Paul Hawken

Drawdown Paul Hawken, 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Product Summary Report ,1987

Renewable Energy Sources and Climate Change Mitigation Ottmar Edenhofer, Ramón Pichs Madruga, 2012 This Intergovernmental Panel on Climate Change Special Report (IPCC-SRREN) assesses the potential role of renewable energy in the mitigation of climate change. It covers the six most important renewable energy sources - bioenergy, solar, geothermal, hydropower, ocean and wind energy - as well as their integration into present and future energy systems. It considers the

environmental and social consequences associated with the deployment of these technologies and presents strategies to overcome technical as well as non-technical obstacles to their application and diffusion. SRREN brings a broad spectrum of technology-specific experts together with scientists studying energy systems as a whole. Prepared following strict IPCC procedures, it presents an impartial assessment of the current state of knowledge: it is policy relevant but not policy prescriptive. SRREN is an invaluable assessment of the potential role of renewable energy for the mitigation of climate change for policymakers, the private sector and academic researchers.

Seeds of Extinction Bernard W. Sheehan,2013-06-01 This study is the first to explain how the white American's conception of himself and his position on the continent formed his perception of the Indian and directed his selection of policy toward the native tribes. Sheehan presents the paradoxical and pathetic story of how the Jeffersonian generation, with the best of goodwill toward the American Indian, destroyed him with its benevolence, literally killed him with kindness. Legends of Our Times Morgan Baillargeon, Leslie Tepper, 2011-11-01 Throughout the world, the cowboy is an instantly recognized symbol of the North American West. *Legends of Our Times* breaks the stereotype of 'cowboys and Indians' to show an almost unknown side of the West. It tells the story of some of the first cowboys -- Native peoples of the northern Plains and Plateau. Through stories, poetry, art, and reminiscences in this lavishly illustrated work, Native people invite the reader on a fascinating journey into the world of ranching and rodeo. The book also presents the special relationship between Native people and animals such as the horse, buffalo, deer, and dog, which have always played an important role in Native spiritual and economic life. By the mid-nineteenth century, Native people were highly valued for their skills in horse breeding and herding, and could take advantage of new economic opportunities in the emerging ranching industry. Faced with limited resources, competition for land, and control by governments and Indian agents, many Native people still managed to develop their own herds or to find work as cowboys. As the ways of the Old West changed, new forms of entertainment and sport evolved. Impresarios such as Buffalo Bill Cody invented the Wild West show, employing Native actors and stunt performers to dramatize scenes from the history of the West and to demonstrate the friendly competitions that cowboys enjoyed at the end of a long round-up or cattle drive. The popularity of rodeos also grew within Native communities, and arenas were built on many reserves. Native rodeos are still held, while many Native competitors ride in professional rodeos as well. Today, Plains and Plateau peoples proudly continue a long tradition of cowboying. *Legends of Our Times* is a celebration of their rich contribution to ranching and rodeo life.

Wallace Stevens and the Limits of Reading and Writing Bart Eeckhout, 2002 Often considered America's greatest twentieth-century poet, Wallace Stevens is without a doubt the Anglo-modernist poet whose work has been most scrutinized from a philosophical perspective. *Wallace Stevens and the Limits of Reading and Writing* both synthesizes and extends the critical understanding of Stevens's poetry in this respect. Arguing that a concern with the establishment and transgression of limits goes to the heart of this poet's work, Bart Eeckhout traces both the limits of Stevens's poetry and the limits of writing as they are explored by that poetry. Stevens's work has been interpreted so variously and contradictorily that critics must first address the question of limits to the poetry's signifying potential before they can attempt to deepen our appreciation of it. In the first half of this book, the limits of appropriating and contextualizing Stevens's *The Snow Man*, in particular, are investigated. Eeckhout does not undertake this reading with the negative purpose of disputing earlier interpretations but

with the more positive intention of identifying the intrinsic qualities of the poetry that have been responsible for the remarkable amount of critical attention it has received.

They Have a Word for it Howard Rheingold, 2000 They Have a Word for It takes the reader to the far corners of the globe to discover words and phrases for which there are not equivalents in English. From the North Pole to New Guinea, from Easter Island to Tibet, Howard Rheingold explores more than forty familiar and obscure languages to discover genuinely useful (rather than simply odd) words that can open up new ways of understanding and experiencing life. --Sarabande Books.

The Weaver-God, He Weaves Christopher Sten, 1996 In this book, the author sets out to dispel the idea that Melville was an author of raw genius who knew, or cared little, about the art of the novel. Rather, he shows how Melville not only knew about the novelist's craft, but also appropriated and transformed a series of distinct genres.
