*The Ladies' Berry Bubble Shorts Sewing Pattern and Tutorial* Rebecca Page, 2018-11-25 The Berry Bubble Shorts Sewing Pattern book is a complete pattern and tutorial for a pair of fully-lined heirloom-quality shorts for women in sizes XXS to 5XL. Suitable for only woven fabrics, this is a most excellent pattern for intermediate-beginners and more advanced sewistas alike! This beautifully-finished pattern offers a pair of fully-lined shorts with two different hem options (straight leg or bubble), cuff or binding options, and three different leg lengths: short, mid-thigh, and knee length, and the option to use regular or buttonhole elastic. Full fabric requirements are included inside this book. Depending on size, length, and waistband options you will need between 1 and 2 yards (92 cm and 183 cm) of fabric for the shorts and the same for the lining, and between 20 inches (51 cm) and 33 inches (84 cm) of elastic. You will also need 4 small poppers or buttons (plus an extra 2 buttons if you are using buttonhole elastic for the waist) iron-on interfacing for the buttonholes and thread to match. Full-sized pattern pieces are also included in this book; photocopy the pages or simply cut them out of the book, then tile as per the instructions to assemble the complete pattern. Complete beginner-friendly instructions are included, along with a one page quick-glance cheat sheet guide for more advanced sewistas.

**Promoting Employee Health** David J. Murray-Bruce, 2016-07-27 The physical and mental health of an employee influences attendance and quality of work. Indifferent health, lack of a sense of well-being, affects both the individual and the efficiency of the organisation. This book is intended to give general and specific guidance to the non-medical person involved with the health of people working in offices and similar surroundings, on the common cause of ill-health of staff and

factors at work which influence health.

Women and Health Marlene B. Goldman, Rebecca Troisi, Kathryn M. Rexrode, 2012-12-31 Women and Health is a comprehensive reference that addresses health issues affecting women of all ages — from adolescence through maturity. It goes far beyond other books on this topic, which concentrate only on reproductive health, and has a truly international perspective. It covers key issues ranging from osteoporosis to breast cancer and other cancers, domestic violence, sexually transmitted diseases, occupational hazards, eating disorders, heart disease and other chronic illnesses, substance abuse, and societal and behavioral influences on health. In this second edition of Women and Health, chapters thoughtfully explore the current state of women's health and health care, including the influences of sex and gender on the occurrence of a wide variety of diseases and conditions. All chapters have been extensively updated and emphasize the epidemiology of the condition — the etiology, occurrence, primary and secondary prevention (screening), risk factors, surveillance, changing trends over time, and critical analysis of the diagnostic and treatment options and controversies. Treatment sections in each chapter have been expanded to create a stronger dialogue between epidemiologists and women's health practitioners. Saves researchers and clinicians time in quickly accessing the very latest details on a broad range of women's health issues, as opposed to searching through thousands of journal articles Provides a common language for epidemiologists, public health practitioners, and women's health specialists to discuss the behavioral, cultural, and biological determinants of women's health Researchers and medical specialists will learn how the gender-specific risks and features of one organ system's diseases affect the health of other organ systems For example: Hormone replacement therapy used to treat imbalance within the endocrine system is also being used to prevent and treat cardiovascular disease; Drugs developed for type 2 diabetes are now being used in chemoprevention Orients the non-gerontologist about the importance of considering the entire life cycle of women within research designs and treatment plans Professors teaching courses in women's health will use slides and additional materials to structure lectures/courses; students will use slides as a unique resource to study for exams
