Virtual, Augmented and Mixed Reality: Systems and Applications Randall Shumaker, 2013-06-12 Here is the second of a two-volume set (LNCS 8021 and 8022) that constitutes the refereed proceedings of the 5th International Conference on Virtual, Augmented and Mixed Reality, VAMR 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 88 contributions included in the VAMR proceedings were carefully reviewed and selected for inclusion in this two-volume set. The papers included in this volume are organized in the following topical sections: healthcare and medical applications; virtual and augmented environments for learning and education; business, industrial and military applications; culture and entertainment applications.

Performer Training Ian Watson, 2013-11-05 Performer Training is an examination of how actors are trained in different cultures. Beginning with studies of mainstream training in countries such as Poland, Australia, Germany, and the United States, subsequent studies survey: · Some of Asia's traditional training methods and recent experiments in performer training · Eugenio Barba's training methods · Jerzy Grotowski's most recent investigations · The Japanese American NOHO companies attempts at integrating Kyogen into the works of Samuel Beckett · Descriptions of the training methods developed by Tadashi Suzuki and Anne Bogart at their Saratoga International Theatre Institute · Recent efforts to re-examine the role and scope of training, like Britain's International Workshop Festival and the European League of Institutes of Arts masterclasses · The reformulation of the use of emotions in performer training known as Alba Emoting.

The RV Dr Fridtjof Nansen in the Western Indian Ocean Food and Agriculture Organization of the United Nations, 2018-06-06 This publication narrates the voyages of the iconic Norwegian research ship and documents marine research in the Western Indian Ocean, from early exploratory surveys to the current ecosystem surveys undertaken to support fisheries management. It provides a rare glimpse into the realities of conducting research at sea and evaluates the

impact of the Nansen programme.

Meteor Programming in 24 Hours, Sams Teach Yourself Stephen O'Brien, With Meteor, you can build powerful web and mobile apps stunningly fast -- including the apps that drive tomorrow's winning cloud-based businesses! Now, in just 24 lessons of one hour or less, you can learn all the skills and techniques you'll need. Each short, easy lesson in Meteor in 24 hours, Sams Teach Yourself builds on all that's come before. You'll learn all of Meteor's capabilities as you craft three powerful apps packed with code you'll actually want to reuse: Twitter Mapper: A web app that plots geolocation data from tweets in real-time on a world map, and lets you filter them by those you follow or by hashtag A complete bulletin board system with profiles, groups, OAuth support for signup through social networks, messaging, and chat rooms A stock portfolio manager, with charting, market quote integration, reporting, and a complete dashboard Stephen O'Brien reviews the basics of JavaScript within Meteor's framework, and then shifts to CoffeeScript to take advantage of its exceptionally readable syntax. Similarly, you'll review all you need to know about CSS, and then switch to Sass, the world's most popular and powerful CSS pre-processor. As you work, you'll master techniques including fully responsive design, effective source code management, unit testing, cloud hosting, the use of pre-built packages to save time, and much more: Setting up your Meteor IDE, and getting started fast Programming Meteor like a pro, from the very beginning Extending Meteor packages to get instant gratification Linking to Twitter's API Building modern user interfaces Manipulating and securing data Integrating social features into your web apps Adding dashboards, interactive charts, and advanced visualizations Improving security: passwords, hashes, salts, and browser policy lockdown Step-by-step instructions walk you through common questions, issues, and tasks; Q-and-As, Quizzes, and Exercises build and test your knowledg Did You Know? tips offer insider advice and shortcuts; and Watch Out! alerts help you avoid pitfalls. By the time you're finished, you'll be comfortable building virtually anything with Meteor -- including apps that create high-profit cloud-based businesses!

Straight & True Hugh Soar,2012-10-08 The arrow, essentially a specialized spear, is among the most ancient human inventions and can be found in cultures throughout the world. The need to launch a projectile farther and with greater accuracy than is possible with the human arm gave rise to a variety of solutions. Spearthrowers which extend the length of the user's arm and therefore transfer greater power to the projectile were developed far back in prehistory, and both the American Indian atlatl and the Australian woomera are examples of this technology. Blowpipes, too, are recorded in various cultures and represent another ancient technology. It was soon discovered that a stringed bow could launch a small spear-like projectile we now know as the arrow, and this combination became the dominant method for shooting projectiles for tens of thousands of years. A wonderfully simple device, the arrow and bow revolutionized both hunting and warfare, not only because of the speed, force, and accuracy that could be achieved, but by the fact that the arrow makes almost no sound as it flies toward its target, providing an essential element of surprise. In *The Arrow: A Brief History*, Hugh D. H. Soar describes

the transition from hand-thrown spear to bow-launched arrow and then follows the arrow's developments in cultures around the world and across time. The book describes arrows found in Neolithic sites; those used by North and South American Indians—including a detailed discussion of poison-tipped arrows; arrows used in China, Japan, and Mongolia; and finally the arrow in Europe, where it was successfully paired with the longbow during the Middle Ages. The author completes his survey with the changes in technology introduced during the twentieth century through the use of aluminum and other light-weight metals as well as synthetic materials to construct parts of the arrow. Relying on his considerable knowledge accumulated through decades of research, the author provides the reader with an appreciation for a humble device that, coupled with the bow, changed the history of the world.

Flying at the Edge Tony Doyle, 2010-11-29 This is the autobiography of an outstanding fighter pilot during his twenty year career with the Royal Air Force. Tony Doyle first flew when in the CCF where he completed a glider course and then a highly-prized Flying Scholarship. This opened the way to joining the RAF and becoming an all-weather tactical fighter pilot flying de Havilland Vampires and Gloster Meteors. At this he excelled and was posted as a flying instructor and then Staff Instructor. This was the age when the Jet Provost was the standard training aircraft. During 1962 he was selected to fly with the newly formed Red Pelicans aerobatic display team and honed his skills as a display pilot. Tony moved to RAF Valley as the new Folland Gnat was being introduced in the training role. This diminutive aircraft was somewhat of a breakthrough and after ironing out several design problems it proved a superb aircraft, being fast and agile. The general public were eager to see this new RAF addition and Tony became its display pilot, flying at open days throughout the UK and Europe. In 1964 Tony converted to the English Electric Lightning, Britain's one and only supersonic fighter, with a top speed in excess of Mach 2 and a ceiling of 50,000 feet. He was posted to Treble One Squadron at Wattisham in October 1964 as part of the Quick Reaction Alert force against potential Russian bomber attacks. Once again he became the Lightning's chosen low-level display pilot and demonstrated it at the 1965 Paris Air Show. Shortly after this he was forced to eject over the North Cornish coast after an engine explosion caused the loss of elevator control. This fascinating account of front-line and display flying goes into considerable detail of the aerodynamic qualities of the types flown, their dangers and advantages. There are many life-threatening incidents and successes that will educate anyone who is interested in flying at the very edge.

Dropping Britain's First H-Bomb Group Captain Kenneth Hubbard OBE DFC AFC, Michael Simmons, 2008-10-31 On 15 May 1957 Vickers Valiant V-Bomber X.D.818 under the command of Wg. Cdr. Kenneth Hubbard, O.C. 49 Squadron R.A.F., dropped Britain's first live thermonuclear bomb. The success of Operation Grapple broadcast to the world that the UK had the resolve and the capability to protect her own democracy and that of her Commonwealth. It was a major breakthrough

that ensured Britain maintained her place in the most senior influential positions of the United Nations and other corridors of world power, and in the ensuing years provide Britain's deterrent throughout the decades of the Cold War. The theme of this book is to explain how the R.A.F. selected and trained the crews who would be responsible for the precision dropping of the several weapons that would detonate during Grapple. It also provides a complete background to the parts played by all other services during this unique period in British history.

Institutional Partnerships in Multi-Hazard Early Warning Systems Maryam Golnaraghi, 2012-07-18 This book documents seven examples of Early Warning Systems for hydrometeorological and other hazards that have proven effective in reducing losses due to these hazards. The cases studied encompass a variety of climatic regimes and stages of economic development, ranging across the industrialized countries of Germany, France, Japan and the United States, to Bangladesh, the island nation of Cuba and the mega-city of Shanghai. Demonstrated characteristics of these exemplary cases are synthesized into ten guiding principles for successful early warning systems that will, it is hoped, prove useful to countries seeking to develop or strengthen such systems within their own borders.

Astronomy: The Human Quest for Understanding Dale A. Ostlie, 2022-08-11 Since humans first looked up at the stars, astronomy has had a particular ability to stir the imagination and challenge the thinking of scientists and non-scientists alike. *Astronomy: The Human Quest for Understanding* is an introductory astronomy textbook specifically designed to relate to non-science majors across a wide variety of disciplines, nurture their curiosity, and develop vital science-based critical-thinking skills. This textbook provides an introduction to how science operates in practice and what makes it so successful in uncovering nature's secrets. Given that the study of astronomy dates back thousands of years, it is the ideal subject for tracing the development of the physical sciences and how our evolving understanding of nature has influenced, and been influenced by, mathematics, philosophy, religion, geography, politics, and more. This historical approach also illustrates how wrong turns have been taken, and how the inherent self-correcting nature of science through constant verification and the falsifiability of truly scientific theories ultimately leads us back to a more productive path in our quest for understanding. This approach also points out why, as a broadly educated citizenry, students of all disciplines must understand how scientists arrive at conclusions, and how science and technology have become central features of modern society. In discussing this fascinating and beautiful universe of which we are a part, it is necessary to illustrate the fundamental role that mathematics plays in decoding nature's mysteries. Unlike other similar textbooks, some basic mathematics is integrated naturally into the text, together with interpretive language, and supplemented with numerous examples; additional tutorials are provided on the book's companion website. *Astronomy: The Human Quest for Understanding* leads the reader down the path to our

present-day understanding of our Solar System, stars, galaxies, and the beginning and evolution of our universe, along with profound questions still to be answered in this ancient, yet rapidly changing field.

Cindy Sailor and the Hunt for Owen Heather Marie Schuldt, 2021-09-25 Cindy Smith has been feeling anxious ever since the seven year meteor strike began. Needing to get our more, she attends a mud race with a friend, Stella. At the race, they witness an illegal teleportation. After a brief meeting with Captain Sam, Cindy sets out to find the criminal. She teams up with an investigator, but first, they must search for a victim, Owen. Sam discovers Cindy is a natural sailor, so he begins calling her Cindy Sailor.

The Long War David Loyn, 2021-09-21 Just as U. S. soldiers and diplomats pulled out of Afghanistan, supposedly concluding their role and responsibility in the two-decade conflict, the country fell to the Taliban. In *The Long War*, award-winning BBC foreign correspondent David Loyn uncovers the political and military strategies—and failures—that prolonged America's longest war. Three American presidents tried to defeat the Taliban—sending 150,000 international troops at the war's peak with a trillion-dollar price tag. But early policy mistakes that allowed Osama bin Laden to escape made the task far more difficult. Deceived by easy victories, they backed ruthless corrupt local allies and misspent aid. The story of *The Long War* is told by the generals who led it through the hardest years of combat as surges of international troops tried to turn the tide. Generals, which include David Petraeus, Stanley McChrystal, Joe Dunford and John Allen, were tested in battle as never before. With the reputation of a "warrior monk," McChrystal was considered one of the most gifted military leaders of his generation. He was one of two generals to be fired in this most public of commands. Holding together the coalition of countries who joined America's fight in Afghanistan was just one part of the multi-dimensional puzzle faced by the generals, as they fought an elusive and determined enemy while responsible for thousands of young American and allied lives. *The Long War* goes behind the scenes of their command and of the Afghan government. The fourth president to take on the war, Joe Biden ordered troops to withdraw in 2021, twenty years after 9/11, just as the Taliban achieved victory, leaving behind an unstable nation and an unforeseeable future.

Symbiote David Coe, 2018-01-17 When Intelligence reports reveal that enemies of the United States have obtained a meteor with metals that might revolutionize the aerospace industry, General Montgomery Upton is tasked with building an elite special operations unit, codename: Banshee, to confront the mysterious organization and seize the meteor for the United States. However, as an elite military Special Ops team, who do you trust when everyone you thought you could depend on proves untrustworthy. Exposed to an alien Symbiote and fighting for their lives, Banshee team must battle not only their known enemies but their unknown as well, all the while contending with a strange, other worldly creature that now lives

inside them. Who is the Scepter organization that seems to be somehow mixed up in all this? How did such a strange meteor become involved in such life changing events? Who is the formidable Red Devil that hunts them with a murderous passion all his own? Its continuous twists and turns as the team is plunged into a world of espionage and deceit that takes all their training and determination just to stay alive. Join the Banshee team members as they proceed ever deeper into the realm of the unknown and take us on an adventure the likes of which we have seldom read!

Swift to Battle: No 72 Fighter Squadron RAF in Action, 1947 to 1961 Tom Docherty, 2010-05-19 This third of three volumes traces the history of 72 Fighter Squadron, one of the premier squadrons in the Royal Air Force. The aircraft flown, operational personnel and missions flown are fully described with first-hand accounts from pilots and both air and ground crew. Having seen active service in the war years this volume covers the period 1947 to 1961 when the squadron was disbanded. During this period the squadron moved into the jet age at first flying de Havilland Vampires and then the Gloster Meteor F8s in 1952 and finally the Gloster Javelin in 1959 until the squadron was disbanded at Leconfield in June 1961.
