Multisensory Human-Food Interaction Carlos Velasco,Anton Nijholt,Kasun Karunanayaka,2018-07-26 Our food experiences can be significantly influenced by both intrinsic and extrinsic multisensory information. Therefore, it is crucial to understand and apply the principles that govern the systematic connections that exist between the senses in the context of Human-Food Interaction (HFI). In our Research Topic, namely Multisensory Human-Food Interaction (MHFI), several studies that consider such connections in the context of HFI are presented. We also have contributions that focus on multisensory technologies that can be used to share and reproduce specific HFIs. This eBook, which resulted from the Research Topic, presents some of the most recent developments in the field of MHFI. In particular, it consists of two main sections and corresponding articles. The eBook begins with the Editorial, which provides an overview of MHFI. Then, it includes six articles that relate to principles in MHFI and three on technologies in MHFI. We hope that the different contributions featured here will support future developments in MHFI research.

Food Chains Warren Belasco,Roger Horowitz,2011-06-03 In recent years, the integrity of food production and distribution has become an issue of wide social concern. The media frequently report on cases of food contamination as well

as on the risks of hormones and cloning. Journalists, documentary filmmakers, and activists have had their say, but until now a survey of the latest research on the history of the modern food-provisioning system—the network that connects farms and fields to supermarkets and the dining table—has been unavailable. In *Food Chains*, Warren Belasco and Roger Horowitz present a collection of fascinating case studies that reveal the historical underpinnings and institutional arrangements that compose this system. The dozen essays in *Food Chains* range widely in subject, from the pig, poultry, and seafood industries to the origins of the shopping cart. The book examines what it took to put ice in nineteenth-century refrigerators, why Soviet citizens could buy ice cream whenever they wanted, what made Mexican food popular in France, and why Americans turned to commercial pet food in place of table scraps for their dogs and cats. *Food Chains* goes behind the grocery shelves, explaining why Americans in the early twentieth century preferred to buy bread rather than make it and how Southerners learned to like self-serve shopping. Taken together, these essays demonstrate the value of a historical perspective on the modern food-provisioning system.

Marketing Moves Philip Kotler, Dipak Jain, Suvit Maesincee, 2002 The Internet, globalization, and hypercompetition are dramatically reshaping markets and changing the way business is done. The problem, says internationally renowned marketer Philip Kotler and his coauthors Dipak C. Jain and Suvit Maesincee, is that marketing has not kept pace with the markets. In today's world, customers are scarce-not products-and classic marketing needs to be deconstructed, redefined, and broadened to reflect this new reality. *Marketing Moves* describes the next transformational imperative for marketing-and for any organization competing in our customer-ruled, technology-driven marketplace. It calls for a fundamental rethinking of corporate strategy to enable the ongoing creation and delivery of superior value for customers in both the marketplace and the market space. And it appoints marketing as the lead driver in shaping and implementing this new strategy. The means for accomplishing this lies in a radically new marketing paradigm the authors call holistic marketing -a dynamic concept derived from the electronic connectivity and interactivity among companies, customers, and collaborators. This new paradigm combines the best of traditional marketing with new digital capabilities to build long-term, mutually satisfying relationships and co-prosperity among all key stakeholders. Outlining a framework for implementing holistic marketing that calls for integrating customer demand management, internal and external resource allocation, and network collaboration-the authors show how holistic marketing can enable companies to: - Identify new value opportunities for renewing their markets - Efficiently create the most promising new value offerings - Deliver products, services, and experiences that more precisely match individual customer requirements - Consistently operate at the highest level of product quality, service, and speed Thought-provoking and practical, *Marketing Moves* shows how to build a complete marketing platform primed for the challenges and opportunities of a customer-centric world. AUTHOR BIO: Philip Kotler is the S.C. Johnson Son Distinguished Professor of International Marketing at the Kellogg Graduate School of Management at Northwestern University in Chicago. Dipak C. Jain is Dean of the Kellogg Graduate School of Management. Suvit Maesincee is a Professor of Marketing at the Sasin Graduate Institute of Business Administration at Chulalongkorn University in Bangkok, Thailand.

The Psychology of the Selfie Barrie Gunter,2021-09-01 The Psychology of the Selfie provides a comprehensive overview and analysis of research on the significance of selfies, offering insights into the topic from a psychological perspective and examining important issues such as body image, self-objectification, mental health and psychological benefits. Selfies are a worldwide phenomenon. Although dismissed by critics as a sign of self-absorbed narcissism, they are also a social currency that maintains and reinforces friendships, a feedback loop for self-identity affirmation, a promotional tool for gaining social influence, and a method for preserving memories of life events. In this book, Barrie Gunter expertly explores the psychological underpinnings of the contemporary global phenomenon of selfies, from the historical roots and meteoric rise due to technical advancements, to the different personality types of selfie-takers, to social relationships, to group and personal identity. Looking at both the psychological nature and impact of selfies, this book reviews different psychological outcomes for selfie-takers, both positive and negative, and the growth in psychological and physical problems that can sometimes arise. Presenting a comprehensive analysis specifically of selfie behaviour, this book is an essential reference for students and researchers in communications and media, journalism, information studies, psychology and sociology, as well as anyone with a general interest in the phenomenon.
