**A Political Ecology of Women, Water and Global Environmental Change** Stephanie Buechler,Anne-Marie S. Hanson,2015-03-02 This edited volume explores how a feminist political ecology framework can bring fresh insights to the study of rural and urban livelihoods dependent on vulnerable rivers, lakes, watersheds, wetlands and coastal environments. Bringing together political ecologists and feminist scholars from multiple disciplines, the book develops solution-oriented advances to theory, policy and planning to tackle the complexity of these global environmental changes. Using applied research on the contemporary management of groundwater, springs, rivers, lakes, watersheds and coastal wetlands in Central and South Asia, Northern, Central and Southern Africa, and South and North America, the authors draw on a variety of methodological perspectives and new theoretical approaches to demonstrate the importance of considering multiple layers of social difference as produced by and central to the effective governance and local management of water resources. This unique collection employs a unifying feminist political ecology framework that emphasizes the ways that gender interacts with other social and geographical locations of water resource users. In doing so, the book further questions the normative gender discourses that underlie policies and practices surrounding rural and urban water management and climate change, water pollution, large-scale development and dams, water for crop and livestock production and processing, resource knowledge and expertise, and critical livelihood studies. This book will be of interest to students and scholars of environmental studies, development studies, feminist and environmental geography, anthropology, sociology, environmental

philosophy, public policy, planning, media studies, Latin American and other area studies, as well as women's and gender studies.

**Laudato Si** Pope Francis, 2015-07-18 "In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" - Pope Francis, *Laudato Si'* In his second encyclical, *Laudato Si'*: On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral teaching, draws on the best scientific research, providing the foundation for "the ethical and spiritual itinerary that follows." *Laudato Si'* outlines: The current state of our "common home" The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis' call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

**Digital Media Influence** Andy Ruddock, 2020-03-09 Populism, misogyny, rampage murders. Digital media seem to lie at the heart of sinister, intractable social challenges. Curiously, the very societies who fear such things are often dismissive of media research. Addressing key issues affecting global media industries, this book explains how to solve the present conundrum by appreciating the historical development of cultivation theory. *Digital Media Influence* ties cultivation themes, such as mean world syndrome, mainstreaming, the celebration of white male violence, the ridiculing of ageing women, the inhibition of activism, the mediatisation of religion and the erosion of trust in education, with contemporary digital media case studies. Considering the aftermath of the Parkland murders, political memes, Islamophobia, the fate of female reality TV stars and the bad press directed at media education, Ruddock shows how these phenomena are born of media practices that cultivation theory began to dissect in the 1950s. Paying close attention to the life and work of George Gerbner, *Digital Media Influence* locates today's questions in the historical forces and relationships that moved media industries closer to the heart of global politics in the mid-20th century. It makes Gerbner's work relevant to all critical media researchers by providing a

theoretical, methodological and historical steer for understanding new media influences. In explaining how one of the world's leading media theories developed in relation to intriguing historical circumstances – many of them deeply personal – this book helps researchers of all levels to find their voice in writing on media issues.

**The Middle Eastern Environment** British Society for Middle Eastern Studies. Conference, British Society for Middle Eastern Studies, 1995 Banner headlines testify to the increased awareness of environmental problems in the Middle East and to the urgency of solving them. Whether the concern is with the dumping of toxic waste in Arab countries, or with the need for Islamic solutions to prevent ecological disaster - Middle Eastern newspapers are raising awareness of environmental issues and of the potential ill effects they can have throughout the region. Written by some of the leading scholars in their own particular fields, the 18 essays in this book bring together subjects as diverse as the Oslo agreement, nuclear weapons in Israel, and Islamic development agendas in sub-Saharan Africa. The book reflects the range of influences that impact on the Middle Eastern environment, rendering a specialized and topical area of thought to a broad reading public.

**Changing the Course of AIDS** David Dickinson, 2011-01-15 Changing the Course of AIDS is an in-depth evaluation of a new and exciting way to create the kind of much-needed behavioral change that could affect the course of the global health crisis of HIV/AIDS. This case study from the South African HIV/AIDS epidemic demonstrates that regular workers serving as peer educators can be as—or even more—effective agents of behavioral change than experts who lecture about the facts and so-called appropriate health care behavior. After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities, David Dickinson describes the promise of this grassroots intervention—workers educating one another in the workplace and community—and the limitations of traditional top-down strategies. Dickinson's book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is. We see what it means when workers directly tackle the kinds of sexual, gender, religious, ethnic, and broader social and political taboos that make behavior change so difficult, particularly when that behavior involves sex and sexuality. Dickinson's findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators. In this book we see why peer education has so much to offer societies grappling with the HIV/AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity, alcoholism, and substance abuse have so much to learn from the South African example.

**Redeeming REDD** Michael I. Brown, 2013-06-26 It is now well accepted that deforestation is a key source of greenhouse gas emissions and of climate change, with forests representing major sinks for carbon. As a result, public and private initiatives for reducing emissions from deforestation and forest degradation (REDD) have been widely endorsed by policy-makers. A key issue is the feasibility of carbon trading or other incentives to encourage land-owners and indigenous people, particularly in developing tropical countries, to conserve forests, rather than to cut them down for agricultural or other development purposes. This book presents a major critique of the aims and policies of REDD as currently structured,

particularly in terms of their social feasibility. It is shown how the claims to be able to reduce greenhouse gas emissions as well as enhance people's livelihoods and biodiversity conservation are unrealistic. There is a naive assumption that technical or economic fixes are sufficient for success. However, the social and governance aspects of REDD, and its enhanced version known as REDD+, are shown to be implausible. Instead to enhance REDD's prospects, the author provides a roadmap for developing a new social contract that puts people first.

**Geographies of Food** Moya Kneafsey, Damian Maye, Lewis Holloway, Michael K. Goodman, 2021-01-28 What is the future of food in light of growing threats from the climate emergency and natural resource depletion, as well as economic and social inequality? Drawing on global case studies from the Majority and Minority Worlds, it analyses the complex relationships operating between people and processes at a range of geographical scales, from the shopping decisions of consumers in a British or US supermarket, to food insecurity in Sub-Saharan Africa, to the high-level political negotiations at the World Trade Organization and the strategies of giant American and European agri-businesses whose activities span several continents. With over 60 color images and a range of lively pedagogical features, *Geographies of Food* is essential reading for undergraduates studying food and geography.

**Familicidal Hearts** Neil Websdale, 2013-06-20 Oscar, physically and sexually abusive, stabbed his partner and two stepdaughters to death, buried the bodies, and fled the state with his two younger children. Paul, a respected investment banker, donned a Halloween mask and shot his wife and two children before turning the gun on himself. What drives individuals as different as Oscar and Paul to kill their families? Why does familicide appear to be on the rise? In *Familicidal Hearts*, award-winning author and sociologist Neil Websdale uncovers the stories behind 196 male and 15 female perpetrators of this shocking offense, situating their emotional styles on a continuum, from the livid coercive to the civil reputable. With highly detailed and riveting case studies, Websdale explores the pivotal roles of shame, rage, fear, anxiety, and depression in the lives and crimes of the killers. His analysis demonstrates how internal emotional conflict, against a backdrop of societal pressures, is at the root of familicide, challenging the widely accepted argument that murderers kill family members to assert power and control. Websdale contends instead that most perpetrators struggle with intense shame, many sensing that they failed to live up to the demands of modern gender prescriptions, as fathers and lovers, wives and mothers. What emerges is a compelling theory about the haunting effects of modern emotional struggles on perpetrators, controlling and upstanding alike. Captivatingly written and expertly researched, this provocative book weaves a gripping tale of modern-era haunted hearts. Blending the social, the historical, and the emotional into a new way of making sense of a horrific crime, *Familicidal Hearts* is a provocative meditation on gender roles, social forces, and modern life itself.
