Bright Earth Philip Ball, 2003-04-15 From Egyptian wall paintings to the Venetian Renaissance, impressionism to digital images, Philip Ball tells the fascinating story of how art, chemistry, and technology have interacted throughout the ages to render the gorgeous hues we admire on our walls and in our museums. Finalist for the 2002 National Book Critics Circle Award.

Bright Signals Susan Murray, 2018-07-26 First demonstrated in 1928, color television remained little more than a novelty for decades as the industry struggled with the considerable technical, regulatory, commercial, and cultural complications posed by the medium. Only fully adopted by all three networks in the 1960s, color television was imagined as a new way of seeing that was distinct from both monochrome television and other forms of color media. It also inspired compelling popular, scientific, and industry conversations about the use and meaning of color and its effects on emotions, vision, and desire. In *Bright Signals* Susan Murray traces these wide-ranging debates within and beyond the television industry, positioning the story of color television, which was replete with false starts, failure, and ingenuity, as central to the broader history of twentieth-century visual culture. In so doing, she shows how color television disrupted and reframed the very idea of television while it simultaneously revealed the tensions about technology's relationship to consumerism, human sight, and the natural world.

Bright Baby Colors Roger Priddy, 2008-07-08 Perfect for babies and toddlers, this charming book features every color of the rainbow! Bright Colors Falsely Seen Kevin T. Dann, 1998-01-01 In a conversation with his physician, a nineteenth-century resident of Paris who lived near the railroad described sensations of brilliant color generated by the sounds of trains passing in the night. This patient - a synaesthete - experienced color hearing for letters, words, and most sounds. Synaesthesia, a phenomenon now known to science for more than a century, is a rare form of perception in which one sense may respond to stimuli received by other senses. This fascinating book provides the first historical treatment of synaesthesia and a closely related mode of perception called eideticism. Kevin Dann discusses divergent views of synaesthesia and eideticism of the past hundred years and explores the controversies over the significance of these unusual modes of perception.

Life in Bright Colors Maya Green, 2010-09 Painting is my passion. Painting is as natural for me as breathing. Having been attached to painting since childhood, I felt that the necessity to paint grows bigger year after year. I respond creatively to everything that surrounds me. This collection of original paintings by Maya Green displays her deep passion for color. Key in the works is her use of a palette knife, which allows her to apply pure color, delicate lines and perhaps most importantly, to express energy that no brush is able to capture.
