-fiction, these are developments that are really happening now, and will continue to develop in the future. However, a range of legal and policy questions has arisen alongside this rise of artificial intelligence. *Cyber-Humans* provides a deep and unique perspective on the technological future of humanity, and describes how law and policy will be particularly relevant in creating a fair and equal society and protecting the liberties of different life forms which will emerge in the 21st century. Dr Woodrow (Woody) Barfield previously headed up the Sensory Engineering Laboratory, holding the position of Industrial and Systems Engineering Professor at the University of Washington. His research revolves around the design and use of wearable computers and augmented reality systems and holds both JD and LLM degrees in intellectual property law and policy. He has published over 350 articles and major presentations in the areas of computer science, engineering and law. He currently lives in Chapel Hill, NC, USA.

Ancient Graffiti in Context Jennifer Baird, Claire Taylor, 2010-10-18 Graffiti are ubiquitous within the ancient world, but remain underexploited as a form of archaeological or historical evidence. They include a great variety of texts and images written or drawn inside and outside buildings, in public and private places, on monuments in the city, on objects used in daily life, and on mountains in the countryside. In each case they can be seen as actively engaging with their environment in a variety of ways. *Ancient Graffiti in Context* interrogates this cultural phenomenon and by doing so, brings it into the mainstream of ancient history and archaeology. Focusing on different approaches to and interpretations of graffiti from a variety of sites and chronological contexts, Baird and Taylor pose a series of questions not previously asked of this evidence, such as: What are graffiti, and how can we interpret them? In what ways, and with whom, do graffiti communicate? To what extent do graffiti represent or subvert the cultural values of the society in which they occur? By comparing themes across time and space, and viewing graffiti in context, this book provides a series of interpretative strategies for scholars and students of the ancient world. As such it will be essential reading for Classical archaeologists and historians alike.

The Three Paths of Justice Neil Andrews, 2011-09-28 This book presents a concise account of the English system of civil litigation, covering court proceedings in England and Wales. It is an original and important study of a system which is the historical root of the US litigation system. The volume offers a comprehensive and properly balanced account of the entire range of dispute resolution techniques. As the first book on this subject to be published in the USA, it enables American lawyers to gain an overview of the main institutions of English Civil Procedure, including mediation and arbitration. It will render the English system of civil justice accessible to law students in the US, practitioners of law, professors, judges, and policy-makers.

The Black Cat Edgar Allan Poe, 2024-01-29 Edgar Allan Poe's *The Black Cat* is a short story that explores themes of guilt

and perversity. The narrator, haunted by cruelty to his black cat and acts of domestic violence, is consumed by paranoia and madness. His attempt to conceal a crime leads to his own disgrace.

Thirteen Satires of Juvenal Juvenal, 1872

Tops Men Storedefault&cat16&color51 Book Review: Unveiling the Magic of Language

In an electronic era where connections and knowledge reign supreme, the enchanting power of language has been apparent than ever. Its power to stir emotions, provoke thought, and instigate transformation is truly remarkable. This extraordinary book, aptly titled "**Tops Men Storedefault&cat16&color51**," published by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound effect on our existence. Throughout this critique, we shall delve to the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
