Out of the Dust joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content! Dust piles up like snow across the prairie. . . . A terrible accident has transformed Billie Jo's life, scarring her inside and out. Her mother is gone. Her father can't talk about it. together Merchant's existing work on the topic of women and the environment as well as updated and new essays. Earthcare looks at age-old historical associations of women with nature, beginning with Eve and continuing through to environmental activists of today, women's commitment to environmental conservation, and the problematic assumptions of women as caregivers and men as dominating nature.

Transforming Trajectories for Women of Color in Tech National Academies of Sciences, Engineering, and Medicine, National Academies Of Sciences Engineeri, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Addressing the Underrepresentation of Women of Color in Tech, 2022-09-09 Demand for tech professionals is expected to increase substantially over the next decade, and increasing the number of women of color in tech will be critical to building and maintaining a competitive workforce. Despite years of efforts to increase the diversity of the tech workforce, women of color have remained underrepresented, and the numbers of some groups of women of color have even declined. Even in cases where some groups of women of color may have higher levels of representation, data show that they still face significant systemic challenges in advancing to positions of leadership. Research evidence suggests that structural and social barriers in tech education, the tech workforce, and in venture capital investment disproportionately and negatively affect women of color. Transforming Trajectories for Women of Color in Tech uses current research as well as information obtained through four public information-gathering workshops to provide recommendations to a broad set of stakeholders within the tech ecosystem for increasing recruitment, retention, and advancement of women of color. This report identifies gaps in existing research that obscure the nature of challenges faced by women of color in tech, addresses systemic issues that negatively affect outcomes for women of color in tech, and provides guidance for transforming existing systems and implementing evidence-based policies and practices to increase the success of women of color in tech.

Laudato Si Pope Francis, 2015-07-18 "In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" - Pope Francis, *Laudato Si'* In his second encyclical, *Laudato Si'*: On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral

teaching, draws on the best scientific research, providing the foundation for “the ethical and spiritual itinerary that follows.” Laudato Si’ outlines: The current state of our “common home” The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis’ call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

The Many Colors of Crime Ruth D. Peterson, Lauren J. Krivo, John Hagan, 2006-08 Considering race and ethnicity as organising principles in why, how, where and by whom crimes are committed and enforced, this volume argues that dimensions of race and ethnicity condition the very laws that make certain behaviours criminal, and the determination of who becomes a victim of crime under which circumstances.

Women, Race, & Class Angela Y. Davis, 2011-06-29 From one of our most important scholars and civil rights activist icon, a powerful study of the women’s liberation movement and the tangled knot of oppression facing Black women. “Angela Davis is herself a woman of undeniable courage. She should be heard.”—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women’s rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger’s racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

The Art of Cloth in Mughal India Sylvia Houghteling, 2022-03-29 When a rich man in seventeenth-century South Asia enjoyed a peaceful night’s sleep, he imagined himself enveloped in a velvet sleep. In the poetic imagination of the time, the fine dew of early evening was like a thin cotton cloth from Bengal, and woolen shawls of downy pashmina sent by the Mughal emperors to their trusted noblemen approximated the soft hand of the ruler on the vassal’s shoulder. Textiles in seventeenth-century South Asia represented more than cloth to their makers and users. They simulated sensory experience, from natural, environmental conditions to intimate, personal touch. *The Art of Cloth in Mughal India* is the first art historical account of South Asian textiles from the early modern era. Author Sylvia Houghteling resurrects a truth that seventeenth-century world citizens knew, but which has been forgotten in the modern era: South Asian cloth ranked among the highest forms of art in

the global hierarchy of luxury goods, and had a major impact on culture and communication. While studies abound in economic history about the global trade in Indian textiles that flourished from the seventeenth to the nineteenth centuries, they rarely engage with the material itself and are less concerned with the artistic-and much less the literary and social-significance of the taste for cloth. This book is richly illustrated with images of textiles, garments, and paintings that are held in little-known collections and have rarely, if ever, been published. Rather than rely solely on records of European trading companies, Houghteling draws upon poetry in local languages and integrates archival research from unpublished royal Indian inventories to tell a new history of this material culture, one with a far more balanced view of its manufacture and use, as well as its purchase and trade--

Annotated Readings in the History of Modern Psychology C. James Goodwin,2009-02-09 Annotated Readings in the History of MODERN PSYCHOLOGY There's no substitute for the original... If you want to really understand the underpinnings of psychology today, go to the source! Unfortunately, original source readings can seem a bit daunting—these works were written at a particular time and place in psychology's history. Understanding them requires knowledge of the historical context in which the work was written, as well as background on the writer. This book of annotated readings aims to solve this problem. Each of the 36 chapters in this reader includes substantial excerpts from important books and papers in psychology's history, accompanied by running annotations that address the meaning of the reading's content, how the content relates to contemporary historical context, and the significance of the material for psychology's history. Featuring 36 original readings ranging from Watson's Behaviorist Manifesto to Freud's Clark lectures on psychoanalysis to Maslow's hierarchy of needs, C. James Goodwin's Annotated Readings in the History of Modern Psychology provides insight into some of psychology's brightest minds, while making the material easy to comprehend for today's readers.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and

scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
