Transforming Trajectories for Women of Color in Tech National Academies of Sciences, Engineering, and Medicine, National Academies Of Sciences Engineeri, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Addressing the Underrepresentation of Women of Color in Tech, 2022-09-09 Demand for tech professionals is expected to increase substantially over the next decade, and increasing the number of women of color in tech will be critical to building and maintaining a competitive workforce. Despite years of efforts to increase the diversity of the tech workforce, women of color have remained underrepresented, and the numbers of some groups of women of color have even declined. Even in cases where some groups of women of color may have higher levels of representation, data show that they still face significant systemic challenges in advancing to positions of leadership. Research evidence suggests that structural and social barriers in tech education, the tech workforce, and in venture capital investment disproportionately and negatively affect women of color. *Transforming Trajectories for Women of Color in Tech* uses current research as well as information obtained through four public information-gathering workshops to provide recommendations to a broad set of stakeholders within the tech ecosystem for increasing recruitment, retention, and advancement of women of color. This report identifies gaps in existing research that obscure the nature of challenges faced by women of color in tech, addresses systemic issues that negatively affect outcomes for women of color in tech, and provides guidance for transforming existing

systems and implementing evidence-based policies and practices to increase the success of women of color in tech.

Oh No She Didn't Clinton Kelly, 2010-10-12 Muffin tops. Scrunchies. Suntan hose. Slut shoes. Visible panty line. Who hasn't had the unfortunate experience of witnessing—or (gasp!) actually wearing—one of these fashion disasters? The atrocities Clinton Kelly has seen—it's a surprise he hasn't gouged out his own eyes. Mom jeans? Fancy fingernails? Tracksuits? In the same straight-talking style that has made TLC's *What Not to Wear* a smash hit for eight seasons, the cheeky media personality and author of *Freakin' Fabulous* shows women how to outfit themselves with confidence and style as he pokes fun at fashion don'ts. From the most obvious faux pas (Texas tuxedos) to borderline offenses (peekaboo boobies), Clinton offers detailed and entertaining critiques of our top one hundred sartorial slip-ups. He turns his keen eye to wardrobe, color, cut, cleanliness, hairstyle, accessories, and even posture. And because he loves you, he presents easy alternatives and practical suggestions for creating fabulous outfits that will make you forget you ever wore socks with clogs. Clinton also explains how to use trends to your advantage at any age, from deciding which ones work for you to understanding how to wear them to keep your look relevant. Because if you're not comfortable in the sequined mini, everyone around you will know it. A delightful mix of hilarious dish and expert fashion advice, *Oh No She Didn't* will turn anyone from fashion victim to fashionista in no time.

Sexual Harassment of Women National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Committee on Women in Science, Engineering, and Medicine, Committee on the Impacts of Sexual Harassment in Academia, 2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women

in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

Molas Diana Marks,2016-10-01 Molas, the distinctive blouses made and worn by Kuna women in Panama, are collected by thousands of enthusiasts as well as by anthropological museums all over the world. They are recognized everywhere as an identifier of the Kuna people and also of Panama. This book, based on original research, explores the origin of the mola in the early twentieth century, how it became part of the everyday dress of Kuna women, and its role in creating Kuna identity. Images drawn from more than twenty museums as well as private collections show the development of designs and techniques and highlight changes in the garment as an item of indigenous fashion. Applying an interdisciplinary approach—fusing historical, ethnographic, and material culture studies—author Diana Marks contributes to ongoing debates on cultural authenticity, the invention of traditions, and issues of gender and politics.

Between the Folds Jill Forshee,2001-01-01 Textiles have long been integral to the social life and cosmology of the people of East Sumba, Indonesia. In recent decades, the people of East Sumba have entered a larger world economy as their textiles have joined the commodity flow of an international ethnic arts market stimulated by Indonesia's tourist trade. As Sumba's villagers respond to an immensely expanded commerce in their cloth, tensions and ironies emerge between historical and innovative forms in both cloth and lives. Such responses involve gender, ethnicity, and social rank, and are especially highlighted within global market spaces. The stories in *Between the Folds* vary widely and include those of animists, Christians, and Moslems; Sumbanese, Indonesian Chinese, and Westerners; inventive geniuses, master artisans, and exploited weavers; rogues, entrepreneurs, nobles, and servants.

Leading in Black and White Ancella Livers,Keith Caver,2003-02-03 Many blacks in the workplace face a set of dynamics unique to being African American in a traditionally white, male-dominated world. In this landmark book, authors Ancella Livers and Keith Caver-- co-facilitators of the Center for Creative Leadership's African-American Leadership Program for the past five years-- explain how the leadership experience for blacks is radically different from the experiences of their white colleagues. These differences, of which most white managers are unaware, can lead to miscues and distortions in communication and ultimately get in the way of effective performance and optimal productivity for organizations. In *Leading in Black and White*, the authors not only clearly explain how things go wrong, they also provide sensible solutions for both the white manager and the black manager on how to make them right.

Rozenberg,David Treguer,Adrien Vogt-Schilb,2015-11-23 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win” situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

And the latest version of this long-running and seminal text is chock-full of new material for budding teachers, coaches, fitness professionals, recreation leaders, and program leaders. This book covers a broad spectrum of careers and professions, including those in physical education, health, dance, fitness, sport, recreation, athletic training, and athletic administration. The authors provide an overview of the respective professions and offer a deep dive into individual careers. In addition, the text explores the role of public policy across local, state, and federal levels, noting how various physical activity professions are affected by regulations. New content in this edition includes the following: Five new chapters cover dance education, recreational leadership, health education, contemporary physical education curriculum models, and exemplary physical education programs. Updated content on how economic, racial, and ethnic disparities affect physical activity and physical activity professions will help students anticipate real-life issues. New evidence, data, and information throughout the text will help students understand the issues, problems, and programmatic solutions in the various fields as they prepare to meet and solve those problems. The expanded and updated physical education chapters reflect current trends and developments. The new chapters on dance education, recreational leadership, and health education broaden the book’s scope as they show the role these allied physical activity professions play in the larger efforts to promote and support physical activity as a way to create a healthy citizenry. All chapters throughout the text have been updated to reflect the most current information on the topics. And the book’s web-based ancillaries, which include

a range of instructor tools, have also been revised and expanded. Introduction to Physical Education, Fitness, and Sport is organized into six parts: Part I provides a thorough understanding of the health issues related to physical inactivity and of the evolution of physical activity programs. Parts II, III, and IV focus on concepts, programs, professions, and barriers to overcome in physical education, fitness, and sport, respectively. Part V delves into the allied physical activity professions of dance and dance education, recreation, and health education, exploring the concepts, professions, and issues in each area. Part VI tackles the subdisciplines of kinesiology that support physical activity, such as exercise physiology, sport pedagogy, sport and exercise psychology, sport philosophy, biomechanics, and more. Introduction to Physical Education, Fitness, and Sport will help students make more informed career choices, understand the professional issues they will face, and be in a better position to develop high-quality programs and make those programs widely available. Ultimately, this book will help new generations of physical activity professionals provide positive solutions to the problems that exist in their fields and to make lifelong impacts on their students.

The Art of Cloth in Mughal India Sylvia Houghteling, 2022-03-29 When a rich man in seventeenth-century South Asia enjoyed a peaceful night's sleep, he imagined himself enveloped in a velvet sleep. In the poetic imagination of the time, the fine dew of early evening was like a thin cotton cloth from Bengal, and woolen shawls of downy pashmina sent by the Mughal emperors to their trusted noblemen approximated the soft hand of the ruler on the vassal's shoulder. Textiles in seventeenth-century South Asia represented more than cloth to their makers and users. They simulated sensory experience, from natural, environmental conditions to intimate, personal touch. *The Art of Cloth in Mughal India* is the first art historical account of South Asian textiles from the early modern era. Author Sylvia Houghteling resurrects a truth that seventeenth-century world citizens knew, but which has been forgotten in the modern era: South Asian cloth ranked among the highest forms of art in the global hierarchy of luxury goods, and had a major impact on culture and communication. While studies abound in economic history about the global trade in Indian textiles that flourished from the seventeenth to the nineteenth centuries, they rarely engage with the material itself and are less concerned with the artistic and much less the literary and social significance of the taste for cloth. This book is richly illustrated with images of textiles, garments, and paintings that are held in little-known collections and have rarely, if ever, been published. Rather than rely solely on records of European trading companies, Houghteling draws upon poetry in local languages and integrates archival research from unpublished royal Indian inventories to tell a new history of this material culture, one with a far more balanced view of its manufacture and use, as well as its purchase and trade--

Learning to Speak, Learning to Listen Susan E. Chase,2011-03-15 Over the past three decades, colleges and universities have committed to encouraging, embracing, and supporting diversity as a core principle of their mission. But how are goals for achieving and maintaining diversity actually met? What is the role of students in this mission? When a university is committed to diversity, what is campus culture like? In *Learning to Speak, Learning to Listen*, Susan E. Chase portrays how undergraduates at a predominantly white urban institution, which she calls City University (a pseudonym), learn to speak and listen to each other across social differences. Chase interviewed a wide range of students and conducted content analyses of the student newspaper, student government minutes, curricula, and website to document diversity debates at this university. Amid various controversies, she identifies a defining moment in the campus culture: a protest organized by students of color to highlight the university's failure to live up to its diversity commitments. Some white students dismissed the protest, some were hostile to it, and some fully engaged their peers of color. In a book that will be useful to students and educators on campuses undergoing diversity initiatives, Chase finds that both students' willingness to share personal stories about their diverse experiences and collaboration among student organizations, student affairs offices, and academic programs encourage speaking and listening across differences and help incorporate diversity as part of the overall mission of the university.
