The No-Drop Zone Patrick Brady,2011 The No-Drop Zone contains all the information necessary for new cyclists to gain the knowledge and skills to take them from buying their first bicycle to starting their first race. Cyclists learn how to handle the bike, perform minor maintenance, select clothing and accessories, join clubs, and find events. The book also covers every aspect of riding in a group, emphasizing such specific skills as how to avoid bumping into other riders when riding in close quarters and fixing a flat quickly enough to rejoin the group. Author Patrick Brady explores the particular pleasures that come from group riding, a unique experience at once social (talking with friends while riding), exciting (descending in a group), and exhilarating (finishing a long hill). Brady also details the enormous fitness benefits of riding in a group. The No-Drop Zone has all the knowledge a cyclist needs to move to that next level of skill.

My Likeness Taken Joan L. Severa, 2005 During the nineteenth century - a time of great technical and cultural change - fashion was a cultivating force in the development of American society, influenced by one's social status, geographic location, and economic standing. *My Likeness Taken* is a collection of daguerreotype portraits of men, women, and children taken between 1840 and 1860. Selected from the top collections in the United States, each image is analyzed to clarify datable clothing and fashion components. With subjects from among the best-dressed members of society, these portraits - reproduced in full color - reflect the latest fashion developments, trends, and influences. For students of photographic and costume history, this is extraordinary material. Many of these images have never before been published, and Severa's keen analysis adds immeasurably to our understanding of the importance of dress in American society. Photo archivists and collectors, costume curators, social historians, material culturalists, and theater designers will find *My Likeness Taken* an invaluable resource.

Design of Clothing Manufacturing Processes Jelka Geršak, 2013-07-31 The era of mass manufacturing of clothing and other textile products is coming to an end; what is emerging is a post-industrial production system that is able to achieve the goal of mass-customised, low volume production, where the conventional borders between product design, production and user are beginning to merge. To continue developing knowledge on how to design better products and services, we need to design better clothing manufacturing processes grounded in science, technology, and management to help the clothing industry to compete more effectively. *Design of clothing manufacturing processes* reviews key issues in the design of more rapid, integrated and flexible clothing manufacturing processes. The eight chapters of the book provide a detailed coverage

of the design of clothing manufacturing processes using a systematic approach to planning, scheduling and control. The book starts with an overview of standardised clothing classification systems and terminologies for individual clothing types. Chapter 2 explores the development of standardised sizing systems. Chapter 3 reviews the key issues in the development of a garment collection. Chapters 4 to 7 discuss particular aspects of clothing production, ranging from planning and organization to monitoring and control. Finally, chapter 8 provides an overview of common quality requirements for clothing textile materials. Design of clothing manufacturing processes is intended for R&D managers, researchers, technologists and designers throughout the clothing industry, as well as academic researchers in the field of clothing design, engineering and other aspects of clothing production. Considers in detail the design of sizing and classification systems Discusses the planning required in all aspects of clothing production from design and pattern making to manufacture Overviews the management of clothing production and material quality requirements
