Systems Factorial Technology Daniel Little, Nicholas Altieri, Mario Fific, Cheng-Ta Yang, 2017-04-10 *Systems Factorial Technology: A Theory Driven Methodology for the Identification of Perceptual and Cognitive Mechanisms* explores the theoretical and methodological tools used to investigate fundamental questions central to basic psychological and perceptual processes. Such processes include detection, identification, classification, recognition, and decision-making. This book collects the tools that allow researchers to deal with the pervasive model mimicry problems which exist in standard experimental and theoretical paradigms and includes novel applications to not only basic psychological questions, but also clinical diagnosis and links to neuroscience. Researchers can use this book to begin using the methodology behind SFT and to get an overview of current uses and future directions. The collected developments and applications of SFT allow us to peer inside the human mind and provide strong constraints on psychological theory. Provides a thorough introduction to the diagnostic tools offered by SFT Includes a tutorial on applying the method to reaction time data from a variety of different situations Introduces novel advances for testing the significance of SFT results Incorporates new measures that allow for the relaxation of the high accuracy criterion Examines tools to expand the scope of SFT analyses Applies SFT to a spectrum of different cognitive domains across different sensory modalities

Foundations of Human Memory Michael Jacob Kahana, 2014-05-01 *Foundations of Human Memory* provides an introduction to the scientific study of human memory with an emphasis on both the major theories of memory and the laboratory studies that have been used to test those theories and inspire their further development. Written with the undergraduate student in mind, the text assumes no specific background in the subject, but a general familiarity with scientific method and quantitative approaches to the treatment of data. *Foundations of human memory* is organized around the major empirical paradigms used to study memory in the laboratory and the theories used to explain data obtained using those paradigms. The text begins with a focus on memory for individual items, building up to memory for associations between items, and finally to memory for entire sequences of items and the problem of memory search. Several major theories of memory are considered in detail, including strength theory, summed-similarity theory, neural network based theories, retrieved-context theory, and theories based on the division of memory into separate short-term and long-term storage systems. The text emphasizes basic research over applied problems, but brings in real-world examples and

neuroscientific evidence as appropriate.

Trends in Mathematical Psychology E. Degreef, J. Van Buggenhaut, 2000-04-01 This volume comprises a selection of the papers presented at the 14th European Mathematical Psychology Group Meeting, held in Brussels, and three invited lectures. Presented are results and developments in mathematical psychology, especially in the theory of perception and learning, order and measurement, and data analysis.

The Cognitive Artifacts of Designing Willemien Visser, 2006-08-08 In this dynamic review and synthesis of empirical research and theoretical discussion of design as cognitive activity, Willemien Visser reconciles and integrates the classical view of design, as conceptualized by Herbert Simon's symbolic information processing approach, with modern views of design such as the situativity approach, as formulated by Donald Schön. The author goes on to develop her own view on design, in which design is most appropriately characterized as a construction of representations. The Cognitive Artifacts of Designing takes seriously the idea that design research warrants development in the cognitive sciences, and Visser lays the groundwork for the integration of design research and cognitive science. This seemingly simple framework -- designing is the construction of representations -- has implications that set the stage for this mutually beneficial integration. This volume will be of great interest to scholars concerned with design -- not only in cognitive design studies, but also in design methodology and engineering -- as well as cognitive scientists who are interested in problem solving in 'the real world.' Cognitive ergonomists and design practitioners will also be richly rewarded by a close reading of this volume.

The Leader's Guide to Lateral Thinking Skills Paul Sloane, 2006 Poses the question, how can you energize people to see problems not as obstacles to success but as opportunities for innovation? Looks at what makes a lateral leader - the kind of person who can create a climate of creativity by inspiring people to have the confidence to take risks, and who can then develop their skills in creative techniques. Presents practical exercises for implementing the principles of lateral thinking and uses real-life examples to illustrate the rules, principles and processes involved.

Collaborative Remembering Michelle L. Meade, Celia B. Harris, Penny Van Bergen, John Sutton, Amanda J. Barnier, 2018 We remember in social contexts. We reminisce about the past together, collaborate to remember shared experiences, and remember in the context of our communities and cultures. This book explores the topic of 'collaborative remembering' across a wide range of fields, including developmental, cognitive, and social psychology.

Elements of Architecture Pierre von Meiss, 2013-10-08 This internationally significant book analyzes architectural elements, drawing general principles from the prevailing pluralism of architectural approaches. Von Meiss expertly bridges the gap between history and contemporary work by pinpointing the constant factors that exist in all architecture. A comprehensive analysis of the whole architectural phenomenon, this valuable book will prove especially useful to modern practitioners who need to make constant reference to buildings of the past. Staying away from the ineffectual arguments on

styles that dominate today's architectural literature, this is the first recent book to attempt such a synthesis of architectural history and contemporary work. As such, it is unique.

Cities' Identity Through Architecture and Arts Anna Catalani, Zeinab Nour, Antonella Versaci, Dean Hawkes, Hocine Bougdah, Adolf Sotoca, Mahmoud Ghoneem, Ferdinando Trapani, 2018-05-01 Every city has its unique and valuable identity, this identity is revealed through its physical and visual form, it is seen through the eyes of its residents and users. The city develops over time, and its identity evolves with it. Reflecting the rapid and constant changes the city is subjected to, Architecture and Arts, is the embodiment of the cultural, historical, and economical characteristics of the city. This conference was dedicated to the investigation of the different new approaches developed in Architecture and Contemporary arts. It has focused on the basis of urban life and identities. This volume provides discussions on the examples and tendencies in dealing with urban identities as well as the transformation of cities and urban cultures mentioned in terms of their form, identity, and their current art. Contemporary art, when subjected to experiments, continues to be produced in various directions, to be consumed and to put forward new ideas. Art continuously renews itself, from new materials to different means of communication, from interactive works to computer games, from new approaches to perceptual paradigms and problems of city and nature of the millennium. This is an Open Access ebook, and can be found on www.taylorfrancis.com.

Creativity and Innovation Harry Nyström, 1979 Monograph on the role of Innovation and creative thinking in organization development - applies a multidisciplinary framework to business organization, examines balance between stability and change for various organizational structure, and presents models of marketing strategies, research and development, and of a cognitive-psychological approach to strategy formulation. Bibliography pp. 112 to 117 and statistical tables.
