Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Macroeconomics in Context Neva Goodwin, Jonathan M. Harris, Julie A. Nelson, Brian Roach, Mariano Torras, 2015-03-12 Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Essentials of Stochastic Processes Richard Durrett, 2016-11-07 Building upon the previous editions, this textbook is a first course in stochastic processes taken by undergraduate and graduate students (MS and PhD students from math, statistics, economics, computer science, engineering, and finance departments) who have had a course in probability theory. It covers Markov chains in discrete and continuous time, Poisson processes, renewal processes, martingales, and option pricing. One can only learn a subject by seeing it in action, so there are a large number of examples and more than 300 carefully chosen exercises to deepen the reader's understanding. Drawing from teaching experience and student feedback, there are many new examples and problems with solutions that use TI-83 to eliminate the tedious details of solving linear equations by hand, and the collection of exercises is much improved, with many more biological examples. Originally included in previous editions, material too advanced for this first course in stochastic processes has been eliminated while treatment of other topics useful for applications has been expanded. In addition, the ordering of topics has been improved; for example, the difficult subject of martingales is delayed until its usefulness can be applied in the treatment of mathematical finance.

Hacking the Earthship Rachel Preston Prinz, 2015-03-25 Hacking the Earthship: In Search of an Earth-Shelter that Works for Everybody is a comprehensive collection of academic and in-the-field research findings on Earthships, combined with practical how-to advice for designing and financing your own truly sustainable earth-sheltered home. Rachel Preston Prinz and contributing authors discuss the history, research, design issues, and evolution of Earthships, drawing on the knowledge of thousands of builders, craftsmen, and designers who have mastered the art of earth sheltering. Then, they walk readers step by step through design, offering a wealth of resources that can inspire, inform, and educate. Within, readers will find the tools needed to understand their place's culture, architecture, and climate... and the ideal building methods for their climate, personality, values, and budget. THE NEW GENERATION OF EARTHSHIP ENTHUSIASTS: • Does not want to cart questionable building materials long distances and call it "green". • Wants to build locally and naturally... and they want to build it themselves. • Wants their buildings to be cool in summer, warm in winter, the humidity to be predictable and regular; and they want to minimize pests and allergens. • Wants to be able to get a permit and insurance, and resell their homes if

they want to; or pass them on if they can. • They want a smaller home that is “just right”... for their budget, time, ability, energy use, and maintenance. • They want to make their home easy to manage, maintain, and get around in, even if they are in a walker or wheelchair. • They want their home to feel like it is made from and relating to the earth: in views, in light, in fresh air, in the ability to grow food, and in a beautiful landscape that supports the home. Finding the balance between all these desires is a delicate and lengthy process of discernment, study, and goal-setting. That is what this book aims to help you do. Chapter 1 THE EARTHSHIP REALITY PROJECT discusses the issues and resolutions of the design. Chapter 2 THE SCIENCE: ACADEMIC RESEARCH AND TIRE OFF-GASSING reviews academic and scientific research on Earthships. Chapter 3 A WAY FORWARD discusses financing and insurance, minimizing waste, managing the build, visioning, and Code requirements. Chapter 4 THE BUILDING’S CONTEXT AND SITE addresses the site and landscape. Chapter 5 DESIGNING FOR THERMAL COMFORT addresses natural, mechanical, and design options for improving thermal performance. Topics covered include passive solar design; thermal mass versus insulation; earth-coupling versus earth-sheltering; thermal and moisture protection; and natural ventilation. Chapter 6 THE STRUCTURAL SYSTEM addresses the ways we can form the building’s structure. Chapter 7 THE ENCLOSURE SYSTEM outlines the construction of the building’s envelope or skin. We discuss traditional earthship building blocks like tire, glass, and can walls, as well as alternative systems like adobe, cob, rammed earth, earthbags, wood block concrete forms, timber frame, log, cordwood, and strawbale buildings. We also cover various roofing options as well as doors and windows. Chapter 8 ROOMS, SPACES, COLORS, & TEXTURES discusses how we can create a home we love. Chapter 9 MECHANICAL SYSTEMS outlines basic mechanical, electrical, and plumbing considerations, especially on-grid systems since those are what make an Earthship most affordable. Chapter 10 IMBUING SPACE WITH SPIRIT addresses psychological and spiritual aspects of design. Chapter 11 CONCLUSION: A NEW SET OF EARTH-SHELTER BUILDING CRITERIA Chapter 12 OVERWHELMED? NEED HELP? discusses some helpful tips if you hire an architect or residential designer . The APPENDICES offer resources and worksheets. Portions of the proceeds will go to our non-profit architectural education programs ARCHITECTURE FOR EVERYBODY and BUILT FOR LIFE.

A Narrative of the Life of David Crockett of the State of Tennessee Davy Crockett, 1987-01-01 Even as a pup, Davy Crockett always delighted to be in the very thickest of danger. In his own inimitable style, he describes his earliest days in Tennessee, his two marriages, his career as an Indian fighter, his bear hunts, and his electioneering. His reputation as a b'ar hunter (he killed 105 in one season) sent him to Congress, and he was voted in and out as the price of cotton (and his relations with the Jacksonians) rose and fell. In 1834, when this autobiography appeared, Davy Crockett was already a folk hero with an eye on the White House. But a year later he would lose his seat in Congress and turn toward Texas and, ultimately, the Alamo.
