Selling Women Short Liza Featherstone,2009-04-20 On television, Wal-Mart employees are smiling women delighted with their jobs. But reality is another story. In 2000, Betty Dukes, a fifty-two-year-old black woman in Pittsburg, California,

became the lead plaintiff in *Dukes v. Wal-Mart Stores*, a class action, representing 1.6 million women. In her explosive investigation of this historic lawsuit, journalist Liza Featherstone reveals how Wal-Mart, a self-styled family-oriented, Christian company: Deprives women (but not men) of the training they need to advance. Relegates women to lower-paying jobs like selling baby clothes, reserving the more lucrative positions for men. Inflicts punitive demotions on employees who object to discrimination. Exploits Asian women in its sweatshops in Saipan, a U.S. commonwealth. Featherstone goes on to reveal the creative solutions that Wal-Mart workers around the country have found, like fighting for unions, living-wage ordinances, and childcare options. *Selling Women Short* combines the personal stories of these employees with superb investigative journalism to show why women who work these low-wage jobs are getting a raw deal, and what they are doing about it. A new preface to the paperback edition will reflect on Wal-Mart's response to this lawsuit and its critics-including this one.

Dietary Patterns and Whole Plant Foods in Aging and Disease Mark L. Dreher, 2018-02-13 This text provides a comprehensive review of the latest research on the effects of dietary patterns and whole plant foods on general health, aging, and cardiometabolic disease risk from major prospective cohort studies and randomized controlled trials (RCTs) and their meta-analyses. The book extensively assesses, the effects of lifestyle, dietary patterns, and specific whole plant foods on the quality of aging; the impact of fiber-rich foods on colonic microbiota and weight regulation, the effects of which influence the quality of aging; the effects of fiber-rich diets on the aging gastrointestinal tract; and the role of dietary patterns and specific whole plant foods on coronary heart disease, hypertension, chronic kidney disease, stroke and type 2 diabetes. Figures are extensively used to highlight findings and tables summarizing food composition dietary patterns and whole plant foods. Tables summarizing meta-analyses and representative cohort studies and RCTs provide state-of-the-art coverage of the important effect of dietary patterns and whole plant foods on aging and cardiometabolic diseases. *Dietary Patterns and Whole Plant Foods in Aging and Disease* will serve as a very useful, state -of -the-art resource for dietitians, physicians, nurses, food industry scientists, researchers, naturopathic doctors, educators and their students interested in the role of dietary patterns and specific whole plant foods on aging and disease. The probability of healthy aging and disease prevention is significantly improved by 70% when individuals and populations follow a healthy lifestyle. Healthy lifestyle choices include adhering to a healthy dietary pattern, increasing physical activity most days of the week, achieving and maintaining lean body weight and waist size, and the cessation of smoking. It is estimated that 90% or more of those in westernized populations are on track for unhealthy aging and increased cardiometabolic disease risk, especially with the obesity pandemic associated with relatively poor diet quality and sedentary lifestyles. Healthy dietary patterns significantly lower risk of all-cause mortality and chronic disease incidence compared to Western dietary patterns. Since healthy whole and minimally processed plant foods vary widely in their nutrient and phytochemical compositions, their overall benefit in aging

and disease may vary depending on the specific whole plant foods consumed.

The Irish Short Story at the Turn of the Twenty-First Century Madalina Armie, 2022-12-30 In the mid-1990s, Ireland was experiencing the best of times. The Celtic Tiger seemed to instil in the national consciousness that poverty was a problem of the past. The impressive economic performance ensured that the Republic occupied one of the top positions among the world's economic powers. During the boom, dissident voices continuously criticised what they considered to be a mirage, identifying the precariousness of its structures and foretelling its eventual crash. The 2008 recession proved them right. Throughout this time, the Irish contemporary short story expressed distrust. Enabled by its capacity to reflect change with immediacy and dexterity, the short story saw through the smokescreen created by the Celtic Tiger discourse of well-being. It reinterpreted and captured the worst and the best of the country and became a bridge connecting tradition and modernity. The major objective of this book is to analyse the interactions between fiction and reality during this period in Ireland by studying the short stories written by old and emergent voices published between the birth of the Celtic Tiger in 1995 up to its

immediate aftermath in 2013.

Early Nutrition: Impact on Short- and Long-Term Health H. van Goudoever, S. Guandalini, R.E. Kleinman, 2011-10-06
In this book, a selected group of international experts review nutritional practices and feeding behaviors in infancy and early childhood. They present the latest knowledge on feeding practices during the period considered and their effect on growth, development, and immediate and long-term health. One of the main topics discussed involves feeding practices in the newborn critical care unit, concentrating on the use of human donor milk and probiotics in the diet of premature and ill newborns. Another point of focus is the causes and the effect of an insufficient intake of selected micronutrients, such as iron and zinc, which is highly prevalent particularly in the developing world. Besides, this publication contains information on the influence of early feeding habits on the later development of a number of health-related issues such as food allergies, later food preferences and eating habits, obesity, bone development, the risk of developing celiac disease in genetically predisposed children. This volume provides essential reading for pediatricians, clinical investigators and health workers interested in the effects of early nutrition on health.

Women and Relationships in Contemporary Irish Women's Short Stories □□□, 2021-07-01 This book examines archetypal motifs related to aspects of human relationships in contemporary Irish women's short stories from the late 1960s to the present. These relationships examined embrace not only relationships between men and women, as married couples and lovers, but also women to women relationships as mothers, daughters, sisters or lovers. This book has uncovered certain recurrent motifs which may be construed as archetypal and are employed as a narrative device to express a certain level of feminist awareness by Irish female writers in their stories against the backdrop of Irish feminism emerged in the late 1960s. This feminist aspect of Irish women's stories appears to address the paradoxes of patriarchal ideology underlying male domination in male/female courtship and marriages, the conflict between patriarchally loyal mothers and rebellious daughters, powerless, but rival, female siblings and peers competing for limited resources and male attention under the Father's law. Motifs of resistance and subversion serve in these stories as metaphors unveiling female protests against an ideology which defines and confines women in the Irish patriarchal context. This book demonstrates a process of transition during which Irish female writers progress from the depiction of women who struggle and fight against unfairness and distortion within an 'androcentric' culture to a new direction in which such writers describe a situation where women recognise the internalisation of the 'false consciousness' of patriarchy and, out of this recognition, may be eventually able to develop further their sense of self and individuality. The archetypal motifs in Irish women's stories also illustrate a kind of continuity of an ancient female archetype of female rebellious powers which in female literary imagination never ceases to resurface in the face of patriarchal suppression.
