Building Chicago's Subways David Sadowski, 2018 While the elevated Chicago Loop is justly famous as a symbol of the city, the fascinating history of its subways is less well known. The City of Chicago broke ground on what would become the Initial System of Subways during the Great Depression and finished 20 years later. This gigantic construction project, a part of the New Deal, would overcome many obstacles while tunneling through Chicago's soft blue clay, under congested downtown streets, and even beneath the mighty Chicago River. Chicago's first rapid transit subway opened in 1943 after decades of wrangling over routes, financing, and logistics. It grew to encompass the State Street, Dearborn-Milwaukee, and West Side Subways, with the latter modernizing the old Garfield Park L into the median of Chicago's first expressway. Take a trip underground and see how Chicago's I Will spirit overcame challenges and persevered to help with the successful building of the subways that move millions. Building Chicago's subways was national news and a matter of considerable civic pride--making it a Second City no more

Investigations on the Gray Snapper, *Lutjanus Griseus* Walter A. Starck, Robert E. Schroeder, 1971 Gray snappers were collected from four different habitats and examined for trematodes. The incidence of each trematode was calculated for each habitat during each season. Intermediate hosts of the trematodes were also collected. It was found that the habitat in which gray snappers reside is more important than their size, sex, or the season of the year in determining the nature of their trematode populations. This may be the result of the intermediate host distribution being regulated by the habitat. Seasonal changes in trematode populations result from fish movements, such as spawning migrations or movements in response to cold water. The differences between the trematode populations of large and small snappers probably are a function of their residing in different habitats and eating different organisms. The sex of gray snappers has no discernable [i.e. discernible] effect on their trematode populations. *Metadena obscura* sp. n. (Cryptogonimidae) was found in the pyloric caeca and intestine of *Lutjanus griseus* (Linnaeus). Nine species of trematodes were found in the intestine and pyloric caeca of *Lutjanus griseus* near Lower Matecumbe Key: *Metadena globosa*, *M. adglobosa*, *M. obscura*, *Paracryptogonimus neoamericanus*, *Hamacreadium mutabile*, *H. gulella*, *Helicometrina nimia*, *Helicometra execta*, and *Stephanostomum casum*.

Environmental Justice and Environmentalism Ronald Sandler, Ronald D. Sandler, Ronald L. Sandler, Phaedra C. Pezzullo, 2007 In ten essays, contributors from a variety of disciplines consider such topics as the relationship between the two movements' ethical commitments and activist goals, instances of successful cooperation in U.S. contexts, and the challenges posed to both movements by globalisation and climate change.

My Omaha Obsession Miss Cassette, 2020-11 My Omaha Obsession takes the reader on an idiosyncratic tour through some of Omaha's neighborhoods, buildings, architecture, and people, celebrating the city's unusual history. Rather than covering the city's best-known sites, Miss Cassette is irresistibly drawn to strange little buildings and glorious large homes that don't exist anymore as well as to stories of Harkert's Holsum Hamburgers and the Twenties Club. Piecing together the records of buildings and homes and everything interesting that came after, Miss Cassette shares her observations of the property and its significance to Omaha. She scrutinizes land deeds, insurance maps, tax records, and old newspaper articles to uncover a property's singular story. Through conversations with fellow detectives and history enthusiasts, she guides readers along her path of hunches, personal interests, mishaps, and more. As a longtime resident of Omaha, Miss Cassette is informed by memories of her youth combined with an enduring curiosity about the city's offbeat relics and remains. Part memoir and part research guide with a healthy dose of colorful wandering, My Omaha Obsession celebrates the historic built environment and searches for the people who shaped early Omaha.

Global Healing Karen Laura Thornber,2020-03-02 Read an interview with Karen Thornber. In *Global Healing: Literature, Advocacy, Care*, Karen Laura Thornber analyzes how narratives from diverse communities globally engage with a broad variety of diseases and other serious health conditions and advocate for empathic, compassionate, and respectful care that facilitates healing and enables wellbeing. The three parts of this book discuss writings from Africa, the Americas, Asia, Europe, the Middle East, and Oceania that implore societies to shatter the devastating social stigmas which prevent billions from accessing effective care; to increase the availability of quality person-focused healthcare; and to prioritize partnerships that facilitate healing and enable wellbeing for both patients and loved ones. Thornber's *Global Healing* remaps the contours of comparative literature, world literature, the medical humanities, and the health humanities. Watch a video interview with Thornber by the Mahindra Humanities Center, part of their conversations on Covid-19. Read an interview with Thornber on Brill's Humanities Matter blog.

Original Jaguar XK Philip Porter,2012-05-01 Packed full of material to fascinate and inform Jaguar XK owners, restorers and enthusiasts, this is the new, third edition of this perennial best-seller with new information and photographs. The guide to 100% originality, this edition includes over 50 cars specially photographed; bodywork, interior and mechanical details; and barn-find cars as they were discovered.

Chicago Trolleys David Sadowski,2017 Chicago's extensive transit system first started in 1859, when horsecars ran on rails in city streets. Cable cars and electric streetcars came next. Where new trolley car lines were built, people, businesses, and neighborhoods followed. Chicago quickly became a world-class city. At its peak, Chicago had over 3,000 streetcars and 1,000 miles of track--the largest such system in the world. By the 1930s, there were also streamlined trolleys and trolley buses on rubber tires. Some parts of Chicago's famous L system also used trolley wire instead of a third rail. Trolley cars

once took people from the Loop to such faraway places as Aurora, Elgin, Milwaukee, and South Bend. A few still run today.

Chicago's Lost "L"s David Sadowski, 2021-07-12 Chicago's system of elevated railways, known locally as the L, has run continuously since 1892 and, like the city, has never stood still. It helped neighborhoods grow, brought their increasingly diverse populations together, and gave the famous Loop its name. But today's system has changed radically over the years. Chicago's Lost Ls tells the story of former lines such as Garfield Park, Humboldt Park, Kenwood, Stockyards, Normal Park, Westchester, and Niles Center. It was once possible to take high-speed trains on the L directly to Aurora, Elgin, and Milwaukee, Wisconsin. The L started out as four different companies, two starting out using steam engines instead of electricity. Eventually, all four came together via the Union Loop. The L is more than a way of getting around. Its trains are a place where people meet and interact. Some say the best way to experience the city is via the L, with its second-story view. Chicago's Lost Ls is virtually a secret history of Chicago, and this is your ticket.
