Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Committee on Women in Science, Engineering, and Medicine,Committee on the Impacts of Sexual Harassment in Academia,2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

**Dress Cultures in Zambia** Karen Tranberg Hansen,2023-04-30 Drawing on half-a-century of research in Zambia and regional scholarship, Karen Tranberg Hansen offers a vibrant history of changing dress practices from the late-colonial period to the present day. Exploring how the dressed body serves as the point of contact between personal, local, and global experiences, she argues that dress is just as central to political power as it is to personal style. Questioning the idea that the West led fashion trends elsewhere, Hansen demonstrates how local dress conventions appropriated western dress influences as Zambian and shows how Zambia contributed to global fashions, such as the colourful Chitenge fabric that spread across colonial trading networks. Brought to life with colour illustrations and personal anecdotes, this book spotlights dress not only as an important medium through which Zambian identities are negotiated, but also as a key reflector and driver of history.

*Environmental Justice in Postwar America* Christopher W. Wells,2018-07-16 In the decades after World War II, the American economy entered a period of prolonged growth that created unprecedented affluence—but these developments came at the cost of a host of new environmental problems. Unsurprisingly, a disproportionate number of them, such as pollution-emitting factories, waste-handling facilities, and big infrastructure projects, ended up in communities dominated by people of color. Constrained by long-standing practices of segregation that limited their housing and employment options, people of color bore an unequal share of postwar America's environmental burdens. This reader collects a wide range of primary source documents on the rise and evolution of the environmental justice movement. The documents show how environmentalists in the 1970s recognized the unequal environmental burdens that people of color and low-income Americans had to bear, yet failed to take meaningful action to resolve them. Instead, activism by the affected communities themselves spurred the environmental justice movement of the 1980s and early 1990s. By the turn of the twenty-first century, environmental justice had become increasingly mainstream, and issues like climate justice, food justice, and green-collar jobs had taken their places alongside the protection of wilderness as “environmental” issues. *Environmental Justice in Postwar America* is a powerful tool for introducing students to the US environmental justice movement and the sometimes tense relationship between environmentalism and social justice. *Women's Rights in the Middle East and North Africa* Sanja Kelly,Julia Breslin,2010-07-16 Freedom HouseOs innovative publication *Women's Rights in the Middle East and North Africa: Progress Amid Resistance* analyzes the status of women in the region, with a special focus on the gains and setbacks for women's rights since the first edition was released in 2005. The study presents a comparative evaluation of conditions for women in 17 countries and one territory: Algeria, Bahrain, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine (Palestinian Authority and Israeli-Occupied Territories), Qatar, Saudi Arabia, Syria, Tunisia, United Arab Emirates, and Yemen. The publication identifies the causes and consequences of gender inequality in the Middle East, and provides concrete recommendations for national and international policymakers and implementers. Freedom House is an independent nongovernmental organization that supports democratic change, monitors freedom, and advocates for democracy and human rights. The project has been embraced as a resource not only by international players like the United Nations and the World Bank, but also by regional women's rights organizations, individual activists, scholars, and governments worldwide. Women's rights in each country are assessed in five key areas: (1) Nondiscrimination and Access to Justice; (2) Autonomy, Security, and Freedom of the Person; (3) Economic Rights and Equal Opportunity; (4) Political Rights and Civic Voice; and (5) Social and Cultural Rights. The methodology is based on the Universal Declaration of Human Rights, and the study results are presented through a set of numerical scores and analytical narrative reports.

*Gender and Forests* Carol J. Pierce Colfer, Bimbika Sijapati Basnett, Marlène Elias, 2016-04-14 This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to

analyse global gender conditions as related to forests. Using a variety of methods and approaches, they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under-studied themes. Focusing particularly on tropical forests, the book presents both local case studies and global comparative studies from Africa, Asia, and Latin America, as well as the US and Europe. The studies range from personal histories of elderly American women's attitudes toward conservation, to a combined qualitative / quantitative international comparative study on REDD+, to a longitudinal examination of oil palm and gender roles over time in Kalimantan. Issues are examined across scales, from the household to the nation state and the global arena; and reach back to the past to inform present and future considerations. The collection will be of relevance to academics, researchers, policy makers and advocates with different levels of familiarity with gender issues in the field of forestry.
