Bruegel l'Ancien ou « paysan Bruegel » Delphine Gervais de Lafond,50minutes,2015-04-14 Décryptez l'art de Bruegel l'Ancien en moins d'une heure ! Premier représentant d'une illustre famille de peintres, Pieter Bruegel l'Ancien est l'un des maîtres incontestés de la Renaissance flamande du XVI^e siècle. Taquin, il se fait fort de représenter la vie quotidienne des anciens Pays-Bas dans des scènes de genre populaires bourrées d'humour. Cependant, derrière l'apparente insouciance de ses œuvres se cache souvent un message moral imprégné de valeurs humanistes. Ce livre vous permettra d'en savoir plus sur : - Le contexte politique et culturel dans lequel Bruegel l'Ancien s'inscrit - La vie de l'artiste et son parcours - Les caractéristiques et spécificités de son art - Une sélection d'œuvres-clés de Bruegel l'Ancien - Son impact dans l'histoire de l'art Le mot de l'éditeur : « Dans ce numéro de la série 50MINUTES | Artistes, Delphine Gervais de Lafond nous livre tous les

secrets de celui que l'on surnomma paysan Bruegel, Bruegel le drôle ou encore le nouveau Jérôme Bosch. Elle se penche sur les caractéristiques majeures de son art et analyse quelques-uns des plus grands chefs-d'oeuvre du maître : La Tour de Babel, Le Combat de Carnaval et Carême, Les Proverbes flamands... pour une véritable plongée au cœur du folklore des anciens Pays-Bas. Dépaysement garanti ! » Stéphanie Felten À PROPOS DE LA SÉRIE 50MINUTES | Artistes La série « Artistes » de la collection « 50MINUTES » aborde plus de cinquante artistes qui ont profondément marqué l'histoire de l'art, du Moyen Âge à nos jours. Chaque livre a été conçu à la fois pour les passionnés d'art et pour les amateurs curieux d'en savoir davantage en peu de temps. Nos auteurs analysent avec précision les œuvres des plus grands artistes tout en laissant place à toutes les interprétations.

The Alpha Formula Chris Cain, Larry Connors, Connors Research, 2019-08-15 The Alpha Formula is a combination of: Quantitative Investment Strategies, Behavioral Finance, and Applying First Principles to portfolio construction In this book we will touch on a handful of the most pervasive behavioral biases that befall investors and how they can lead to certain, predictable, repeatable market behavior. We will then use this market behavior to construct four minimally correlated trading strategies, complete with rules and historical test results. Each strategy attacks a First Principle, or self-evident truth, about the market. This results in strategies that are inherently different and uncorrelated. Finally, combining our four strategies leads us to The Alpha Formula portfolio.

Buy the Fear, Sell the Greed Larry Connors, Connors Research, 2018-08 Larry Connors and Connors Research, LLC have created new trading strategies and updated existing trading strategies to take advantage of short-term stock movements based on human emotions. They share their research and the exact rules used to test them for you to integrate into your trading plan.

In Search of Fatima Ghada Karmi, 2024-04-09 One of the finest, most eloquent and painfully honest memoirs of the Palestinian exile and displacement. -New Statesman An intimate memoir of the 1948 Nakba, exile and the dispossession of Palestinian lands In Search of Fatima reflects the author's personal experiences of displacement and loss against a backdrop of the major political events which have shaped conflict in the Middle East. Kharmi was born in Jerusalem but her family were forced out in 1948, following the Nakba, when Palestinians were dispossessed of their lands at the hands of the Israeli

state. In this moving account of exile, she charts her family's displacement to Jordan, and finally to Golders Green, London, where she initially refused to lay down roots in alien soil. Through this journey, Kharmi charts the personal account of a young woman's search for identity: as a Palestinian far away from home. Speaking for the millions of displaced people worldwide who have lived suspended between their old and new countries, fitting into neither, this is a nuanced exploration of psychological displacement and loss of identity.

Victor Arnautoff and the Politics of Art Robert W. Cherny, 2017-03-07 Victor Arnautoff reigned as San Francisco's leading mural painter during the New Deal era. Yet that was only part of an astonishing life journey from Tsarist officer to leftist painter. Robert W. Cherny's masterful biography of Arnautoff braids the artist's work with his increasingly leftist politics and the tenor of his times. Delving into sources on Russian émigrés and San Francisco's arts communities, Cherny traces Arnautoff's life from refugee art student and assistant to Diego Rivera to prominence in the New Deal's art projects and a faculty position at Stanford University. As Arnautoff's politics moved left, he often incorporated working people and people of color into his treatment of the American past and present. In the 1950s, however, his participation in leftist organizations and a highly critical cartoon of Richard Nixon landed him before the House Un-American Activities Committee

and led to calls for his dismissal from Stanford. Arnautoff eventually departed America, a refugee of another kind, now fleeing personal loss and the disintegration of the left-labor culture that had nurtured him, before resuming his artistic career in the Soviet Union that he had fought in his youth to destroy.

The VR Book Jason Jerald, 2015-09-01 Virtual reality (VR) potentially provides our minds with direct access to digital media in a way that at first seems to have no limits. However, creating compelling VR experiences is an incredibly complex challenge. When VR is done well, the results are brilliant and pleasurable experiences that go beyond what we can do in the real world. When VR is done badly, not only is the system frustrating to use, but sickness can result. Reasons for bad VR are numerous; some failures come from the limitations of technology, but many come from a lack of understanding perception, interaction, design principles, and real users. This book discusses such issues, focusing upon the human element of VR rather than technical implementation, for if we do not get the human element correct, then no amount of technology will make VR anything more than an interesting tool confined to research laboratories. Even when VR principles are fully understood, first implementations are rarely novel and never ideal due to the complex nature of VR and the countless possibilities. However, the VR principles discussed within enable us to intelligently experiment with the rules and iteratively design towards innovative experiences.
