Women in White Coats Olivia Campbell, 2022-09-15 Meet the pioneering women who changed the medical landscape for us all For fans of *Hidden Figures* and *Radium Girls* comes the remarkable story of three Victorian women who broke down barriers in the medical field to become the first women doctors, revolutionising the way women receive health care. In the early 1800s, women were dying in large numbers from treatable diseases because they avoided receiving medical care. Examinations performed by male doctors were often demeaning and even painful. In addition, women faced stigma from illness--a diagnosis could greatly limit their ability to find husbands, jobs or be received in polite society. Motivated by personal loss and frustration over inadequate medical care, Elizabeth Blackwell, Elizabeth Garrett Anderson and Sophia Jex-Blake fought for a woman's place in the male-dominated medical field. For the first time ever, *Women in White Coats* tells the complete history of these three pioneering women who, despite countless obstacles, earned medical degrees and paved the way for other women to do the same. Though very different in personality and circumstance, together these women built

women-run hospitals and teaching colleges - creating for the first time medical care for women by women. With gripping storytelling based on extensive research and access to archival documents, *Women in White Coats* tells the courageous history these women made by becoming doctors, detailing the boundaries they broke of gender and science to reshape how we receive medical care today.

Poetry and the Global Climate Crisis Amatoritsero Ede, Sandra Lee Kleppe, Angela Sorby, 2023-12-11 This book demonstrates how humans can become sensitized to, and intervene in, environmental degradation by writing, reading, analyzing, and teaching poetry. It offers both theoretical and practice-based essays, providing a diversity of approaches and voices that will be useful in the classroom and beyond. The chapters in this edited collection explore how poetry can make readers climate-ready and climate-responsive through creativity, empathy, and empowerment. The book encompasses work from or about Oceania, Africa, Europe, North America, Asia, and Antarctica, integrating poetry into discussions of specific local and global issues, including the value of Indigenous responses to climate change; the dynamics of climate migration; the shifting boundaries between the human and more-than-human world; the ecopoetics of the prison-industrial complex; and the ongoing environmental effects of colonialism, racism, and sexism. With numerous examples of how poetry reading, teaching, and learning can enhance or modify mindsets, the book focuses on offering creative, practical approaches and tools that educators can implement into their teaching and equipping them with the theoretical knowledge to support these. This volume will appeal to educational professionals engaged in teaching environmental, sustainability, and development topics, particularly from a humanities-led perspective.

Regeneration Paul Hawken, 2021-09-21 A radically new understanding of and practical approach to climate change by noted environmentalist Paul Hawken, creator of the New York Times bestseller *Drawdown* *Regeneration* offers a visionary new approach to climate change, one that weaves justice, climate, biodiversity, equity, and human dignity into a seamless tapestry of action, policy, and transformation that can end the climate crisis in one generation. It is the first book to describe and define the burgeoning regeneration movement spreading rapidly throughout the world. *Regeneration* describes how an inclusive movement can engage the majority of humanity to save the world from the threat of global warming, with climate solutions that directly serve our children, the poor, and the excluded. This means we must address current human needs, not future existential threats, real as they are, with initiatives that include but go well beyond solar, electric vehicles, and tree planting to include such solutions as the fifteen-minute city, bioregions, azolla fern, food localization, fire ecology, decommodification, forests as farms, and the number one solution for the world: electrifying everything. Paul Hawken and the nonprofit *Regeneration Organization* are launching a series of initiatives to accompany the book, including a streaming video series, curriculum, podcasts, teaching videos, and climate action software. *Regeneration* is the inspiring and necessary guide to inform the rapidly spreading climate movement.

Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on the Impacts of Sexual Harassment in Academia, 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

A Global Humanities Approach to the United Nations' Sustainable Development Goals Kelly Comfort, 2023-09-20 This edited textbook explores the 17 UN SDGs through 12 works from the humanities, including films, novels, and photographic collections. It provides students with the knowledge and understanding of how the humanities engage in broader social, political, economic, and environmental dialogue, offering a global perspective that crosses national and continental borders. The book takes students through the UN SDGs from a theoretical perspective through to practical applications, first through specific global humanities examples and then through students' own final projects and reflections. Centered around three major themes of planet, people, and prosperity, the textbook encourages students to explore and apply the Goals using a place-based, culturally rooted approach while simultaneously acknowledging and understanding their global importance. The text's examples range from documentary and feature film to photography and literature, including Wang Jiuliang's *Plastic China*, Kip Andersen and Keegan Kuhn's *Cowspiracy: The Sustainability Secret*, Barbara Dombrowski's *Tropic Ice: Dialog Between Places Affected by Climate Change*, and Aravind Adiga's *The White Tiger*, among others. Providing diverse geographic and cultural perspectives, the works take readers to Argentina, Australia, China, Costa Rica, Ecuador, France, Greenland, Haiti, India, Japan, Peru, Rwanda, Senegal, and the United States. This broad textbook can be used by students and instructors at undergraduate and postgraduate levels from any subject background, particularly, but not exclusively, those in the humanities. With added discussion questions, research assignments, writing prompts, and creative project ideas, students will gain a nuanced understanding of the interconnectivity between social, cultural, ethical, political, economic, and environmental factors.

ELT, Gender and International Development Roslyn Appleby, 2010 For believers in the power of English, language as aid can deliver the promise of a brighter future; but in a neocolonial world of international development, a gulf exists between belief and reality. Rich with echoes of an earlier colonial era, this book draws on the candid narratives of white women teachers, and situates classroom practices within a broad reading of the West and the Rest What happens when white Western men and women come in to rebuild former colonies in Asia? How do English language lessons translate, or

disintegrate, in a radically different world? How is English teaching linked to ideas of progress? This book presents the paradoxes of language aid in the 21st century in a way that will challenge your views of English and its power to improve the lives of people in the developing world. This book's focus on gender relations in development contexts, its superb deconstruction of aid agencies in situ, the gendered space of ELT classrooms and the voices of ELT teachers working in development contexts is unique. This book should be read not only by sociolinguists, sociologists, critical theorists and theorists of development working in the academy but also NGOs and aid agencies working in post-trauma societies. There is much to be learned here. Naz Rassool, The University of Reading, UK
