**Looking Good . . . Every Day** Nancy Nix-Rice, 2014-09-01 Any woman can look and feel lovely, regardless of her age, bank balance, or pant size, and Looking Good . . . Every Day defines a simple yet sophisticated standard for women to determine exactly which clothes and accessories will showcase their unique beauty. The “points of connection” method explains that the more characteristics that exist in common between a woman and her outfit, the more lovely she will look. It shifts emphasis from hiding her perceived figure challenges and focuses on spotlighting her personal assets. By choosing wardrobe additions in this way, everything in her closet will work together. She has more outfits from fewer garments, allowing her to buy higher-quality garments without increasing her budget. Photography of real women—ranging from 22 to 80 years old and from size 4 to 24—illustrates the universal impact “points of connection” make in their appearance.

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs.

Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

*How to Slay* Constance C.R. White,2018-02-06 An inspirational journey through black fashion in America from the twentieth century to the present, featuring the most celebrated icons of Black style and taste. One of the few surveys of Black style and fashion ever published, How to Slay offers a lavishly illustrated overview of African American style through the twentieth century, focusing on the last thirty-five years. Through striking images of some of the most celebrated icons of Black style and taste, from Josephine Baker, Michelle Obama, Maya Angelou, and Miles Davis to Rihanna, Naomi Campbell, Kanye West, and Pharrell Williams, this book explores the cultural underpinnings of Black trends that have become so influential in mainstream popular culture and a bedrock of fashion vernacular today. A preponderance of Black musicians,

who for decades have inspired trends and transformed global fashion, are featured and discussed, while a diverse array of topics are touched upon and examined—hats, hair, divas, the importance of attitude, the use of color, '60s style, the influence of Africa and the Caribbean, and the beauty of black skin.

This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Communities in Action National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Population Health and Public Health Practice,Committee on Community-Based Solutions to Promote Health Equity in the United States,2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also

because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

**Demonic Grounds** Katherine McKittrick, 2006 In a long overdue contribution to geography and social theory, Katherine McKittrick offers a new and powerful interpretation of black women's geographic thought. In Canada, the Caribbean, and the United States, black women inhabit diasporic locations marked by the legacy of violence and slavery. Analyzing diverse literatures and material geographies, McKittrick reveals how human geographies are a result of racialized connections, and how spaces that are fraught with limitation are underacknowledged but meaningful sites of political opposition. *Demonic Grounds* moves between past and present, archives and fiction, theory and everyday, to focus on places negotiated by black women during and after the transatlantic slave trade. Specifically, the author addresses the geographic implications of slave auction blocks, Harriet Jacobs's attic, black Canada and New France, as well as the conceptual spaces of feminism and Sylvia Wynter's philosophies. Central to McKittrick's argument are the ways in which black women are not passive recipients of their surroundings and how a sense of place relates to the struggle against domination. Ultimately, McKittrick argues, these complex black geographies are alterable and may provide the opportunity for social and cultural change. Katherine McKittrick is assistant professor of women's studies at Queen's University.

**The Triangle Fire, Protocols Of Peace** Richard Greenwald, 2005-06-17 America searched for an answer to The Labor Question during the Progressive Era in an effort to avoid the unrest and violence that flared so often in the late nineteenth and early twentieth century. In the ladies' garment industry, a unique experiment in industrial democracy brought together labor, management, and the public. As Richard Greenwald explains, it was an attempt to square free market capitalism with ideals of democracy to provide a fair and just workplace. Led by Louis Brandeis, this group negotiated the Protocols of Peace. But in the midst of this experiment, 146 mostly young, immigrant women died in the Triangle Factory Fire of 1911. As a result of the fire, a second, interrelated experiment, New York's Factory Investigating Commission (FIC)—led by Robert Wagner and Al Smith—created one of the largest reform successes of the period. *The Triangle Fire, the Protocols of Peace, and Industrial Democracy in Progressive Era New York* uses these linked episodes to show the increasing interdependence of

labor, industry, and the state. Greenwald explains how the Protocols and the FIC best illustrate the transformation of industrial democracy and the struggle for political and economic justice.
