The New Yale Book of Quotations Fred R. Shapiro, 2021-08-31 A revised, enlarged, and updated edition of this authoritative and entertaining reference book —named the #2 essential home library reference book by the Wall Street Journal “Shapiro does original research, earning [this] volume a place on the quotation shelf next to Bartlett's and Oxford's.”—William Safire, New York Times Magazine (on the original edition) “A quotations book with footnotes that are as fascinating to read as the quotes themselves.”—Arthur Spiegelman, Washington Post Book World (on the original edition) Updated to include more than a thousand new quotations, this reader-friendly volume contains over twelve thousand famous quotations, arranged alphabetically by author and sourced from literature, history, popular culture, sports, digital culture, science, politics, law, the social sciences, and all other aspects of human activity. Contemporaries added to this edition include Beyoncé, Sandra Cisneros, James Comey, Drake, Louise Glück, LeBron James, Brett Kavanaugh, Lady Gaga, Lin-Manuel Miranda, Barack Obama, John Oliver, Nancy Pelosi, Vladimir Putin, Bernie Sanders, Donald Trump, and David Foster Wallace. The volume also reflects path-breaking recent research resulting in the updating of quotations from the first edition with more accurate wording or attribution. It has also incorporated noncontemporary quotations that have become relevant to the present day. In addition, The New Yale Book of Quotations reveals the striking fact that women originated many familiar quotations, yet their roles have been forgotten and their verbal inventions have often been credited to prominent men instead. This book’s quotations, annotations, extensive cross-references, and large keyword index will satisfy both the reader who seeks specific information and the curious browser who appreciates an amble through entertaining pages.

The Quote Verifier Ralph Keyes, 2007-04-01 Our language is full of hundreds of quotations that are often cited but seldom confirmed. Ralph Keyes's The Quote Verifier considers not only classic misquotes such as Nice guys finish last, and Play it again, Sam, but more surprising ones such as Ain't I a woman? and Golf is a good walk spoiled, as well as the origins of popular sayings such as The opera ain't over till the fat lady sings, No one washes a rented car, and Make my day. Keyes's in-depth research routinely confounds widespread assumptions about who said what, where, and when. Organized in easy-to-access dictionary form, The Quote Verifier also contains special sections highlighting commonly misquoted people and genres, such as Yogi Berra and Oscar Wilde, famous last words, and misremembered movie lines. An invaluable resource for not just those with a professional need to quote accurately, but anyone at all who is interested in the roots of words and

phrases, The Quote Verifier is not only a fascinating piece of literary sleuthing, but also a great read.

Old Testament Quotations in the Fourth Gospel M. J. J. Menken, 1996 From the very beginning of Christianity, Jesus' followers have tried to legitimize their views of him with the help of the Scriptures. This means that if we wish to understand the beginning of the Christian church and of Christian theology, we have to examine the early Christian use of the Old Testament. A conspicuous way of using the Scriptures consists in directly quoting from them. Eleven OT quotations in the Fourth Gospel are the topic of this study. These eleven quotations (in fact the majority of John's OT quotations) differ from the known versions of the OT, but are not free paraphrases of the OT text, in some cases, it is not immediately clear from which passage precisely the evangelist quotes. This state of affairs raises the questions which OT passages in which versions John used and how and why the quotations were modified. In this study, the questions of source and of redaction are dealt with in their interrelationship. Can we adequately explain the form of a quotation by taking into account Johannine redaction of an OT passage in a textual form which we know which we can reasonably argue ? Results of research in the field of early Jewish and early Christian exegetical techniques and devices are of course taken into account. Each of the eleven quotations is scrutinized on the points of source and redaction. It appears that John mostly used the LXX, but that where that translation did not suit his purposes, he either translated the Hebrew himself or used an other translation. He modified the quotations in agreement with extant exegetical rules, and for christological reasons. This study gives new insight into an aspect of the early Christian use of Scripture.

Structuring Sense: Volume III: Taking Form Hagit Borer, 2013-10-03 Structuring Sense explores the difference between words however defined and structures however constructed. It sets out to demonstrate over three volumes that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure, from memory of words to manipulation of rules. Its reformulation of how grammar and lexicon interact has profound implications for linguistic, philosophical, and psychological theories about human mind and language. Hagit Borer departs from language specific constructional approaches and from lexicalist approaches to argue that universal hierarchical structures determine interpretation, and that language variation emerges from the morphological and phonological properties of inflectional material. Taking Form, the third and final volume of Structuring Sense, applies this radical approach to the construction of complex words. Integrating research in syntax and morphology, the author develops a new model of word formation, arguing that on the one hand the basic building blocks of language are rigid semantic and syntactic functions, while on the other hand they are roots, which in themselves are but packets of phonological information, and are devoid of both meaning and grammatical properties of any kind. Within such a model, syntactic category, syntactic selection and argument structure are all mediated through syntactic structures projected from rigid functions, or alternatively, constructed through general combinatorial principles of syntax, such as Chomsky's Merge. The meaning of 'words', in turn, does not involve the existence of lexemes, but rather the matching of a well-defined and phonologically articulated syntactic domain with conceptual Content, itself outside the domain of language as such. In a departure from most current models of syntax but in line with many philosophical traditions, then, the Exo-Skeletal model partitions 'meaning' into formal functions, on the one hand, and

Content, on the other hand. While the former are read off syntactico-semantic structures as is usually assumed, Content is crucially read off syntactico-phonological structures.

Quoting Shakespeare Douglas Bruster,2000-01-01 William Shakespeare is perhaps the most frequently quoted author of the English-speaking world. His plays, in turn, quote a wide variety of sources, from books and ballads to persons and events. In this dynamic study of Shakespeare's plays, Douglas Bruster demonstrates that such borrowing can illuminate the world in which Shakespeare and his contemporary playwrights lived and worked, while also shedding light on later cultures

that quote his plays. In contrast to the New Historicism's sometimes arbitrary linkage of literary works with elements drawn from the surrounding culture, Quoting Shakespeare focuses on the resources that writers used in making their works. Bruster shows how this borrowing can give us valuable insight into the cultural, historical, and political positions of writers and their works. Because Shakespeare's plays have often been quoted by other writers, this study also examines what subsequent uses of Shakespeare's plays reveal about the writers and cultures that use them. In this way, Quoting Shakespeare insists that literary production and reception are both integral to a historical approach to literature.

My Stoic Journal Simon Welch,2021-10-02 You have power over your mind - not outside events. Realize this, and you will find strength. Marcus Aurelius The ancient Greek and Roman Stoic philosophers were avid Journalers, why? Because writing down our thoughts helps us understand our own thought processes, it is a way of studying the self and essentially,

taking back control of our minds! Writing in a journal on a regular basis can give us greater insight into how we think - it helps us spot the patterns in our own thinking so we can track of our self-development. If we start to recognize the bad habits in our thinking through the practice of journaling, then we can take action and learn to alter our thinking and our mindset to stay focused and stay positive. Seneca used to ask himself the following questions at the end of the day every day: What ailment have I cured today? What failing have I resisted? Where have I failed? What duties did I forget to do? Where can I show improvement? When we are no longer able to change a situation, we are challenged to change ourselves. Viktor Frankl The Dichotomy of Control Stoics acknowledge that people don't have control over all, or even much, of what happens in life. And they emphasize that worrying about things outside of their control is simply unproductive, or even irrational to a person who wants to attain a sense of tranquility. The Stoics would have us remind ourselves daily - to differentiate between what is and is not under control - to not waste energy over uncontrollable adverse events. Where many people worry endlessly about things out of their control, the Stoics think their energy is better spent thinking of creative solutions to problems, rather than the issues themselves. This idea, influenced modern psychology, particularly in the form of Cognitive Behavioural Therapy or CBT - which is perhaps to this day the single most effective and commonly used technique in the treatment of an array of mild to moderate mental health disorders. So, by simply making a habit of recognizing your thoughts and writing them down in a journal everyday so that you can clearly set aside the things you can control and the things you can't, you are taking back control of your mind, freeing it from stress and anxiety and working towards a more pragmatic, and stoic, approach to life. A gem cannot be polished without friction, nor a man perfected without trials. Seneca

Quotations as Pictures Josef Stern,2022-02-15 The proposal of a semantics for quotations using explanatory notions drawn from philosophical theories of pictures. In *Quotations as Pictures*, Josef Stern develops a semantics for quotations using explanatory notions drawn from philosophical theories of pictures. He offers the first sustained analysis of the practice of quotation proper, as opposed to mentioning. Unlike other accounts that treat quotation as mentioning, *Quotations as Pictures* argues that the two practices have independent histories, that they behave differently semantically, that the inverted commas employed in both mentioning and quotation are homonymous, that so-called mixed quotation is nothing but subsentential quotation, and that the major problem of quotation is to explain its dual reference or meaning—its ordinary meaning and its metalinguistic reference to the quoted phrase attributed to the quoted subject. Stern argues that the key to understanding quotation is the idea that quotations are pictures or have a pictorial character. As a phenomenon where

linguistic competence meets a nonlinguistic symbolic ability, the pictorial, quotation is a combination of features drawn from the two different symbol systems of language and pictures, which explains the exceptional and sometimes idiosyncratic data about quotation. In light of this analysis of verbal quotation, in the last chapters Stern analyzes scare quotation as a nonliteral expressive use of the inverted commas and explores the possibility of quotation in pictures themselves.
