Why Women Will Save the Planet Friends of the Earth, C40 Cities, 2018-03-01 Big cities don't have to mean a dystopian future. They can be turned around to be powerhouses of well-being and environmental sustainability – if we empower women. This book is a unique collaboration between C40 and Friends of the Earth showcasing pioneering city mayors, key voices in the environmental and feminist movements, and academics. The essays collectively demonstrate both the need for women's empowerment for climate action and the powerful change it can bring. A rallying call – for the planet, for women, for everyone.

Women Pioneers For The Environment Mary Joy Breton, 2016-02-01 As the torchbearers of environmental activism, women from around the world have created profound changes that are helping to ensure a healthier planet for all living things. Whether it is Judi Bari, who was crippled by a car bomb because of her efforts to save California's ancient redwood forests; Dai Qing, who was imprisoned for her opposition to an environmentally destructive dam on China's Yangtze River; or Dr. Tatynana Artyomkina, who defied KGB threats and exposed health and environmental risks in the Soviet Union, women have put their lives on the line and persevered against daunting odds to restore and protect the environment. Mary Joy Breton provides absorbing sketches of these and other women activists in the Americas, Eastern and Western Europe, Africa, and Asia. Breton interweaves her accounts with narrative on the ecological hazards that drove these women to spearhead various environmental campaigns, examining why and how they challenged, and often defeated, the power structures of government and industry. Although these remarkable women come from various geographical regions and represent a wide range of economic, ethnic, and political backgrounds, they share insights, values, and a particular sensitivity to the Earth that led them to change the course of history. Their courageous efforts illuminate the crucial role of women in the environmental movement, and provide inspiration for a new generation of activists.

Believe Me Jessica Valenti, Jaclyn Friedman, 2020-01-28 What would happen if we believed women? A groundbreaking anthology offers a potent rallying cry and theory of change Harvey Weinstein. Brett Kavanaugh. Jeffrey Epstein. Donald Trump. The most infamous abusers in modern American history are being outed as women speak up to publicly expose behavior that was previously only whispered about -- and it's both making an impact, and sparking a backlash. From the leading, agenda-setting feminist editors of Yes Means Yes, *Believe Me* brings readers into the evolving landscape of the

movement against sexual violence, and outlines how trusting women is the critical foundation for future progress. In *Believe Me*, contributors ask and answer the crucial question: What would happen if we didn't just believe women, but acted as though they matter? If we take women's experiences of online harassment seriously, it will transform the internet. If we listen to and center survivors, we could revolutionize our systems of justice. If we believe Black women when they talk about pain, we will save countless lives. With contributions from many of the most important voices in feminism today, *Believe Me* is an essential roadmap for the #MeToo era and beyond.

If Women Ruled the World Sheila Ellison, 2004 With contributions from more than two hundred women, this candid, funny, and ultimately soft-hearted take on the feminine covers politics, pop culture, body image, sports, family life, the environment, and much, much more. Original.

Fertile Ground Irene Diamond, 1997-11-25 Irene Diamond has written a passionate and provocative book that challenges the feminist movement to step beyond its preconceptions. . . . We desperately need this synthesis. -from the Foreword by Starhawk In a wide-ranging critique of Western thought and practice, ecofeminist Irene Diamond raises unsettling questions about the ethic of control that permeates how we think about fertility, sexuality, agriculture, and the environment.

Women Working in the Environment Carolyn E. Sachs, 1997 First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

Earthcare Carolyn Merchant, 2014-02-04 Written by one of the leading thinkers in environmentalism, *Earthcare* brings together Merchant's existing work on the topic of women and the environment as well as updated and new essays. *Earthcare* looks at age-old historical associations of women with nature, beginning with Eve and continuing through to environmental activists of today, women's commitment to environmental conservation, and the problematic assumptions of women as caregivers and men as dominating nature.

How Women Can Save The Planet Anne Karpf, 2021-04-29 Women are the answer to the climate crisis - but not because they should add to their workload by fixing it for us. Instead, we need gender equality. The highest-profile climate activists today are women and girls, but it's a very different story at the top table: the future of the planet is being decided by men. Here's a perverse truth: dominant masculinist assumptions helped produce the climate emergency, and yet it affects women particularly. Across the Pacific, domestic abuse spikes after bushfires and cyclones. In the global south, climate breakdown forces girls to drop out of school. In Northern Europe, many of those killed by heatwaves have been elderly women. And, from New Orleans to Bangladesh, the lives of poor women of colour are being profoundly re-shaped by a crisis they did nothing to create. This vital book shows that we're not all in it together - but we could be. Drawing on feminist research and innovative climate policies introduced by women, Anne Karpf interviews female activists around the world about how they're fighting back. Faced with the most urgent catastrophe of our times, Karpf offers a powerful, fresh vision: a

Green New Deal for Women.

Red is the New Black Cathy Lynn Taylor,2016-09-20 Red Is the New Black challenges the assumption that the Democratic Party is a girl's best friend. Red Is the New Black takes an in depth look at the major policy issues affecting all of us to unveil the core values that best empower today's women. It turns out that if we focus on values instead of arguing over ideas, there's a whole lot of common ground upon which women of all viewpoints can agree. Entrepreneur, media commentator, and former White House National Security Council Director Cathy Lynn Taylor shares how these core tenants have shaped her own decisions—and success—and should be shaping the policies that affect the daily lives of women. By combining her own personal anecdotes with hard-hitting research, Taylor powerfully illustrates a set of values that unite us and the policies that best support them.

TIME Women Changing the World The Editors of TIME,2018-03-02 This collection profiles nearly 50 women across a range of endeavors: business, politics, science, technology, sports, entertainment and more.

50 Ways to Improve Women's Lives National Council of Women's Organizations,2010-11-01 A powerful new call-to-action series was launched with the New York Times bestselling MoveOn's 50 Ways to Love Your Country. The second book in the series, 50 Ways to Improve Women's Lives, written by nationally recognized women, is poised to again become an instrument for change and reinvigorate a movement. 50 Ways to Improve Women's Lives parlays the collective expertise of the National Council of Women's Organizations' 200 member organizations — which include Planned Parenthood, NOW, League of Women Voters, Code Pink, the AAUW, the National Council of Negro Women, and the YWCA — and features 50 personal, inspiring essays with Helping Ourselves and Call-to-Action sidebars. Covering subjects as diverse as pay equity, reproductive health, child care, racism, and women in leadership, the book addresses topics that affect women (and all of us!) on a personal and political level, and provides readers with ways to move beyond old arguments and turn inspiration into action. Contributors include Madeline Albright, Gloria Steinem, Betty Friedan, Eleanor Smeal, Hillary Clinton, Congresswomen Maloney, Slaughter, and Pelosi, and many others.

Made From This Earth Vera Norwood,2014-07-01 The broad sweep of environmental and ecological history has until now been written and understood in predominantly male terms. In Made From This Earth, Vera Norwood explores the relationship of women to the natural environment through the work of writers, illustrators, landscape and garden designers, ornithologists, botanists, biologists, and conservationists. Norwood begins by showing that the study and promotion of botany was an activity deemed appropriate for women in the early 1800s. After highlighting the work of nineteenth-century scientific illustrators and garden designers, she focuses on nature's advocates such as Rachel Carson and Dian Fossey who differed strongly with men on both women's nature and the value of the natural world. These women challenged the dominant, male-

controlled ideologies, often framing their critique with reference to values arising from the female experience. Norwood concludes with an analysis of the utopian solutions posed by ecofeminists, the most recent group of women to contest men over the meaning and value of nature.

Women Pioneers of the Louisiana Environmental Movement Peggy Frankland, Susan Tucker, 2013-03-16 Women Pioneers of the Louisiana Environmental Movement provides a window into the passion and significance of thirty-eight committed individuals who led a grassroots movement in a socially conservative state. The book is comprised of oral history narratives in which women activists share their motivation, struggles, accomplishments, and hard-won wisdom. Additionally interviews with eight men, all leaders who worked with or against the women, provide more insight into this rich--and also gendered--history. The book sheds light on Louisiana and America's social and political history, as well as the national environmental movement in which women often emerged to speak for human rights, decent health care, and environmental protection. By illuminating a crucial period in Louisiana history, the women tell how environmentalism emerged within a state already struggling with the dual challenges of adjusting to the civil rights movement and the growing oil boom. Peggy Frankland, an environmental activist herself since 1982, worked with a team of interviewers, especially those trained at Louisiana State University's T. Harry Williams Center for Oral History. Together they interviewed forty women pioneers of the state environmental movement. Frankland's work also was aided by a grant from the Louisiana Endowment for the Humanities. In this compilation, she allows the women's voices to provide a clear picture of how their smallest actions impacted their communities, their families, and their way of life. Some experiences were frightening, some were demeaning, and many women were deeply affected by the individual persecution, ridicule, and scorn their activities brought. But their shared victories reveal the positive influence their activism had on the lives of loved ones and fellow citizens.

On Infertile Ground Jade S. Sasser, 2018-11-13 A critique of population control narratives reproduced by international development actors in the 21st century Since the turn of the millennium, American media, scientists, and environmental activists have insisted that the global population crisis is “back”—and that the only way to avoid catastrophic climate change is to ensure women’s universal access to contraception. Did the population problem ever disappear? What is bringing it back—and why now? In *On Infertile Ground*, Jade S. Sasser explores how a small network of international development actors, including private donors, NGO program managers, scientists, and youth advocates, is bringing population back to the center of public environmental debate. While these narratives never disappeared, Sasser argues, histories of human rights abuses, racism, and a conservative backlash against abortion in the 1980s drove them underground—until now. Using interviews and case studies from a wide range of sites—from Silicon Valley foundation headquarters to youth advocacy trainings, the halls of Congress and an international climate change conference—Sasser demonstrates how population growth has been reframed as an urgent source of climate crisis and a unique opportunity to support women’s sexual and

reproductive health and rights. Although well-intentioned—promoting positive action, women’s empowerment, and moral accountability to a global community—these groups also perpetuate the same myths about the sexuality and lack of virtue and control of women and the people of global south that have been debunked for decades. Unless the development community recognizes the pervasive repackaging of failed narratives, Sasser argues, true change and development progress will not be possible. *On Infertile Ground* presents a unique critique of international development that blends the study of feminism, environmentalism, and activism in a groundbreaking way. It will make any development professional take a second look at the ideals driving their work.

Ecofeminism Jytte Nhanenge, 2011-04-01 This book is for those who desire to improve their understanding of the current crises of poverty, environmental destruction, violence, and human rights abuses, and their causes. Unless we increase our awareness and demand changes that balance the yang and yin forces, patriarchal domination will eradicate life on planet Earth.

At Home in the World Kathleen A. Cairns, 2021-05 From the beginning of California's statehood, adventurers, scientists, and writers reveled in its majestic landscape. Some were women, though few garnered attention or invitations to join the Sierra Club, the organization created in 1892 to preserve wilderness. Over the next sixty years the Sierra Club and other groups gained prestige and members—including an increasing number of women. But these organizations were not equipped to confront the massive growth of industry that overtook postwar California. This era needed a new approach, and it came from an unlikely source: white, middle-class housewives with no experience in politics. These women successfully battled smog, nuclear power plants, piles of garbage in the San Francisco Bay, and over-building in the Santa Monica Mountains. In *At Home in the World* Cairns shows how women were at the center of a broader and more inclusive environmental movement that looked beyond wilderness to focus on people's daily life. These women challenged the approach long promoted by establishment groups and laid the foundation for the modern environmental movement.

Ecofeminism Karen J. Warren, 1997-05-22 ... provides readers with a much-needed cross-cultural and multidisciplinary perspective on ecofeminist activism and scholarship. -- Iris ... a very important contribution to the literature on ecological feminism. -- Ethics I think the unique collection of so many different perspectives will help to push readers out of their disciplinary views and work to bring theory and practice together in meaningful ways.... an excellent resource for scholars and teachers... -- Teaching Philosophy Here the potential strengths and weaknesses of the growing ecofeminist movement are critically assessed by scholars in a variety of academic disciplines and vocations, including anthropology, biology, chemical engineering, education, political science, recreation and leisure studies, sociology, and political organizing.

The Seven Necessary Sins for Women and Girls Mona Eltahawy, 2019-09-17 A bold and uncompromising feminist manifesto that shows women and girls how to defy, disrupt, and destroy the patriarchy by embracing the qualities they’ve

been trained to avoid. Seizing upon the energy of the #MeToo movement, feminist activist Mona Eltahawy advocates a muscular, out-loud approach to teaching women and girls to harness their power through what she calls the “seven necessary sins” that women and girls are not supposed to commit: to be angry, ambitious, profane, violent, attention-seeking, lustful, and powerful. All the necessary “sins” that women and girls require to erupt. Eltahawy knows that the patriarchy is alive and well, and she is fed the hell up: Sexually assaulted during hajj at the age of fifteen. Groped on the dance floor of a night club in Montreal at fifty. Countless other injustices in the years between. Illuminating her call to action are stories of activists and ordinary women around the world—from South Africa to China, Nigeria to India, Bosnia to Egypt—who are tapping into their inner fury and crossing the lines of race, class, faith, and gender that make it so hard for marginalized women to be heard. Rather than teaching women and girls to survive the poisonous system they have found themselves in, Eltahawy arms them to dismantle it. Brilliant, bold, and energetic, *The Seven Necessary Sins for Women and Girls* is a manifesto for all feminists in the fight against patriarchy.
