**Air Pollution, Clean Energy and Climate Change** Anilla Cherian, 2022-04-04 AIR POLLUTION, CLEAN ENERGY AND CLIMATE CHANGE Anthropogenic climate change is a globally recognized threat multiplier. Yet, decades of intergovernmental negotiations have failed to curb toxic levels of fossil fuel energy-related air pollution which the World Health Organization (WHO) has identified as the world's largest, single environmental health risk. Lying in plain view are the troubling truths about the morbidity and ill-health burdens associated with anthropogenic climate change that are borne by those who have done the least to contribute to per capita emissions of greenhouse gas emissions. Ignoring the nexus between air pollution, lack of access to clean energy and climate adversities represents a collective failure of the UN's ambitious, universally agreed upon 2030 Sustainable Development Agenda (SDA) which pledged 'to leave no one behind'. This book highlights the air pollution crisis that emanates from the heavy reliance on polluting forms of energy and the urbanization of poverty in developing countries. It provides a framework for understanding why the broader sustainable development community needs to address the more neglected intersection between adverse climatic impacts and energy-related air pollution which devastates the lives of the poorest and most vulnerable amongst us, especially young children, women and the elderly. It focuses on the importance of breaking down persistent global silos and goals on sustainable energy for all, and climate change reflected in the UNs 2030 SDA, and the 2015 Paris Agreement. Integrating clean air and climate mitigation measures that specifically include curbing short lived climate pollutants such as black carbon via innovative partnerships/modalities are seen as vital to clean energy and climate responsive action. This book argues that linked actions by non-nation state actors aimed at reducing air pollution and ameliorating short term climate pollutants in the most populous cities, particularly in countries like India where annual average particulate matter pollution levels consistently exceed WHO guidelines are essential in reducing grave health costs and disease burdens. *Air Pollution, Clean Energy and Climate Change* will be of particular interest to policy makers, researchers, environmental advocates, civil society stakeholders and practitioners who want to understand the urgency of addressing linkages between climate change, fossil fuel energy, air pollution and public health risks. The cover image is an oil painting by Anilla Cherian, which incorporates tree bark and twigs, and serves as a reminder of the daily energy sources used by millions who lack access to clean energy and are exposed to high levels of household air pollution. It is the second-part of a series, with the first one serving as the

cover image to Energy and Global Climate Change (Cherian, 2015). Photograph of painting by Alison Sheehy Photography.

*Climate Change and Gender in Rich Countries* Marjorie Griffin Cohen, 2017-06-26 Climate change is at the forefront of ideas about public policy, the economy and labour issues. However, the gendered dimensions of climate change and the public policy issues associated with it in wealthy nations are much less understood. *Climate Change and Gender in Rich Countries* covers a wide range of issues dealing with work and working life. The book demonstrates the gendered distinctions in both experiences of climate change and the ways that public policy deals with it. The book draws on case studies from the UK, Sweden, Australia, Canada, Spain and the US to address key issues such as: how gendered distinctions affect the most vulnerable; paid and unpaid work; and activism on climate change. It is argued that including gender as part of the analysis will lead to more equitable and stronger societies as solutions to climate change advance. This volume will be of great relevance to students, scholars, trade unionists and international organisations with an interest in climate change, gender, public policy and environmental studies.

**Climate Change and Global Public Health** Kent E. Pinkerton, William N. Rom, 2020-11-23 This book is a guide to the research, findings, and discussions of US and international experts on climate change and respiratory health. Since the publication of the first edition, climate change has been increasingly acknowledged as being directly related to the prevalence and incidence of respiratory morbidity. Evidence is increasing that climate change does drive respiratory disease onset and exacerbation as a result of increased ambient and indoor air pollution, desertification, heat stress, wildfires, and the geographic and temporal spread of pollens, molds and infectious agents. This second edition is fully updated to include the latest research by international experts on topics such as heat waves causing critical care-related diseases, climate-driven air pollution increases, and high-level ozone and ozone exposure linked to idiopathic pulmonary fibrosis, lung cancer, and acute lower respiratory infection. Seven new chapters have also been added on extreme weather and agricultural safety in California; desert dust effects on lung health; climate policy and the EPA; California's integrated approach to air quality and climate change; integrating climate change, the environment, and sustainability themes into professional health science courses; and the role of the physician as climate advocate. This is an ideal guide for all pulmonologists and health professionals treating patients with pulmonary disease.

A Short History of Western Ideology Rolf Petri, 2018-02-22 We are arguably living in a 'postideological' era. However, when we tune into the TV news we can hear political leaders talk about 'advanced' societies, geopolitical experts suggest 'humanitarian' interventions, and sober events presenters qualify a murder as 'barbaric'. What does this mean? In this comprehensive book, Rolf Petri reveals how our everyday political language is full of ideological representations of the world, and places them in an accessible historical narration. From the secularization of Europe and the Enlightenment project of 'civilization' to the contemporary preoccupation with ecological catastrophes or the end of history, A Short History of Western Ideology carves out the central elements of western ideology. It focuses on a wide variety of issues including religion, colonialism, race and gender, which are essential for how we conceive of the modern world. By creating an awareness of the ideological character of the western worldview, its limits and its flaws, this book warns us of the dangers that derive from a self-righteous mindset. It is stimulating and important reading for history and politics students seeking to understand the ideology of the western world.

Postcolonial Literatures of Climate Change, 2022-07-04 Postcolonial Literatures of Climate Change investigates the evolving nature of postcolonial literatures and criticism in response to the global, regional, and local environmental transformations brought about by anthropogenic climate change.

*The Yellow Demon of Fever* Manuel Barcia, 2020-04-14 A pathbreaking history of how participants in the slave trade

influenced the growth and dissemination of medical knowledge As the slave trade brought Europeans, Africans, and Americans into contact, diseases were traded along with human lives. Manuel Barcia examines the battle waged against disease, where traders fought against loss of profits while enslaved Africans fought for survival. Although efforts to control disease and stop epidemics from spreading brought little success, the medical knowledge generated by people on both sides of the conflict contributed to momentous change in the medical cultures of the Atlantic world.

**Anthropology and Climate Change** Susan A Crate, Mark Nuttall, 2016-06-03 Comprehensively assessing anthropology's engagement with climate change, this volume both maps out exciting trajectories for research and issues a call to action. **Teaching Photography** Glenn Rand, Richard D. Zakia, 2013-01-25 Finally, a book for you teachers! Because making great photographs does not always translate into an ability to teach effectively. Teaching Photography will show you how to help your students expand their knowledge and abilities in the techniques, the aesthetics, and the way photography fits into a greater world of knowledge, by providing ideas for inspiring conversations and critiques, as well as insightful pointers regarding the learner's perspective in this new world. Teaching Photography approaches photographic education from a point of view that stresses the how and why of the education and not the technique to be taught.

**The Economics of Climate-Resilient Development** Sam Fankhauser, Thomas K.J. McDermott, 2016-07-27 Some climate change is now inevitable and strategies to adapt to these changes are quickly developing. The question is particularly paramount for low-income countries, which are likely to be most affected. This timely and unique book takes an integrated look at the twin challenges of climate change and development. The book treats adaptation to climate change as an issue of climate-resilient development, rather than as a bespoke set of activities (flood defences, drought plans, and so on), combining climate and development challenges into a single strategy. It asks how the standard approaches to development need to change, and what socio-economic trends and urbanisation mean for the vulnerability of developing countries to climate risks. Combining conceptual thinking with practical policy prescriptions and experience the contributors argue that, to address these questions, climate risk has to be embedded fully into wider development strategies

**Food Security, Gender and Resilience** Leigh Brownhill, Esther Njuguna, Kimberly L. Bothi, Bernard Pelletier, Lutta Muhammad, Gordon M. Hickey, 2016-01-22 Through the integration of gender analysis into resilience thinking, this book shares field-based research insights from a collaborative, integrated project aimed at improving food security in subsistence and smallholder agricultural systems. The scope of the book is both local and multi-scalar. The gendered resilience framework, illustrated here with detailed case studies from semi-arid Kenya, is shown to be suitable for use in analysis in other geographic regions and across disciplines. The book examines the importance of gender equity to the strengthening of

socio-ecological resilience. Case studies reflect multidisciplinary perspectives and focus on a range of issues, from microfinance to informal seed systems. The book's gender perspective also incorporates consideration of age or generational relations and cultural dimensions in order to embrace the complexity of existing socio-economic realities in rural farming communities. The issue of succession of farmland has become a general concern, both to farmers and to researchers focused on building resilient farming systems. Building resilience here is shown to involve strengthening households' and communities' overall livelihood capabilities in the face of ongoing climate change, global market volatility and political instability.

**Gendered transactions** Indrani Sen, 2017-03-01 This book seeks to capture the complex experience of the white woman in colonial India through an exploration of gendered interactions over the nineteenth and early twentieth centuries. It examines missionary and memsahibs' colonial writings, both literary and non-literary, probing their construction of Indian women of different classes and regions, such as zenana women, peasants, ayahs and wet-nurses. Also examined are delineations of European female health issues in male authored colonial medical handbooks, which underline the misogyny undergirding this discourse. Giving voice to the Indian woman, this book also scrutinises the fiction of the first generation of western-educated Indian women who wrote in English, exploring their construction of white women and their negotiations with colonial modernities. This fascinating book will be of interest to the general reader and to experts and students of gender studies, colonial history, literary and cultural studies as well as the social history of health and medicine.

**Gendered Approaches to Spatial Development in Europe** Barbara Zibell, Doris Damyanovic, Ulrike Sturm, 2019-03-27 This book explores the extent to which gendered approaches are evident and effective in spatial development in selected European countries. Beginning with an introduction to theories and concepts of gender, space and development, the book includes a brief historical review of gender in spatial planning and development throughout Europe in general, and an overview of different national frameworks in European countries, comparing legal, organisational and cultural similarities and differences. This is followed by a critical reflection on how simplifications and stereotypes of gender concepts are used in the practice of spatial development. The main part of the book offers a transnational discussion of planning practices on selected thematic topics. It starts with gender-sensitivity in urban master planning and at neighbourhood level referring to different types of planning manuals. Furthermore, the book focuses on gender-sensitive evaluation in urban planning as well as international agendas for sustainable development as a framework for a new generation of gender equality policies. The chapter authors assert that climate change, migration and austerity have threatened gender equality and therefore spatial development needs to be especially alert to gender dimensions. The editors end with an outlook and suggestions for further action and research on gender issues in spatial development. With inputs from some of Europe's leading thinkers on gender, space and development, this volume is designed to inspire students, scholars and practitioners to reflect upon the

contribution that gendered approaches can make in the various fields of spatial development and environmental planning.

**The Assistant Principal 50** Baruti K. Kafele, 2020-05-11 You're an Assistant Principal. Whatever your status—the sole AP in your school, one of two or more APs in your school, a career AP, an AP aspiring to the principalship—yours is one of the most misunderstood and underutilized positions in education. Positioned between teachers and the principal, you are an instructional leader. However, you are not the leader of the school. Therefore, you must carefully navigate your way to ensure that you thrive in your role without stepping on the toes of your principal. In *The Assistant Principal 50*, award-winning, four-time principal Baruti Kafele presents reflective questions that encompass the breadth and depth of the assistant principalship—from finding your leadership lane to thriving and being an asset to your principal. Kafele infuses the book (which also includes guidance and insights for principals and aspiring assistant principals) from beginning to end with personal anecdotes and accounts of both failures and successes from his years as an assistant principal. He arms you with tools and insights that will drive you to view the assistant principalship as critical to the climate and culture of your school as well as to student achievement. You, assistant principal, play a critical role in your school's success. The questions that Kafele asks you to consider will aid you as you hone your leadership skills toward becoming an effective leader in your school.

*After Eden: A Short History of the World* John Charles Chasteen, 2023-11-14 To solve the problems of the twenty-first century, historian John Charles Chasteen argues that we must first know our shared human story. In *After Eden*, prominent Latin American historian John Charles Chasteen provided a concise history of the world, in which he explores the origins and persistence of the timeless phenomena of humanity's inhumanity to itself. Where did it come from? Why has it been so prevalent throughout our history? And, most importantly, can we overcome it? Chasteen argues that to do so, we must understand our shared past. While much of that past is violent, we can look for inspiration from major periods when we strived to live more cooperatively, such as our early foraging periods, to the creation of universal religions and ethical systems, the birth of the ideas of individual liberty and freedom, the rise of socialism in response to the massive excesses of global capitalism, the civil rights and decolonization movements of the twentieth century, to the environmental and social justice movements of today. Once we understand who and what we are as a species and a people, we will be in the best position to figure out how to work together to tackle the greatest challenges we face today—mass global inequality and the destruction of our environment. Fully informed by the latest scholarship, *After Eden* presents a down-to earth, fast-paced narrative of world history, animated by stories of people from all walks of life and enriched by insightful analysis and the author's extensive world travel.
