Investigations on the Gray Snapper, Lutjanus Griseus Walter A. Starck, Robert E. Schroeder, 1971 Gray snappers were collected from four different habitats and examined for trematodes. The incidence of each trematode was calculated for each habitat during each season. Intermediate hosts of the trematodes were also collected. It was found that the habitat in which gray snappers reside is more important than their size, sex, or the season of the year in determining the nature of their trematode populations. This may be the result of the intermediate host distribution being regulated by the habitat. Seasonal changes in trematode populations result from fish movements, such as spawning migrations or movements in response to cold water. The differences between the trematode populations of large and small snappers probably are a function of their residing in different habitats and eating different organisms. The sex of gray snappers has no discernable [i.e. discernible] effect on their trematode populations. *Metadana obscura* sp. n. (Cryptogonimidae) was found in the pyloric caeca and

intestine of *Lutjanus griseus* (Linnaeus). Nine species of trematodes were found in the intestine and pyloric caeca of *Lutjanus griseus* near Lower Matecumbe Key: *Metadena globosa*, *M. adglobosa*, *M. obscura*, *Paracryptogonimus neoamericanus*, *Hamacreadium mutabile*, *H. gulella*, *Helicometrina nimia*, *Helicometra execta*, and *Stephanostomum casum*.

The Economics of New Goods Timothy F. Bresnahan, Robert J. Gordon, 2008-04-15 New goods are at the heart of economic progress. The eleven essays in this volume include historical treatments of new goods and their diffusion; practical exercises in measurement addressed to recent and ongoing innovations; and real-world methods of devising quantitative adjustments for quality change. The lead article in Part I contains a striking analysis of the history of light over two millennia. Other essays in Part I develop new price indexes for automobiles back to 1906; trace the role of the air conditioner in the development of the American south; and treat the germ theory of disease as an economic innovation. In Part II essays measure the economic impact of more recent innovations, including anti-ulcer drugs, new breakfast cereals, and computers. Part III explores methods and defects in the treatment of quality change in the official price data of the United States, Canada, and Japan. This pathbreaking volume will interest anyone who studies economic growth, productivity, and the American standard of living.
