Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Laudato Si Pope Francis, 2015-07-18 "In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" – Pope Francis, *Laudato Si'* In his second encyclical, *Laudato Si'*: On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral teaching, draws on the best scientific research, providing the foundation for "the ethical and spiritual itinerary that follows." *Laudato Si'* outlines: The current state of our "common home" The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis' call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

Molas Diana Marks, 2016-10-01 *Molas*, the distinctive blouses made and worn by Kuna women in Panama, are collected by thousands of enthusiasts as well as by anthropological museums all over the world. They are recognized everywhere as an identifier of the Kuna people and also of Panama. This book, based on original research, explores the origin of the mola in the early twentieth century, how it became part of the everyday dress of Kuna women, and its role in creating Kuna identity.

Images drawn from more than twenty museums as well as private collections show the development of designs and techniques and highlight changes in the garment as an item of indigenous fashion. Applying an interdisciplinary approach—fusing historical, ethnographic, and material culture studies—author Diana Marks contributes to ongoing debates on cultural authenticity, the invention of traditions, and issues of gender and politics.

The Art of Women in Contemporary China Patricia Eichenbaum Karetzky, 2020-01-08 This book presents in eight chapters the work of over 75 Chinese female artists, both pictorial and poetic. Their art is viewed within a framework of eight themes. The broad topics explored include the body; life; the representation of the experience of being a woman; home and the world; a view of children and other women; clothes; social conscience; fantasy; and abstraction—nonfigurative work and its viability as a medium to express the spiritual. These themes provide several lenses through which to enjoy and compare these artists' approaches and outputs. The volume is unique in its inclusion of poetry by contemporary women whose voices articulate so many of the same concerns as the visual artists. In China, poetry has always been the prime form of artistic expression, and it remains so today. Looking at this poetry affords us a different means of appreciating the art of women in contemporary society.

Success on the Tenure Track Cathy Ann Trower, 2012-08-15 Satisfaction ratings from tenure-track faculty at 200 institutions across the country reveal best practices and the key elements of workplace success. Landing a tenure-track position is no easy task. Achieving tenure is even more difficult. Under what policies and practices do faculty find greater clarity about tenure and experience higher levels of job satisfaction? And what makes an institution a great place to work? In 2005-2006, the Collaborative on Academic Careers in Higher Education (COACHE) at the Harvard Graduate School of Education surveyed more than 15,000 tenure-track faculty at 200 participating institutions to assess their job satisfaction. The survey was designed around five key themes for faculty satisfaction: tenure clarity, work-life balance, support for research, collegiality, and leadership. Success on the Tenure Track positions the survey data in the context of actual colleges and universities and real faculty and administrators who talk about what works and why. Best practices at the highest-rated institutions in the survey—Auburn, Ohio State, North Carolina State, Illinois at Urbana-Champaign, Iowa, Kansas, and North Carolina at Pembroke—give administrators practical, proven advice on how to increase their employee satisfaction. Additional chapters discuss faculty demographics, trends in employment practices, what leaders can do to create and sustain a great workplace for faculty, and what the future might hold for tenure. An actively engaged faculty is crucial for American higher education to retain its global competitiveness. Cathy Ann Trower's analysis provides colleges and universities a considerable inside advantage to get on the right track toward a happy, productive workforce.

Climate Change 2022 - Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change (IPCC), 2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provides a comprehensive assessment of the scientific literature relevant to climate change impacts, adaptation and vulnerability. The report recognizes the interactions of climate, ecosystems and biodiversity, and human societies, and integrates across the natural, ecological, social and economic sciences. It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development, which

enables a liveable future for biodiversity and humankind. The IPCC is the leading body for assessing climate change science. IPCC reports are produced in comprehensive, objective and transparent ways, ensuring they reflect the full range of views in the scientific literature. Novel elements include focused topical assessments, and an atlas presenting observed climate change impacts and future risks from global to regional scales. Available as Open Access on Cambridge Core.

Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on the Impacts of Sexual Harassment in Academia, 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Transforming Trajectories for Women of Color in Tech National Academies of Sciences, Engineering, and Medicine, National Academies Of Sciences Engineeri, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Addressing the Underrepresentation of Women of Color in Tech, 2022-09-09 Demand for tech professionals is expected to increase substantially over the next decade, and increasing the number of women of color in tech will be critical to building and maintaining a competitive workforce. Despite years of efforts to increase the diversity of the tech workforce, women of color have remained underrepresented, and the numbers of some groups of women of color have even declined. Even in cases where some groups of women of color may have higher levels of representation, data show that

they still face significant systemic challenges in advancing to positions of leadership. Research evidence suggests that structural and social barriers in tech education, the tech workforce, and in venture capital investment disproportionately and negatively affect women of color. *Transforming Trajectories for Women of Color in Tech* uses current research as well as information obtained through four public information-gathering workshops to provide recommendations to a broad set of stakeholders within the tech ecosystem for increasing recruitment, retention, and advancement of women of color. This report identifies gaps in existing research that obscure the nature of challenges faced by women of color in tech, addresses systemic issues that negatively affect outcomes for women of color in tech, and provides guidance for transforming existing systems and implementing evidence-based policies and practices to increase the success of women of color in tech.

Women, Race, & Class Angela Y. Davis, 2011-06-29 From one of our most important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

Retail Advertising and Promotion Jay Diamond, 2011-03-17 Retail Advertising and Promotion explores how today's retailers can effectively reach their existing customers while also attracting and retaining new ones. The only advertising book that focuses specifically on the retail industry, it covers historical perspectives, ethics, regulations, and current trends while featuring practical information on planning and budgeting and advice on how to work with advertising agencies. Information Design Unbound Sheila Pontis,Michael Babwahsingh,2023-10-05 As everyday tasks grow more confusing, and as social and global problems grow more complex, the information designer's role in bringing clarity has reached a new level of importance. In order to have a positive impact, they must go beyond conventional approaches to uncover real needs, make insightful connections, and develop effective solutions. *Information Design Unbound* provides a clear, engaging introduction to the field, and prepares students to be strategic thinkers and visual problem solvers who can confidently make sense in a changing world. Sheila Pontis and Michael Babwahsingh present a holistic view of information design, synthesizing decades of research, cross-disciplinary knowledge, and emerging practices. The book opens by laying a foundation in the field, first painting the bigger picture of what it is and how it originated, before explaining the scientific and cultural dimensions of how people perceive and understand visual information. A discussion of professional practices, ethical considerations, and the expanding scale of challenges sheds light on the day-to-day work of information designers today. Detailed chapters then delve into the four areas that are integral to all types of information design work: visual thinking, research, sensemaking, and design. The final section of the book puts everything together, with detailed project walk-throughs in areas such as icon design, instructions, wayfinding, organizational strategy, and healthcare system change. Written and designed with students' needs in mind, this book brings information design fundamentals to life: exercises allow students to put lessons directly into practice, case studies demonstrate how information designers think and work, and generous illustrations clarify concepts in a visually engaging way. *Information Design Unbound* helps beginning designers build the mindset and skillset to navigate visual communication challenges wherever they may arise.

Orphan Crops: Breeding and Biotechnology for Sustainable Agriculture, Food and Nutrition Simon E. Bull,Jill Margaret Farrant,Rita Hogan Mumm,Zerihen Tadele,2024-01-18 Orphan crops play an important role in food and nutrition security especially in growing economies where small-holder farmers produce the majority of food. Despite their importance in global

agriculture and their often remarkable nutrient content and adaptation to challenging environmental conditions, orphan crops have received limited attention by the scientific community and industry. However, the diversity of neglected plant species provides a large genetic resource that could significantly contribute to broadening the biodiversity of trait-desired crops for novel value chains, sustainable development and food security. The uptake of new plant breeding techniques, notably genome editing, as well as 'omic' tools, are now accelerating translation of basic research and facilitating the exploration of orphan crops. These advancements also give rise to public and politic engagement discussions to maximize socio-economic impact. Given that the greatest need for food and nutritional security is in growing economies, issues of food sovereignty and sustainability of their food systems become front-and-centre. There is now an exceptional opportunity to tackle some of the major current challenges in agriculture, including climate change, sustainable cropping systems, food quality, and nutritional security through broadening research in wild relatives of crops and on orphan species. This Research Topic seeks to showcase research on neglected plants using advanced molecular technologies (e.g. genome sequencing, 'omics', etc) and new plant breeding approaches, methods, and tools. This Research Topic will also discuss the challenges and opportunities arising when modern breeding techniques are applied for translational research.

Rock Art at Little Lake John C. Bretney, Gordon Hull, Jo Anne Van Tilburg, 2012-12-31 Recipient of the Jo Anne Stolaroff Cotsen Prize The product of ten years of fieldwork at Little Lake Ranch in the Rose Valley, the southern gateway to the Owens Valley, this book presents the results of intensive rock art analyses carried out by the interdisciplinary research team of the UCLA Rock Art Archive. The research attempts to establish a connective web of associations to break down traditional but artificial barriers between rock art and the rest of archaeology. Through time-honored methods of stylistic analysis, the focus is on recent breakthroughs in the analysis of meaning and religion in the context of landscape attributes and ecological opportunities. Regional or ethnic differences suggested by the rock art record has made it possible to create a flexible analytical framework containing previously unpublished or overlooked archaeological excavation and object data. This book describes the occurrence, concentration, distribution, and formal variation of pecked and painted motifs. Scratched, pecked, and painted patterns are analyzed separately. Full-color illustrations throughout enhance the physical appeal of this beautiful book.
