Digital Activism in Asia Reader Nishant Shah, Sumandro Chattopadhyay, Puthiya Purayil Sneha, 2015-10-23 The digital turn might as well be marked as an Asian turn. From flash-mobs in Taiwan to feminist mobilisations in India, from hybrid media strategies of Syrian activists to cultural protests in Thailand, we see the emergence of political acts that transform the citizen from being a beneficiary of change to becoming an agent of change. In co-shaping these changes, what the digital shall be used for, and what its consequences will be, are both up for speculation and negotiation. Digital Activism in Asia marks a particular shift where these questions are no longer being refracted through the ICT4D logic, or the West's attempts to save Asia from itself, but shaped by multiplicity, unevenness, and urgencies of digital sites and users in Asia. This reader crowd-sources critical tools, concepts, analyses, and annotations, self-identified by a network of change makers in Asia as important in their own practices within their own contexts.

Visualizing Coregency Lisa Saladino Haney, 2020-03-31 In *Visualizing Coregency*, Lisa Saladino Haney presents both a comprehensive accounting of the evidence for coregency during Egypt's 12th Dynasty and a detailed analysis of the full corpus of royal statuary attributed to Senwosret III and Amenemhet III.

Research and Advanced Technology for Digital Libraries Trond Aalberg, Christos Papatheodorou, Milena Dobрева, Giannis Tsakonas, Charles J. Farrugia, 2013-08-30 This book constitutes the refereed proceedings of the International Conference on Theory and Practice of Digital Libraries, TPD 2013 (formerly European Conference on Research and Advanced Technology for Digital Libraries, ECDL) held in Valletta, Malta, in September 2013. The 24 full papers, 13 short papers, 22 posters and 8 demonstrations presented in this volume were carefully reviewed and selected from 158 submissions. The papers cover a wide range of research topics, clustered in four broader areas: foundation, infrastructures, content, and services. They have been organized in topical sections on conceptual models and formal issues, aggregation and archiving, user behavior, digital curation, mining and extraction, architectures and interoperability, interfaces to digital libraries, semantic web, information retrieval and browsing, and preservation. Also included are 6 tutorials and 2 panels.

Wes Anderson's Symbolic Storyworld Warren Buckland, 2018-10-18 Wes Anderson's *Symbolic Storyworld* presents a theoretical investigation of what makes the films of Wes Anderson distinctive. Chapter by chapter, it relentlessly pulls apart each of Anderson's narratives to pursue the proposition that they all share the same deep underlying symbolic values – a

common symbolic storyworld. Taking the polemical strategy of outlining and employing Claude Lévi-Strauss's distinguished (and notorious) work on myth and kinship to analyze eight of Anderson's films, Warren Buckland unearths the peculiar symbolic structure of each film, plus the circuits of exchange, tangible and intangible gift giving, and unusual kinship systems that govern the lives of Anderson's characters. He also provides an analysis of Wes Anderson's visual and aural style, identifying several distinctive traits of Anderson's *mise en scène*.

Marble Past, Monumental Present Michael Greenhalgh, 2009 This survey and synthesis of the structural and decorative uses of Roman remains, particularly marble, throughout the mediaeval Mediterranean, deals with the Christian West - but also Byzantium and Islam, each the inheritor of much Roman territory. It includes a 5000-image DVD.

Principles of Generative Phonology John T. Jensen, 2004-07-29 *Principles of Generative Phonology* is a basic, thorough introduction to phonological theory and practice. It aims to provide a firm foundation in the theory of distinctive features, phonological rules and rule ordering, which is essential to be able to appreciate recent developments and discussions in phonological theory. Chapter 1 is a review of phonetics; chapter 2 discusses contrast and distribution, with emphasis on rules as the mechanism for describing distributions; chapter 3 introduces distinctive features, natural classes, and redundancy; chapter 4 builds on the concept of rules and shows how these can account for alternations; chapter 5 demonstrates the use of rule ordering; chapter 6 discusses abstractness and underlying representations; chapter 7 discusses post-SPE developments, serving as a prelude to more advanced texts. Each chapter includes exercises to guide the student in the application of the principles introduced in that chapter and to encourage thinking about theoretical issues. The text has been classroom tested.

Child Abuse and the Legal System Inger J. Sagatun, Leonard P. Edwards, 1995 This ground-breaking text examines the legal contexts in which child abuse can be handled, including the criminal, juvenile, domestic relations, and civil courts. The authors focus on the legal rules in each type of proceeding and the ways in which the law has changed to accommodate the special needs of the children in the last fifteen years. Case studies provide examples and help identify the most important issues of child abuse facing the legal system. Child abuse is now a major part of the American legal landscape, involving not only the courts, but also law enforcement and child protection agencies. This is the first text for classroom use to systematically examine the fate of children in the legal system.

Babylonian Horoscopes Francesca Rochberg, 1998 Emerging for the first time in the 5th cent. B.C., horoscopes reflect the application of the idea and practice of celestial divination to the life of the individual. Whereas an omen focuses on a single astronomical phenomenon, the horoscope takes into account the positions of the moon, sun, and five planets at the moment of a birth. As such, Babylonian horoscopes presuppose the concept of the ecliptic and a methodology for obtaining the positions of heavenly bodies when they are not observable. This is the first complete edition of the extant cuneiform horoscopes -- with transcription and philological and astronomical commentary. This study offers a systematic description of the documents as a definable class of Babylonian astronomical/astrological texts.

Discourses of the Vanishing Marilyn Ivy, 2010-02-15 Japan today is haunted by the ghosts its spectacular modernity has generated. Deep anxieties about the potential loss of national identity and continuity disturb many in Japan, despite widespread insistence that it has remained culturally intact. In this provocative conjoining of ethnography, history, and cultural criticism, Marilyn Ivy discloses these anxieties—and the attempts to contain them—as she tracks what she calls the vanishing: marginalized events, sites, and cultural practices suspended at moments of impending disappearance. Ivy shows how a fascination with cultural margins accompanied the emergence of Japan as a modern nation-state. This fascination culminated in the early twentieth-century establishment of Japanese folklore studies and its attempts to record the spectral,

sometimes violent, narratives of those margins. She then traces the obsession with the vanishing through a range of contemporary reconfigurations: efforts by remote communities to promote themselves as nostalgic sites of authenticity, storytelling practices as signs of premodern presence, mass travel campaigns, recallings of the dead by blind mediums, and itinerant, kabuki-inspired populist theater.

Pink Globalization Christine Reiko Yano, 2013-04-29 Tracing the global circulation and consumption of Hello Kitty, Christine R. Yano analyzes the spread of Japanese cute-cool culture, which she sees as combining kitsch with an ironic self-referentiality.

The Polis in the Hellenistic World Henning Börm, Nino Luraghi, 2018 After having been for decades the province of a relatively small group of scholars, the Hellenistic polis has become central to the research agenda of Ancient historians more broadly. This development can be traced from the early nineties of the last century, and has picked up pace in a sustained fashion at the turn of the millennium. Recent research has started approaching the Greek polis of the centuries between Alexander and Cleopatra as a specific historical phenomenon, striving to define its most peculiar aspects from as many angles as possible, and to point to new avenues of interpretation that might contribute to recognizing its historical role. 0In this general framework, this volume attempts to explore new lines of thought, to question established ways of reading the evidence, and to take stock of recent developments. The contributors do not subscribe to any particular shared approach; on the contrary, their approaches and questions stem from many different scholarly traditions and methodologies. Rather than seeking to achieve a complete coverage, the volume provides a selection of current research agendas, in many cases offering glimpses of ongoing projects.
