**Laudato Si** Pope Francis,2015-07-18 “In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!” – Pope Francis, *Laudato Si'* In his second encyclical, *Laudato Si'*: On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. *Qualitative GIS* Meghan Cope,Sarah Elwood,2009-07-09 Geographic Information Systems are an essential tool for analyzing and representing quantitative spatial data. Qualitative GIS explains the recent integration of qualitative research with Geographical Information Systems With a detailed contextualising introduction, the text is organised in three sections: Representation: examines how researchers are using GIS to create new types of representations; working with spatial data, maps, and other visualizations to incorporate multiple meanings and to provide texture and context. Analysis: discusses the

new techniques of analysis that are emerging at the margins between qualitative research and GIS, this in the wider context of a critical review of mixed-methods in geographical research Theory: questions how knowledge is produced, showing how ideas of 'science' and 'truth' inform research, and demonstrates how qualitative GIS can be used to interrogate discussions of power, community, and social action Making reference to representation, analysis, and theory throughout, the text shows how to frame questions, collect data, analyze results, and represent findings in a truly integrated way. An important addition to the mixed methods literature, Qualitative GIS will be the standard reference for upper-level students and researchers using qualitative methods and Geographic Information Systems.

Women in Sensory Neuroscience Elena Nava, Monica Gori, Alessia Tonelli, Maria Bianca Amadeo, 2023-08-24 At present, less than 30% of researchers worldwide are women. Long-standing biases and gender stereotypes are discouraging girls and women from pursuing a career in science, technology, engineering and mathematics (STEM) research. Science and gender equality are, however, essential to ensure sustainable development as highlighted by UNESCO. Although underrepresented, and often unacknowledged, female researchers have been crucial to scientific advances. In order to change traditional mindsets, gender equality must be promoted, stereotypes defeated, and girls and women should be encouraged to pursue STEM careers. Therefore, the Sensory Neuroscience section is proud to shed a light on great female researchers and provide them with a platform to showcase their work and role in open science. This editorial initiative of particular relevance, led by Dr. Monica Gori, together with Dr. Elena Nava, Dr. Alessia Tonelli, and Dr. Maria Bianca Amadeo highlights advances in the field of sensory neuroscience to further aid our empirical and theoretical understanding of human sensation and perception.

*Shock Waves* Stephane Hallegatte,Mook Bangalore,Laura Bonzanigo,Marianne Fay,Tamaro Kane,Ulf Narloch,Julie Rozenberg,David Treguer,Adrien Vogt-Schilb,2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win” situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction

policies can drastically limit long-term ones.

Nonviolence Senthil Ram,Ralph Summy,2008 The so-called 'war on terror' has gone badly for the West, playing directly into the strategy of al-Qa'ida and the rest of the terrorist network. Why did this happen? Were there other approaches that might have been implemented with better prospects of success? This edited collection of perspectives on the non-violent counter to terrorism opens the topic to serious consideration. The development of a non-violent paradigm brings into sharp focus the deficiencies of present thinking, and paves the way for comprehending how non-violence might overcome those deficiencies and introduce viable alternatives. Since there is a general ignorance about the history, theory and operational dynamics of non-violence, these aspects are featured throughout the book, and related to the special case of terrorism. To understand empathetically the background and mind-set of the opponent (without condoning his actions), to study his culture, to avoid the strategic trap he has set, to examine the different gender reactions of a Muslim Society, to differentiate between non-violent Islam and Islamic Terrorism, to jettison the misinformed baggage we carry about violence, to appreciate the positive role education and aesthetics can play, and to investigate ways in which a non-violent counter to terrorism might be staged, including a Gandhian response. These are just some of the tasks that the contributors have collectively pursued. Their ideas excitingly open up a whole new set of possibilities for a more peaceful world.
