*Úrsula Oswald Spring: Pioneer on Gender, Peace, Development, Environment, Food and Water* Úrsula Oswald Spring, 2018-09-04 This book aims to initiate among students and other readers critical and interdisciplinary reflections on key problems concerning development, gender relations, peace and environment, with a special emphasis on North-South relations. This volume offers a selection of the author's research in different parts of the world during 50 years of contributing to an interdisciplinary scientific debate and addressing social answers to urgent global problems. After the author's biography and bibliography, the second part analyses the development processes of several countries in the South that resulted in a dynamic of underdevelopment. The deep-rooted gender discrimination is also reflected in the destructive exploitation of natural resources and the pollution of soils, water and air. Since the beginning of the Anthropocene in the mid-20th century, the management of human society and global resources has been unsustainable and has created global environmental change and multiple conflicts over scarce and polluted resources. Peace and development policies aiming at gender equity and sustainable environmental management, where water and food are crucial for the survival of humankind, focus on systemic alternatives embedded in a path of sustainability transition. • This book reviews multiple influences from Europe, Africa and Latin America on a leading social scientist and activist on gender, development and environment aiming at a world with equity, sustainability, peace and harmony between nature and humans. • This pioneer volume analyses social and environmental conflicts and peace processes in Latin America, with a special focus on Mexico, by addressing the

development of under-development, global environmental change, poverty, nutrition and the North-South gap. • This volume focuses on environmental deterioration with a special emphasis on food and water and proposes systemic changes towards a sustainability transition with peace, regional development and gender equity. • This pioneering work offers alternative approaches to regional development, food sovereignty and holistic development processes from a gender perspective.

Molas Diana Marks, 2016-10-01 Molas, the distinctive blouses made and worn by Kuna women in Panama, are collected by thousands of enthusiasts as well as by anthropological museums all over the world. They are recognized everywhere as an identifier of the Kuna people and also of Panama. This book, based on original research, explores the origin of the mola in the early twentieth century, how it became part of the everyday dress of Kuna women, and its role in creating Kuna identity. Images drawn from more than twenty museums as well as private collections show the development of designs and techniques and highlight changes in the garment as an item of indigenous fashion. Applying an interdisciplinary approach—fusing historical, ethnographic, and material culture studies—author Diana Marks contributes to ongoing debates on cultural authenticity, the invention of traditions, and issues of gender and politics.

Shock Waves Stephane Hallegatte, Mook Bangalore, Laura Bonzanigo, Marianne Fay, Tamaro Kane, Ulf Narloch, Julie Rozenberg, David Treguer, Adrien Vogt-Schilb, 2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win” situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

- A comprehensive overview of the issues related to human behavior and the social environment that are important to understand for practice, updated with current and relevant information on important topics in social work. Additional relevant content, contemporary theories, and intervention modalities are incorporated throughout the text to keep students up to date with what is happening in the field.
- Careful organization of chapters to first present foundational theoretical perspectives on the human condition, and then provide information on basic facets of human development, encouraging students to use conceptual lenses to inform their practice with individuals at different stages of life. Four final chapters cover theoretical foundations and issues surrounding spirituality, families and groups, organizations, and communities. These chapters offer in-depth information and discussions on mezzo and macro content. The organization of the chapters also helps students better understand how contemporary theories and approaches to issues stem from foundational theories and how they can be used to inform work with clients.
- Particular emphasis on the ways in which poverty, diversity, and strengths affect human development and behavior.
- The opportunity to see how the concepts fit into social work practice using case examples that open each chapter and are referred to throughout the chapter.
- Interactive case studies at [www.routledgesw.com/cases](http://www.routledgesw.com/cases): Six easy-to-access fictional cases with dynamic characters and situations that students can easily reach from any computer and that provide a “learning by doing” format unavailable with any other text. - Ideal for use in online as well as hybrid course instruction—in addition to traditional “bricks and mortar” classes. This bestseller is ideal for use in either one-semester or year-long generalist human behavior courses. Why? Because the text is concise and easily used in a one-semester course. **The Greenwood Encyclopedia of Clothing through World History** Jill Condra, 2007-12-30 How people dressed throughout history often reflects how they lived at the time, and Clothing in World History gives the reader a chance to explore clothing in a given place and time while also providing a general history to help put the costumes in context. This set takes the reader on a journey from the beginning of time to present day to look at what people wore in Europe, North America, South America, and Asia. Men's, Women's, and Children's clothing from various social classes, as well as accessories, are included. This set is a critical guide for secondary and undergraduate students interested in history, social history, art history, fashion, and costume. It covers the history of clothing throughout the world from pre-historic times to 2006. Many cultures are included in this study of clothing within the context of social, political, economic and religious history as they pertain to each time period and place. Researchers can turn to this set first for the most essential information about a time, place, and style of dress. The three volumes are divided into comprehensive parts with the goal of making them easy to use and accessible to readers. There are other books and surveys of the history of costume that mainly concentrate on Western Europe, but few that cover different cultures and how they influence fashion in the western world. This book looks at costume throughout the world and throughout history.

**Rock Art at Little Lake** John C. Bretney, Gordon Hull, Jo Anne Van Tilburg, 2012-12-31 Recipient of the Jo Anne Stolaroff Cotsen Prize The product of ten years of fieldwork at Little Lake Ranch in the Rose Valley, the southern gateway to the Owens Valley, this book presents the results of intensive rock art analyses carried out by the interdisciplinary research team of the UCLA Rock Art Archive. The research attempts to establish a connective web of associations to break down traditional but artificial barriers between rock art and the rest of archaeology. Through time-honored methods of stylistic analysis, the focus is on recent breakthroughs in the analysis of meaning and religion in the context of landscape attributes and ecological opportunities. Regional or ethnic differences suggested by the rock art record has made it possible to create a flexible analytical framework containing previously unpublished or overlooked archaeological excavation and object data. This book describes the occurrence, concentration, distribution, and formal variation of pecked and painted motifs. Scratched, pecked, and painted patterns are analyzed separately. Full-color illustrations throughout enhance the physical appeal of this beautiful book.
