**TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019)** U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

*Born a Crime* Trevor Noah, 2016-11-15 #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a

dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

**Strengthening Forensic Science in the United States** National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys,

and forensic science educators.

**Cultural Formulation** Juan E. Mezzich, Giovanni Caracci, 2008 The publication of the Cultural Formulation Outline in the DSM-IV represented a significant event in the history of standard diagnostic systems. It was the first systematic attempt at placing cultural and contextual factors as an integral component of the diagnostic process. The year was 1994 and its coming was ripe since the multicultural explosion due to migration, refugees, and globalization on the ethnic composition of the U.S. population made it compelling to strive for culturally attuned psychiatric care. Understanding the limitations of a dry symptomatological approach in helping clinicians grasp the intricacies of the experience, presentation, and course of mental illness, the NIMH Group on Culture and Diagnosis proposed to appraise, in close collaboration with the patient, the cultural framework of the patient's identity, illness experience, contextual factors, and clinician-patient relationship, and to narrate this along the lines of five major domains. By articulating the patient's experience and the standard symptomatological description of a case, the clinician may be better able to arrive at a more useful understanding of the case for clinical care purposes. Furthermore, attending to the context of the illness and the person of the patient may additionally enhance understanding of the case and enrich the database from which effective treatment can be planned. This reader is a rich collection of chapters relevant to the DSM-IV Cultural Formulation that covers the Cultural Formulation's historical and conceptual background, development, and characteristics. In addition, the reader discusses the prospects of the Cultural Formulation and provides clinical case illustrations of its utility in diagnosis and treatment of mental disorders. Book jacket.

*Sensitive Objects* Jonas Frykman,Maja Povrzanovic Frykman,2016-04-12 Some objects seem especially personal and

important to us - be it a quickly packed suitcase, an inherited vase, or a photograph. In *Sensitive Objects* the authors discuss when, how, and why particular objects appear as 'sensitive'. They do so by analyzing the objects' affective charging in the context of historically embedded practices. *Sensitive Objects* is a contribution to the upcoming field of 'affect research' that has so far been dominated by psychology and cultural studies, and the authors examine the potential for epistemic gain by connecting the studies of affect with the studies of material culture. The contributors, predominantly ethnologists and anthropologists, use fieldwork to examine how people project affects onto material objects and explore how objects embody or trigger affects and produce affective atmospheres.

*Behavioral Finance: The Second Generation* Meir Statman, 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
