Handbook of Applied System Science Zachary P. Neal, 2016-11-25 The Handbook of Applied System Science is organized around both methodological approaches in systems science, and the substantive topic to which these approaches have been applied. The volume begins with an essay that introduces three system science methods: agent-based modeling, system dynamics, and network analysis. The remainder of the volume is organized around three broad topics: (1) health and human development, (2) environment and sustainability, and (3) communities and social change. Each part begins with a brief introductory essay, and includes nine chapters that demonstrate the application of system science methods to address research questions in these areas. This handbook will be useful for work in Public Health, Sociology, Criminal Justice, Social Work, Political Science, Environmental Studies, Urban Studies, and Psychology.

Eve on Top David Baker, Bernadette Casey, 2010-11-25 Eve on Top takes an in-depth look at the position of women in senior positions in the public sector using a case-study approach, based on ten 'successful' women and their background, upbringing, career progression, successes and failures, challenges and experiences. Each case study includes a 'lessons learned' response in the form of advice both to other women, and the organisations in which they work. Surrounding and supporting the case studies are short essays charting the main themes that emerge from the interview process, backed up by extensive literature reviews. The book also compares relevant public sectors in different parts of the world and concludes with several case studies. Summarises the commonality and the diversity of the challenges and issues Provides an analysis of the factors that help and hinder women in reaching the top positions Provides solutions suggested by detailed analysis of

real-life experiences

Ethical Values and the Integrity of the Climate Change Regime Hugh Breakey, Vesselin Popovski, 2016-05-23 This book investigates the ethical values that inform the global carbon integrity system, and reflects on alternative norms that could or should do so. The global carbon integrity system comprises the emerging international architecture being built to respond to the climate change. This architecture can be understood as an 'integrity system'- an inter-related set of institutions, governance arrangements, regulations and practices that work to ensure the system performs its role faithfully and effectively. This volume investigates the ways ethical values impact on where and how the integrity system works, where it fails, and how it can be improved. With a wide array of perspectives across many disciplines, including ethicists, philosophers, lawyers, governance experts and political theorists, the chapters seek to explore the positive values driving the global climate change processes, to offer an understanding of the motivations justifying the creation of the regime and the way that social norms impact upon the operation of the integrity system. The collection focuses on the nexus between ideal ethics and real-world implementation through institutions and laws. The book will be of interest to policy makers, climate change experts, carbon taxation regulators, academics, legal practitioners and researchers.

Gender, Intersectionality and Climate Institutions in Industrialised States Gunnhildur Lily Magnusdottir, Annica Kronsell, 2021-06-16 This book explores how climate institutions in industrialized countries work to further the recognition of social differences and integrate this understanding in climate policy making. With contributions from a range of expert scholars in the field, this volume investigates policy-making in climate institutions from the perspective of power as it relates to gender. It also considers other intersecting social factors at different levels of governance, from the global to the local level and extending into climate-relevant sectors. The authors argue that a focus on climate institutions is important since they not only develop strategies and policies, they also (re)produce power relations, promote specific norms and values, and distribute resources. The chapters throughout draw on examples from various institutions including national ministries, transport and waste management authorities, and local authorities, as well as the European Union and the UNFCCC regime. Overall, this book demonstrates how feminist institutionalist theory and intersectionality approaches can contribute to an increased understanding of power relations and social differences in climate policy-making and in climate-relevant sectors in industrialized states. In doing so, it highlights the challenges of path dependencies, but also reveals opportunities for advancing gender equality, equity, and social justice. *Gender, Intersectionality and Climate Institutions in Industrialized States* will be of great interest to students and scholars of climate politics, international relations, gender studies and policy studies. Laudato Si Pope Francis, 2015-07-18 "In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" - Pope Francis, Laudato Si' In his second encyclical, Laudato Si': On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. Natural Disaster and Development in a Globalizing World Mark Pelling, 2003-08-29 The number of humanitarian disasters triggered by a natural hazard has doubled every decade since the 1960s. At the same time, the global economic growth rate per capita is twice its 1960s value. Does this mean economic growth is independent of the impacts of natural disaster? *Natural Disaster and Development in a Globalizing World* is the first book to acknowledge the full implications of globalization for disaster and development. The contributors to this book fully examine: global processes and how they might affect disaster risk at the global scale. links between international issues - such as diplomatic relations, the growth of non-governmental organizations and the health of the international insurance industry - and disaster risk the interaction of these large scale forces with local conditions through case study analysis of individual disaster events. In his revealing work, author Pelling makes clear the links between global scale processes and local experiences of disaster, and underlies the difficulty of attributing blame for individual disasters on specific global pressures. He argues that action to reduce disaster must be coordinated at the local, national and global scales and that there is a need for greater integration across the physical and social sciences. In this context, the human rights agenda is seen as a way of moving disaster reduction efforts forward.

War Through Italian Eyes Alexander Henry, 2021-07-18 There is a popular notion that the Italian armed forces of the Second World War were an inferior fighting force. Despite the vast numbers taken prisoner, detailed studies of the experiences of these soldiers remain relatively uncommon and the value of this group to furthering our understanding of the Italian experience of war under Fascism is also rarely acknowledged. The existence in the National Archives of hundreds of pages of transcripts of covert British surveillance of Italian POWs has made it possible to engage with their experiences and opinions in much greater depth. The euphemistically termed 'Special Reports' present historians with a unique insight into how all levels of Italian soldiery viewed Fascist Italy's experience of war, 1940-1943. This book examines reactions to Italian political leadership, the progress of the war, as well as Italian soldiers' 'everyday' views on sex, war, the enemy, death, food, their allies, bravery, race, and killing. These fascinating documents reveal the complexity of the outlook of these men, which persistent - and influential - national stereotypes and historiographical trends fail to acknowledge.

Brazil and Climate Change Viola Eduardo, Matías Franchini, 2017-10-23 Climate change is increasingly a part of the human experience. As the problem worsens, the cooperative dilemma that the issue carries has become evident: climate change is a complex problem that systematically gets insufficient answers from the international system. This book offers an assessment of Brazil's role in the global political economy of climate change. The authors, Eduardo Viola and Matías Franchini expertly review and answer the most common and widely cited questions on whether and in which way Brazil is aggravating or mitigating the climate crisis, including: Is it the benign, cooperative, environmental power that the Brazilian government claims it is? Why was it possible to dramatically reduce deforestation in the Amazon (2005-2010) and, more recently, was there a partial reversion? The book provides an accessible—and much needed—introduction to all those studying the challenges of the international system in the Anthropocene. Through a thorough analysis of Brazil in perspective vis a vis other emerging countries, this book provides an engaging introduction and up to date assessment of the climate reality of Brazil and a framework to analyze the climate performance of major economies, both on emission trajectory and policy profile: the climate commitment approach. Brazil and Climate Change is essential reading for all students of Environmental Studies, Latin American Studies, International Relations and Comparative Politics.
